6.11 Access to Facilities and Equipment

Canada's facilities, equipment, documentation and personnel are not automatically at the disposal of the Contractor. If access to government premises, computer systems (micro computer network), working space, telephones, terminals, documentation and personnel for consultation is required by the Contractor to perform the Work, the Contractor must advise the Contracting Authority of the need for such access in a timely fashion. If the Contractor's request for access is approved by Canada and arrangements are made to provide access to the Contractor, the Contractor, its subcontractors, agents and employees must comply with all the conditions applicable at the Work site. The Contractor must further ensure that the facilities and equipment are used solely for the performance of the Contract.

6.12 Canada's Facilities to Accommodate the Delivery

The Supplier's employees and subcontractors requiring access to the site must adhere to the health and safety plans established for the site, in addition to any laws in effect in the jurisdiction where the work is being performed.

During the period of the contract, a representative of Canada or a service provider(s) under contract with the Government of Canada may request the list of employees and subcontractors requiring access to the site to perform the work and their security statuses. Information must be provided in the timeframe prescribed in order to ensure that the supply, delivery and installation of the furniture aligns with the master schedule

6.13 Standard finishes

The Identified User (IU) will consult the Supplier's Website identified in Part 6A of the SA to view the available finishes.

Within ten business days of the contract award, the Project Authority will provide the Contractor with a written notice of Canada's finish choices for each of the product(s) in Annex A.

The Contractor will deliver the products corresponding to Canada's choice of specific finishes(s). No additional charge will be applied to Canada.
