This Solicitation Amendment No. 002 is being raised to address the following Bidder Questions:

Question 1:

This question refers to Annex A - Statement of Requirement - section 2.1.1.3.

We require clarification on the following anodes specification:

- ☐ Length, Nominal: 23.75" (603.25 mm) \pm 1/8" (3.175 mm)

This anode is manufactured in a cast mold at an overall length of 24" (609.6 mm).
Each anode would have to be manually machined to remove the excess length of 1/4" (6.3 mm).
Please advise if DND would accept the length of 24" (609.6 mm).

Answer:

A nominal length of 24" is acceptable.

Question 2:

This question refers to Annex A – Statement of Requirement, drawing and dimensions noted on Page 17 & 18.

We have a question regarding the core dimensions. Your drawing specifies a core thickness of 10.15mm (0.400"). This core thickness is far from the industry standard which is 4.75mm (0.187").

Can you confirm that the thickness shown on your referenced drawing & specification dimensions is needed?

Answer:

A core thickness of 4.75mm is acceptable.

All other terms and conditions remain the same.
