1.2 Summary

1.2.1 Description

The Department of Fisheries and Oceans has a requirement for the procurement of a variety of tow lines, stretcher lines and bridles for towing operations in their fleet as per Annex A. The period of the contract will be from contract award to March 31, 2022.

1.2.2 Trade Agreements

The requirement is not subject to any trade agreements.

1.2.3 epost Connect

This bid solicitation allows bidders to use the epost Connect service provided by Canada Post Corporation to transmit their bid electronically. Bidders must refer to Part 2 entitled Bidder Instructions, and Part 3 entitled Bid Preparation Instructions, of the bid solicitation, for further information.

1.3 Debriefings

Bidders may request a debriefing on the results of the bid solicitation process. Bidders should make the request to the Contracting Authority within 15 working days from receipt of the results of the bid solicitation process. The debriefing may be in writing, by telephone or in person.

1.4 COVID-19 Vaccination Requirement (2021-10-22)

This requirement is subject to the COVID-19 Vaccination Policy for Supplier Personnel. Failure to complete and provide the COVID-19 Vaccination Requirement Certification as part of the bid will render the bid non-responsive.

PART 2 - BIDDER INSTRUCTIONS

2.1 Standard Instructions, Clauses and Conditions

All instructions, clauses and conditions identified in the bid solicitation by number, date and title are set out in the [Standard Acquisition Clauses and Conditions Manual](https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual>) issued by Public Works and Government Services Canada. Bidders who submit a bid agree to be bound by the instructions, clauses and conditions of the bid solicitation and accept the clauses and conditions of the resulting contract.

The [2003](#) (2021-12-02), Standard Instructions - Goods or Services - Competitive Requirements, are incorporated by reference into and form part of the bid solicitation.

2.2 Submission of Bids

Bids must be submitted only to the Public Works and Government Services Canada (PWGSC) Bid Receiving Unit specified below by the date and time indicated on page 1 of the bid solicitation:

PWGSC Pacific Region Bid Receiving Unit

Only bids submitted using epost Connect service will be accepted.
The Bidder must send an e-mail requesting to open an epost Connect conversation to the following address:

TPSGC.RPRReceptiondessoumissions-PRBidReceiving.PWGSC@tpsgc-pwgsc.gc.ca

Note: Bids will not be accepted if emailed directly to this email address. This email address is to be used to open an epost Connect conversation, as detailed in Standard Instructions 2003, or to send bids through an epost Connect message if the bidder is using its own licensing agreement for epost Connect.

It is the Bidder's responsibility to ensure the request for opening an epost Connect conversation is sent to the email address above **at least six days** before the solicitation closing date.

2.3 Former Public Servant – Non applicable

2.4 Enquiries - Bid Solicitation

All enquiries must be submitted in writing to the Contracting Authority no later than five (5) calendar days before the bid closing date. Enquiries received after that time may not be answered.

Bidders should reference as accurately as possible the numbered item of the bid solicitation to which the enquiry relates. Care should be taken by Bidders to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the question(s) or may request that the Bidder do so, so that the proprietary nature of the question(s) is eliminated and the enquiry can be answered to all Bidders. Enquiries not submitted in a form that can be distributed to all Bidders may not be answered by Canada.

2.5 Applicable Laws

Any resulting contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in British Columbia.

Bidders may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their bid, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the Bidders.

2.6 Bid Challenge and Recourse Mechanisms

- (a) Several mechanisms are available to potential suppliers to challenge aspects of the procurement process up to and including contract award.
- (b) Canada encourages suppliers to first bring their concerns to the attention of the Contracting Authority. Canada's [Buy and Sell](#) website, under the heading "[Bid Challenge and Recourse Mechanisms](#)" contains information on potential complaint bodies such as:
 - Office of the Procurement Ombudsman (OPO)
 - Canadian International Trade Tribunal (CITT)
- (c) Suppliers should note that there are strict deadlines for filing complaints, and the time periods vary depending on the complaint body in question. Suppliers should therefore act quickly when they want to challenge any aspect of the procurement process.

PART 3 - BID PREPARATION INSTRUCTIONS

3.1 Bid Preparation Instructions

The Bidder must submit its bid electronically in accordance with section 08 of the 2003 standard instructions. The epost Connect system has a limit of 1GB per single message posted and a limit of 20GB per conversation.

The bid must be gathered per section and separated as follows:

To assist Canada in reaching its objectives, bidders should:

Bidders should demonstrate their capability and describe their approach in a thorough, concise and clear manner for carrying out the work.

The technical bid should address clearly and in sufficient depth the points that are subject to the evaluation criteria against which the bid will be evaluated. Simply repeating the statement contained in the bid solicitation is not sufficient. In order to facilitate the evaluation of the bid, Canada requests that Bidders address and present topics in the order of the evaluation criteria under the same headings. To avoid duplication, Bidders may refer to different sections of their bids by identifying the specific paragraph and page number where the subject topic has already been addressed.

Section II: Financial Bid

3.1.1 Bidders must submit their financial bid in accordance with the Financial Bid Presentation Sheet in Annex “D”.

3.1.2 Electronic Payment of Invoices – Bid

If you are willing to accept payment of invoices by Electronic Payment Instruments, complete Annex “G” Electronic Payment Instruments, to identify which ones are accepted.

TITLE: Canadian Coast Guard would like to procure synthetic towlines, shock absorber stretchers and bridles as per this statement of requirement and the attached Annex C Mandatory Technical Requirements.

OBJECTIVE: Canadian Coast Guard would like to create a contract for the procurement of synthetic towlines , shock absorbing stretchers and bridles for use on a wide range of vessels including but not limited to Icebreakers having bollard pulls of 200T,down through Multi mission, aids to navigation, science and Search and Rescue cutters that have bollard pulls of only 9 tons. The period of the contract is from award of contract to March 31, 2022.

Tow line usage: Canadian Coast Guard operates a fleet of approximately 37 ships of > 500GT, and 40 cutters of < 500GT. One of the Canadian Coast Guard’s mandates, is to provide emergency towing, which each of these vessels may be tasked to. The 2 main causes of the requirement to tow are SAR and assistance to disabled vessels. A wide variety of towline strengths is required to ensure that the proper SWL line is obtained for each particular ship based on its bollard pull and towing equipment. Also, Coast Guard wants to ensure that towlines are not oversized for the service, to ensure adequate storage on tow reel, and ease of handling by small deck crews.

The vast majority of the ships and cutters are equipped to tow from a set of bitts, or an H bitt setup. This demands a towline that grips on bitts and warping drums and does not get heated or deform when under high loads. Decks where towing operations take place are confined, crew size is small making handling of heavy nonflexible lines undesirable. This confined space and stowage capacity also makes it vital that the line be suitably designed to resist damage during handling operations. The necessity to be floatable is a requirement for ease of handling and in order to prevent the towline in getting fouled in the ship’s/cutters propellers. Towlines must not be overly elastic, so that in the event of breakage, there is little snap back that could injure or kill crew. Splicability while at sea is essential in repairing of equipment if it is damaged during operations and thus being able to bring the ship/cutter back to full operations. In addition, exposure to sunlight is common in operations, and therefore this must not reduce the life of the towline significantly. Coast Guard is standardizing towing equipment throughout the National fleet to ensure personnel are familiar with towline materials and uses as they move from ship to ship and to ensure interchangeability of equipment between ships if required.

SCOPE: The contractor will be required to provide prices for the noted towlines and bridles based on their strengths, lengths. In addition, contractor is to provide a recommended connection method and proposed product for connecting the stretchers to the main tow line.

DELIVERABLES and SCHEDULE: All ropes or bridles must be delivered by March 31st 2022 in the quantities noted for each Canadian Coast Guard location noted below.

2. Be of a High Modulus Polyethylene or Polyester blend
3. Be capable of being spliced on board ship with minimal training.
4. Be buoyant in fresh water with a Specific Gravity of 1.0 or less.
5. Be designed for usage on H bitts, warping drums or similar applications.
6. Have a Coefficient of Friction of 0.1 or higher
7. Retain shape with use
8. Have an elastic elongation/stretch factor of no more than 1% @ 30% of the lines breaking strength
9. Have a method of indicating if the topline is twisted while storing
10. Be designed with a specific coating to be abrasion and cut damage resistant.
11. Be suitable for use in salt water
12. Be flexible and torque free

5. Column 11 - For each of the sizes , the cost of each hard eye splice including insert used
6. Column 12 – for each splice identified in Column 10 or 11 , identify the cost / metre of providing an additional patented chafe protection from the root of the splice on the topline

CERTIFICATION: Manufacturers certificate of conformance as part of this contract certifying that samples have been tested, inspected and documented as required by Cordage Institute CI-1500 (Test Methods for Fiber Rope) and ISO 2307 (fiber ropes - determination of certain physical and mechanical properties). Type approval from Transport Canada and/or Classification Society

STRETCHER ROPE SPECS Construction: (Appendices 3 & 4)

- Due to the unique nature of stretchers, contractors have the opportunity to propose either a Nylon solution or a polyester blend, or both in appendices 3 & 4 . **Please note pricing must be completed in Annex D - Financial Presentation Sheet.**
