### **Amendment 004**

#### **This amendment is raised to answer received questions:**

Question 1:

If the technicians hold multiple certificates of qualifications can they be a candidate for multiple divisions:  
ie: gas technician and Hvac technician?

Answer 1:

Yes.

Question 2:

2.1.12 are the costs of the materials and labour for pressure relief devices to be included in the base contract? If so, please confirm if this is on refrigerant systems and/or boilers and pressure vessels.

Answer 2:

Yes, as per 2.1.12 replace pressure relief valves as per TSSA's recommendations.

This applies to the Refrigerant system, boilers and pressure vessels.

Question 3

Is a comprehensive list with details on all pressure relief devices in question available including dates last replaced?

Answer 3:

Inventory list is attached.

Question 4

Is sub-contracting allowable?

Answer 4:

Yes.

Question 5

Who is the incumbent contractor?

Answer 5:

PSPC is the main responsible at this point. All maintenance and repairs are done via the O&M rotation list and no contractors are directly responsible at this point. Everything is managed by PSPC site team.

Question 6:

Please clarify Annex A, clause 2.2.3 what controls systems is this referring to?

Answer 6:

The controls on the mechanical equipment itself for its own operation. It does not include the Building Automation Control System.

Question 7:

When is the contract slated to be awarded?

Answer 7:

Contract will be awarded at the completion of evaluations, once the successful responsive bidder has been revealed.

Question 8:

When is the contract expected to start?

Answer 8:

The contract is expected to start for April 1, 2022.

Question 9:

Appendix A-HP-4 work description under service states that " This position is to be manned on a part time basis of 3 days a week for approximately 4hrs." is this the maximum amount of time that the class 4 stationary engineer would be required to be on-site?

Answer 9:

This is the minimum estimated time. The Engineer must be on site Monday, Wednesday and Friday for about 4 hr for each day in the plant. An exact amount of hours can't be predicted.

Question 10:

We seek clarity on language included within Annex A – Statement of Work for Maintenance Service for Mechanical Equipment. The items within Section 2.1 (1 to 22) seem to suggest that all costs for service calls are to be included in the contract (comprehensive maintenance and repair), however, in 2.2.1.15 it outlines that any repairs that are not listed in parts 2 to 14 of this section are to be treated as extras to the contract. As such, there appears to be a contradiction and certainly some confusion as to how proponents should determine what is extra to the agreement.

Could PWGSC please provide examples of repairs that would be extra to the agreement so that proponents can get a better understanding of expectations around the deliverables of the contract?

Answer 10:

All points listed in section 2.1 and 2.2.1 are to be included in the firm prices of the contract. Any repairs not listed in those sections would be billed at the hourly rate set out in Pricing Schedule 2.
