Solicitation amendment #001 is raised to provide the following questions and answers:

Q1: In the solicitation, it is stated that Canada's estimated public market AIV demand is the total of publicly funded provincial, territorial and federal AIV demand (excluding specialized influenza vaccines such as live attenuated, cell derived and those specifically targeted for persons aged 65 years and older) is 13.2M doses. The total bid quantity is approximately 8.8M doses. The resulting contract includes the irrevocable option to purchase additional vaccine up to a maximum of 1.5 times the Awarded Doses in any year of the Contract.

Does the 13.2M doses represent the volume after applying the option to add additional doses (1.5 times the awarded doses) on the contract quantity?

A1: No, the 8.8M doses being solicited represent the demand that has not been filled. While Canada's estimated public market demand is 13.2M doses, a portion of this demand is reserved for Canada's domestic pandemic influenza vaccine readiness contract. The option to purchase up to 1.5 times the awarded doses exists if Canada's public market demand significantly increases and/or a supplier under contract be unable to meet their contractual obligations.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
