Solicitation Amendment 004 is being raised to answer the following questions;

Question 1: Regarding the specification of the windlass, as it seems the line pull requested in the latest clarification is significantly more than what is stated in the IACS requirements. There also seems to be a blend of requirements for 30mm Grade 2 and Grade 3 chains.

Response 1: Grade 2 chain is not acceptable. Grade 2 does not meet the requirements laid out in the SOR, Grade 3 does. If using Grade 3 chain adds a little additional weight, we can will accept this. Main thing is we do not accept a chain that is of lower specifications than those we have listed.

Also, Grade 3 is what is standard in the fleet and we do not want to deviate from this

Question 2: "3.3 says "Nominal footprint for the windlass shall not exceed 77"(L) x 55" (W) x 70" (H) " Drawing ABES.PROD.PW_OLZ.B014.B7733.ATTA002 has 7'-03/4" (84-3/4") between center lines on winch base plate. We would also need the center line distance of the spurling pipes."

Response 2: Please refer to attachment 003.

All other terms and conditions remain unchanged.
