1.4 Anticipated migration to an e-Procurement Solution (EPS)

Canada is currently developing an online EPS for faster and more convenient ordering of goods and services. In support of the anticipated transition to this system and how it may impact any resulting Standing Offer that is issued under this solicitation, refer to 7.15 Transition to an e-Procurement Solution (EPS).

The Government of Canada’s [press release](#) provides additional information.

This RFSO allows offerors to use the epost Connect service provided by Canada Post Corporation to transmit their offer electronically. Bidders must refer to Part 2 entitled Offeror Instructions, and Part 3 entitled Offer Preparation Instructions, of the RFSO, for further information.

Given that many people are currently working from home and in an effort to reduce the spread of the coronavirus disease (COVID-19) within communities, offerors are highly encouraged to transmit their bid electronically using the epost Connect service. Information on the epost Connect service can be found in Part 2 entitled Offeror Instructions, and Part 3 entitled Bid Preparation Instructions, of the bid solicitation.

2.4 Enquiries - Request for Standing Offers

All enquiries must be submitted in writing to the Standing Offer Authority no later than ten (10) calendar days before the Request for Standing Offers (RFSO) closing date. Enquiries received after that time may not be answered.

Offerors should reference as accurately as possible the numbered item of the RFSO to which the enquiry relates. Care should be taken by Offerors to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the questions or may request that Offerors do so, so that the proprietary nature of the question is eliminated, and the enquiry can be answered to all Offerors. Enquiries not submitted in a form that can be distributed to all Offerors may not be answered by Canada.

2.5 Applicable Laws

The Standing Offer and any contract resulting from the Standing Offer must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

Offerors may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their offer, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the Offerors.

2.6 Environmental Regulations

On June 12, 2008, an Environment Canada regulation governing storage tank systems for petroleum products under federal jurisdiction came into effect (Storage Tank Systems for Petroleum Products and Allied Petroleum Products Regulations (SOR/2008-197). It contains specific requirements for suppliers who deliver petroleum products to those storage tank systems. Compliance with these regulations is mandatory.

Note that since June 12, 2010, suppliers are also prohibited from filling storage tanks that do not have a visible Environment Canada identification number for suppliers to record. This applies to storage tanks over a certain size, refer to the regulation above for details.

For More information on this regulation, please visit the [Environment Canada website](#).

2.7 Bid Challenge and Recourse Mechanisms

- (a) Several mechanisms are available to potential offerors to challenge aspects of the procurement process up to and including contract award.
- (b) Canada encourages offerors to first bring their concerns to the attention of the Contracting Authority. Canada's [Buy and Sell](#) website, under the heading "[Bid Challenge and Recourse Mechanisms](#)" contains information on potential complaint bodies such as:
 - Office of the Procurement Ombudsman (OPO)
 - Canadian International Trade Tribunal (CITT)
- (c) Offerors should note that there are strict deadlines for filing complaints, and the time periods vary depending on the complaint body in question. Offerors should therefore act quickly when they want to challenge any aspect of the procurement process.

PART 3 - OFFER PREPARATION INSTRUCTIONS

3.1 Offer Preparation Instructions - Electronic Submission

Canada requests that the Offeror submits its offer in accordance with section 08 of the 2003 standard instructions. The epost Connect system has a limit of 1GB per single message posted and a limit of 20GB per conversation.

Canada requests that the offer be gathered per section and separated as follows:

Section I: Technical Bid
Section II: Financial Bid
Section III: Certifications

Due to the nature of the Request for Standing Offer, transmission of offers by mail/courier to PWGSC BRU will not be accepted.

Prices must appear in the financial bid only. No prices must be indicated in any other section of the bid.

Section I: Technical Offer and Additional Information

Technical Offer

In their technical offer, Offerors should explain and demonstrate how they propose to meet the requirements and how they will carry out the Work.

A. Consolidated Requirement and Zones

The requirements shown at Annex "A" have been arranged by product type and delivery method within zones (geographical areas). Where there is more than one individual requirement for a particular product type with the same delivery method within a zone, the quantity of each individual requirement has been consolidated into one consolidated requirement. In such instances, the Offeror must quote a price per litre applicable to the entire consolidated requirement.

An offer contingent on supplying only a portion of a consolidated requirement will result in the offer being declared non-responsive. Any other conditional offers will be declared non-responsive.

B. Equally Acceptable Products (applies only to F-34 aviation fuel requirements identified in Annex "A")

Offerors have the option of submitting an offer on either of the following two fuel types:

Option 1: An offer for Aviation Turbine Fuel (Military Grade F-34) (CAN/CGSB-3.24-2020)

Option 2: An offer for Aviation Turbine Fuel (grade Jet A-1) containing Fuel System Icing Inhibitor (FSII) and Corrosion Inhibitor (CI) (Standard CAN/CGSB-3.23-2020).

There will be no preference given to either option, both are equally acceptable.

The Offeror will insert which product will be supplied and the per unit price in Annex "A".

C. Alternate Products

In lieu of the requested Aviation Turbine Fuel (Military Grade F-34) (CGSB-3.24-2020), or equally acceptable Aviation Turbine Fuel (grade Jet A-1) (CAN/CGSB-3.23-2020), containing Fuel System Icing Inhibitor (FSII) and Corrosion Inhibitor (CI), as stated in Annex "A", the Offeror may offer the following alternate product:

Aviation Turbine Fuel (grade Jet A-1) Standard CAN/CGSB-3.23-2019, containing Fuel System Icing Inhibitor (FSII).

This alternate product will only be considered if no offer is received for the requested product or the equally acceptable product.

The Offeror should insert the alternate product to be supplied and the per unit price in Annex "A", wherever applicable.

Additional Information

Technical Proposal (TP)

Offerors must submit a Technical Proposal (TP). The TP is for information purposes only and will not form part of the evaluation. Offerors should provide the TP with their offer or promptly thereafter. If the TP has not been received by the time the evaluation of offers is completed, the Standing Offer Authority will request it in writing from the Offeror. Failure to provide a TP within the requested time frame will render the offer non-responsive.

The TP should explain the process (may use process maps, flow charts, schematic diagrams, etc.) that will be followed by the Offeror and its representatives, following issuance of the Standing Offer, to carry out production, delivery, and ensure quality control of product. The TP should cover, at a minimum, the following:

- (1) Identify the source(s) of supply (refinery, terminal, and manufacturer) of the product (fuel component(s), additive(s)).
- (2) If subsequent commingling or blending is required, identify the location and the products to be commingled or blended.
- (3) Identify the physical location where the fuel is certified and/or re-certified.
- (4) Identify the transfer and distribution point(s), and intermediary storage.
- (5) Identify the transportation type(s), mode(s) and transporter(s) to the storage and distribution point(s), and DND facilities.
- (6) Identify the standard utilized to prepare transport vessels and equipment.
- (7) Explain the control of quality and traceability maintenance, and identify the test procedures, records retention and distribution.
- (8) Explain the testing process and identify the inspection and verification points, frequency, tests to be carried out, and laboratory involved.

(9) In order to support high consumption periods, such as disaster relief, air shows, military exercises, etc., the Offeror must provide a delivery plan that will demonstrate its capability to substantially increase fuel deliveries to the following DND bases, and within 48 hrs:

<u>DND Base</u>			<u>Average weekly fuel requirement</u>
CFB Trenton	ON151	58/TW	750,000 litres
CFB Bagotville	PQ241	58/TW	400,000 litres
CFB Winnipeg	MB001	58/TW	150,000 litres
CFB Cold Lake	AB181	58/TW	707,000 litres

(The frequency of deliveries and volumes is difficult to predetermine however, previous high consumption periods have resulted in fuel orders that have doubled or even tripled average weekly fuel requirements. Also, a high consumption period could last anywhere from a few days to several weeks)

The Technical Proposal will be reviewed by DND’s Quality Engineering Test Establishment (QETE) to validate the Offeror’s technical capability and capacity.

Section II: Financial Offer

Offerors must submit their financial offer in accordance with Annex “A” and Annex “B”, Basis of Payment. The total amount of applicable taxes must be shown separately.

Annex B – Basis of Payment

File No. E60HL-1-0052-23-B

5.1 Weekly Price Adjustment Effective Day:

After the initial price adjustment, which comes into effect on February 15, 2022, all subsequent price adjustments will come into effect at 12:01 AM on _____ of each week. (*Standing Offer Authority will indicate the day of the week as selected by the Offeror in Part 3, Section II.C, Unit Price Adjustments*)

5.1.1 An adjustment to the firm unit prices per litre will be calculated as indicated hereunder:

- a) Initial Adjustment: the unit price adjustments effective on April 1, 2021 will be equal to the applicable Reference Marker price for the week ending March 26, 2021 ("B" week value) minus the applicable Reference Marker price for the week ending November 27, 2020 ("A" week value) plus the offer price;
- b) Subsequent Weekly Adjustments: the unit price effective on day of the week identified above for every subsequent week will be equal to the Reference Marker price for the previous week minus the 'A' week value Reference Marker price plus the Offer price.

5.1.2 For Reference Markers, "NYH", "USGC" and "LA PIPELINE", the average weekly assessment will be:

- a) converted from U.S. funds to Canadian funds using the week average of the Bank of Canada official exchange rate for the corresponding week;
- b) converted from U.S. gallon to litres using 3.785412 as the conversion factor.

5.1.3 The Reference Marker price converted to Canadian dollars per litre will be rounded to four decimal places to the nearest hundredth of a cent per litre (\$0.0001/litre). Not considering any resultant value in the sixth decimal place, the fifth decimal place will be rounded as follows; less than or equal to \$0.00004 rounded down, \$0.00005 - \$0.00009 rounded up.

5.1.4 Example calculation using the "LA PIPELINE" Marker:
(All prices indicated are for example purposes only)

Related "LA PIPELINE" marker price for week ending September 9, 2016 = \$ 1.8713

Related "LA PIPELINE" marker price for week ending September 16, 2016 = \$ 1.7886

Bank of Canada official exchange rate for week ending September 9, 2016 = \$ 1.1190 per U.S.dollar

Bank of Canada official exchange rate for week ending September 16, 2016 = \$ 1.1209 per U.S.dollar

Litres in a US gallon = 3.785412

- a) $(\$ 1.8713 \times \$ 1.1190) / 3.785412 = \$ 0.553172$ rounded to Cdn.\$ 0.5532 per litre
- b) $(\$ 1.7886 \times \$ 1.1209) / 3.785412 = \$ 0.529623$ rounded to Cdn.\$ 0.5296 per litre
- c) b) minus a) = decrease of \$ 0.0236 per litre
