AMENDMENT 2

This amendment is issued in response to the following bidder questions. The incorrect file was attached to amendment 1

1. Would Canada be willing to accept a specified combined weight of 3.20 kg standard RTK rover setup on pole, including batteries?

Answer: Yes

2. Would Canada be willing to consider a controller specification which withstands a drop from 1.2m, given that the controller is typically mounted half way up the pole at this height?

Answer: Yes

3. Can we please get a definition of compatibility from the requirement below?

ANNEX "A" REQUIREMENT

To ensure 100% **compatibility** with existing inventory of GNSS receivers, controllers, data storage media, file format, batteries and processing of raw data, the Survey General Branch requires the purchase of a replacement Leica GNSS kit for the Atlantic Regional Office.

The supplier must be an equipment manufacturer or an authorized reseller and provide local technical service to the current equipment location (Amherst, NS) of the Surveyor General Branch of Natural Resources Canada. Equipment must be delivered to the Atlantic Regional Office.

Answer:

By *compatibility* we mean that the GNSS receivers, controllers, data storage media, file format, batteries and processing of raw data should be able to operate seamlessly, i.e. **without any complications**. Our office currently has existing equipment that needs to be able to operate together with the new equipment.

All other terms and conditions remain unchanged.
