## **Annex A -Statement of Work**

The Correctional Service Canada has a requirement for Offender Paid Television Services at Edmonton Institution. The work will involve the following;

### 1.1 Background:

Edmonton Institution is for maximum-security inmates. It is located at the Northern Edge of Edmonton: housing up to approximately 350 male adult inmates at any given time.

### 1.2 Objectives:

To provide a viable and balanced CATV signal or equivalent throughout the Institution to up to 350 CATV outlets at Edmonton Institution.

### 1.3 Tasks

Edmonton Institution has 350 cable drops. CSC requires all drops to be active at all times. The main CATV feed for the service for all units will be through the administrative building, main electrical room. From there the feed will be distributed and amplified, as required, to provide a viable, balanced 0dB signal to each of our CATV outlets.

All equipment the Contractor supplies must be serviced, maintained and remains the sole responsibility of the Contractor during the term of the contract.

Maintenance of all coaxial cable wiring connections throughout the institution will be the responsibility of the respective institutions, not the Contractor.

The Contractor's regular published installation charges, relocation charges, or both will apply including additional outlets or relocation of the existing outlets when requested by the project authority.

The Contractor must provide a channel package that includes, as a minimum, a choice of 135 channels. In addition to the 135 channels the Contractor offers, the Contractor must include 3 theme packs to choose from in the all inclusive per unit price.

### Maintenance:

The Contractor must provide service personnel that are available 24 hours a day, 7 days a week to provide service to the Vecima. In the event that the Contractor cannot provide service personnel to respond to service calls within the specified timeframe, the Contractor must notify the Project Authority as soon as possible; a response time will then be mutually agreed upon between the Project Authority and the Contractor.

Response to service calls, initiated by The Correctional Service of Canada Project Authority or delegate: the Contractor must meet the following response times. If the Contractor cannot meet these response times, the Contractor must contact the Project Authority or delegate to inform them of the time within which the Contractor will respond, subject to the Project Authority's or delegate's approval.

The Contractor must respond within one (1) hour from the time of the telephone call. The Contractor's service personnel must arrive on site within four (4) hours for a full-scale outage, and twenty-four (24) hours for service calls other than a full-scale outage, from the time of the request unless otherwise agreed upon. In the event that the Contractor cannot respond to service calls within the specified timeframe, the Contractor must notify the Project Authority as soon as possible; a response time will then be mutually agreed upon between the Project Authority and the Contractor.

The Project Authority will provide written notification to the Contracting Authority regarding any service calls within 24 hours of the service call.

The Contractor must test the Vecima system and signal strength two (2) times per year, per site and report the results to the Project Authority. The Contractor may make recommendations to the Project Authority of each site, on how the sites can increase signal strength issues, beyond the Contractors control. The Contractor must perform this task in addition to and separate from service calls.

In the event the Contractors equipment (Vecima) fails, and a full-scale (all channels) outage lasts longer than 48 consecutive hours per site, the Contractor must provide a credit to the affected site on their account. The Contractor must calculate the credit by multiplying the daily rate by the number of outlets the site is currently paying for as per Annex B – Basis of Payment, and multiplying the resulting amount by the number of days of the full-scale outage, per affected site.

Any work or maintenance must be performed during hours agreeable to both the Contractor and the Project Authority and done in such that there will be minimum impact to the normal institutional routine. All work and requests from the Contractor will be addressed to the Project Authority and/or their delegate.

### **Outlet Count**

The Contractor must adjust the number of outlets listed in Annex B, in August of each year, based on the annual average population count. The Contracting Authority will report the outlet count to the Contractor. The number of outlets will remain constant unless the inmate population fluctuates by 10% or more, as reflected in the annual average population count.

The Project Authority will calculate, and provide to the Contracting Authority, the annual average population using the timeframe February 1<sup>st</sup> to January 31<sup>st</sup>. The Project Authority will determine how the annual average population count is calculated (including but not limited to, accommodation reports, count sheets) at their sole and entire discretion.

The Project Authority will consider Shared Accommodation cells as one outlet for the purpose of this contract. A shared accommodation cell is defined as a cell that is designed to house two inmates.

The Project Authority may request to adjust the outlet count for units that are unoccupied for maintenance or construction for one month or more. In this case, the Project Authority will provide written notification to the Contracting Authority requesting an adjustment to the outlet count. The Contracting Authority will provide written notice to the Contractor of the increase or decrease. The Contractor must adjust the number of outlets, which must be effective the 1st day of the following month. The Contracting Authority will give the Contractor a minimum of ten (10) days notice.
