TECHNICAL EVALUATION

1. Technical Bid Format

The technical bid must address clearly and in sufficient depth the points that are subject to the evaluation criteria against which the bid will be evaluated. Simply repeating the statement contained in the bid solicitation is not sufficient.

In order to facilitate the evaluation of the bid, <u>Canada strongly requests that bidders address and present topics in the order of the evaluation criteria under the same headings.</u>

To avoid duplication, bidders may refer to different sections of their bids by identifying the specific paragraph and page number where the subject topic has already been addressed.

The Bidder is advised to pay careful attention to the wording used throughout this Request for Proposal (RFP). Failure to satisfy a term or condition of this RFP may result a bid being deemed non-responsive.

All information required for evaluation purposes must be included directly in the Bidder's technical bid. The evaluation team cannot consider information not provided directly in the technical bid (e.g. links to additional website content, references checks, etc.).

2. Mandatory Technical Criteria

Technical bids will be evaluated against the mandatory technical criteria below.

Point Rated Technical Criteria

Technical bids will be evaluated against the point rated technical criteria below.

For a bid to be declared responsive to the solicitation requirements it must meet or exceed the minimum weighted points required for the point rated technical criteria. Bids that do not meet or exceed the minimum weighted points required for the point rated technical criteria will be given no further evaluation.

Each point rated technical evaluation criterion has a weight that reflects its importance in the proposal submission. The degree to which the proposal satisfies the requirement of each criterion will be assessed and a score will be assigned ranging from 0 to 10 as outlined under the 4. Generic Evaluation Criteria, with 0 meaning the proposal completely fails to satisfy the requirements, and 10 meaning the proposal fully meets the outlined criterion. This score will then be multiplied by the weight indicated for that point rated evaluation criterion. Evaluation board members will individually evaluate the technical bid(s) and will rate each criterion using the Generic Evaluation Criteria. The evaluation board will then reach consensus on a final evaluated score for the technical bid(s). When reaching consensus on a final evaluated score for the technical board may award an odd number of points.
