AMENDMENT 001

TITLE : Maintenance of generator sets at 101 Champlain blvd., Quebec City

Included in the present amendment:

1. Questions and answers

QUESTIONS AND ANSWERS:

Question 1: At article 1.23.5 of the statement of work, it is requested to have the category "1.8 Installation of petroleum equipment" of the RBQ license to comply with your requirements. Is this category really required and mandatory? On the RBQ website, in the description of subcategory 1.8 Petroleum equipment installation contractor, it is mentioned that to carry out maintenance and repair work, this category is not necessary. Normally, companies with this category specialize in the installation and replacement of gas tanks and not in the maintenance of generators.

Answer 1: Indeed, it is not necessary to hold such a license to maintain generators. However, we ask that the contractor holds it for inspections involving petroleum equipment. If a subcontractor is used to carry out these inspections, the company you are dealing with must also have the license. Proof of possession of this licence must be provided on the Departmental Representative's request.

Question 2: At article 1.23.6 of the statement of work, it is stipulated that the technicians must possess the Veeder-Root qualification. Is this a requirement because Veeder-Root products are related to gas station equipment?

Answer 2: At article 1.23.6 of the statement of work, when we talk about qualification, we mean that technicians must have knowledge on Veeder-Root equipment maintenance and not have a specific qualification.

Question 3: Can you confirm that no bid bonds, performance bonds or wages, materials and labor are required?

Answer 3: No guarantee or bid bond is requested for this invitation to tender.

***** All other clauses and conditions remain unchanged *****
