"This requirement is subject to the COVID-19 Vaccination Policy for Supplier Personnel. Failure to complete and provide the Annex "D" to Part 1 COVID-19 Vaccination Requirement Certification as part of the bid will render the bid non-responsive."

PART 2 - BIDDER INSTRUCTIONS

2.1 Standard Instructions, Clauses and Conditions

The [2003](#) (2020-05-28) Standard Instructions - Goods or Services - Competitive Requirements, are incorporated by reference into and form part of the bid solicitation.

Subsection 3.a) of Section 01, Integrity Provisions - Bid of the Standard Instructions [2003](#) incorporated by reference above is deleted in its entirety and replaced with the following:

This email address is to be used to open an epost Connect conversation, as detailed in Standard Instruction 2003, or to send offers through an epost Connect message if the bidder is using its own licensing agreement for epost Connect.

It is the Bidder's responsibility to ensure the request for opening an epost Connect conversation is sent to the email address above at least six (6) days before the Request for Proposals closing date.

Due to the nature of the bid solicitation, bids transmitted by facsimile or hardcopy to PWGSC will not be accepted.

2.3 Enquiries - Bid Solicitation

All enquiries must be submitted in writing to the Contracting Authority no later than seven (7) calendar days before the bid closing date. Enquiries received after that time may not be answered.

Bidders should reference as accurately as possible the numbered item of the bid solicitation to which the enquiry relates. Care should be taken by Bidders to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the question(s) or may request that the Bidder do so, so that the proprietary nature of the question(s) is eliminated, and the enquiry can be answered to all Bidders. Enquiries not submitted in a form that can be distributed to all Bidders may not be answered by Canada.

2.4 Applicable Laws

Any resulting contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

Bidders may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their bid, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the Bidders.

2.5 Bid Challenge and Recourse Mechanisms

- (a) Several mechanisms are available to potential suppliers to challenge aspects of the procurement process up to and including contract award.
- (b) Canada encourages suppliers to first bring their concerns to the attention of the Contracting Authority. Canada's [Buy and Sell](#) website, under the heading "[Bid Challenge and Recourse Mechanisms](#)" contains information on potential complaint bodies such as:
 - Office of the Procurement Ombudsman (OPO)
 - Canadian International Trade Tribunal (CITT)
- (c) Suppliers should note that there are **strict deadlines** for filing complaints, and the time periods vary depending on the complaint body in question. Suppliers should therefore act quickly when they want to challenge any aspect of the procurement process.

REQUIREMENT

Title: Flash Point Testers

For the supply, and delivery of Setaflash™ Flash Point Testers Model # 82000-2 for the Department of National Defence, Trenton, ON.

1.0 BACKGROUND

The Royal Canadian Air Force (RCAF) has a well-established Fluids Analysis program which is a capability provided nationally to the RCAF by Aerospace Telecommunications and Engineering Support Squadron (ATESS) and requires five (5) new Automated Setaflash™ Small Scale Flash Point Testers, Model# 82000-2.

This equipment is used on the CT114, CF188, and CC115 aircraft fleets and is necessary to test the flashpoint of their aircraft fluids thereby determining if fuel contamination is present.

The Setaflash™ testers must be fully compatible and integrate with RCAF current array of existing equipment that is used across Canada. Use of the same product will eliminate the need to purchase 15 new testers for each of the labs across Canada and the requirement to provide user training to meet RCAF support mandate. We can replace the unserviceable items as required over an extended period of time that will ensure we can continue to provide vital support.

The testers must cover a range of flash points from ambient +5 to 300°C. The flash point testers must include all required accessories for turn-key operation. The testers provided must follow ASTM International (<https://www.astm.org/>) standard methods for closed-cup flash point analysis as specified therein.

2.0 OBJECTIVE

Purchase of new flashpoint testers to replace aging and unserviceable units beyond economical repair.

3.0 SCOPE OF REQUIREMENT
