Solicitation Amendment No. **02**

The following amendment is to amend:

**DELETE:**

**6.4.2 Delivery Date**

All the deliverables must be received on or before March 31, 2022.

**INSERT:**

**6.4.2 Delivery Date**

All the deliverables must be received on or before **May 13, 2022**.

And to:

**DELETE:**

Annex A

**INSERT:**

ANNEX A – revised January 18, 2022

And to:

**DELETE:**

Annex C

**INSERT:**

Annex C – revised January 18, 2022

This solicitation is also hereby amended to answer the following questions:

**Q1. With reference to Annex A, item 14 – Please confirm 24kW is the maximum acceptable heat input. Our proposed oven has 20kW heat input, is this acceptable?**

A1. Yes

Solicitation No. - N° de l'invitation  
01799-220554/A  
Client Ref. No. - N° de réf. du client  
01799-220554

Amd. No. - N° de la modif.  
02  
File No. - N° du dossier  
MCT-1-44088

Buyer ID - Id de l'acheteur  
mct032  
CCC No./N° CCC - FMS No./N° VME

---

**Q2. With reference to Annex A, item 15 – please confirm the requested dimension refers to the internal workspace of the oven and not overall outside dimension.**

A2. The workspace dimension is the internal dimension

**Q3. We need to know what you will be curing/processing in the oven.**

A3. The oven will mainly be used for drying plant biomass collected from the research field.

**Q4. Does it contain volatiles? If so, please provide the MSDS for the product**

A4. Response: Plant biomass will not contain volatiles.

**Q5. How much product will be in the oven per batch? Weight? Product size? Pounds per shelf?**

A5. There is no exact weight because the weight will depend upon the number of plant biomass samples collected and the growth stage.

**Q6. For an oven that size we only offer 3 phase options. Do you have 3 phase 208/240/460/480?**

A6. We have 3 phase 208

**Q7. With reference to ANNEX A, item 13**

standard Industrial Shelf Oven is normally 208/3/60, 230/3/60 or 460/3/60. However, Engineering would be able to accommodate a 220V/1P but with 24KW the oven will require over 115 amps and I want to make sure that your facility has amperage available to support that draw with 220V/1P service. This is not a normal practice. Will Canada accept any of 208/3/60, 230/3/60 or 460/3/60 power options?

A7. We will accept 208/3/60

**Q8. With reference to ANNEX A, item 17**

Current lead time of the requested system is more than 14 weeks which makes it impossible to deliver it before March 31, 2022. Will Canada remove this requirement from the mandatory list?

A8. Yes

**ANNEX A – revised January 18, 2022**  
**Statement of Requirement**

The Department of Agriculture and Agri-Food (AAFC), Fredericton Research and Development Centre has a requirement for the supply and delivery of one **Industrial Shelf Oven** with all necessary accessories and attachments for plant biomass sample drying in accordance with the specifications identified herein.

**DELIVERY**

All deliverables identified must be delivered during operational hours (Monday to Friday, 8:00 am to 4:00 pm) on or before **May 13, 2022** to:

Fredericton Research and Development Centre  
95 Innovation Road  
Fredericton, NB  
E3B 4Z7

**Technical Specifications for: Industrial Shelf Oven**

<b>Technical Specifications</b>	
1	The Industrial Shelf Oven must have CSA or equivalent certification.
2	The Industrial Shelf Oven must also include any or all standard equipment normally included (either implied or stated) on the model quoted.
3	The manufacturer must supply a minimum one year full coverage.
4	Complete service, parts and operators manual must be supplied.
5	Maximum temperature required is 400°F
6	Equipped with a channel shelf supports to prevent shelf tipping.
7	Automatic door switch that turns off electric blower and heat when door is open and subsequently restores blower and heat when door is open.
8	Digital programmable temperature controller that allows for more consistent and accurate temperature regulation.
9	Equipped with a solid state controller that allows for greater precision and efficiency of electrical power distribution to heating elements
10	Equipped with a recirculating blower air flow safety switch.
11	Equipped with a built-in baffles to prevent radiant heat.
12	Blower requirements: 1 HP, 1000 CFM
13	Power: 220 v-single phase
14	Heat input: 24 kW
15	Must be able to fit into workspace dimensions: 65-70" height x 65-70" wide x 30-40" deep
16	Must include shipping and handling fees.
17	The equipment must be delivered on or before <b>May 13, 2022</b>

---

**Annex C- revised January 18, 2022**

**Mandatory Requirements:**

Bids MUST meet the mandatory requirements specified below. To demonstrate that all requirements of the technical specifications are respected bidders MUST respond with complete specifications and/or descriptive literature of the equipment being offered.

Any proposal which fails to meet all mandatory requirements will be deemed non-responsive. Each requirement should be addressed separately.
