The amendment to the bid solicitation is to address the enquiries received:

Response(s) (R) to Question(s) (Q):

Q1. In the Table 3 for Nonylphenol and its ethoxylates, labeled surrogates for quantification are indicated as seen below.

Labeled surrogate for quantification
13C6-NP
13C6-4-NP2EO

However, the normalised method ASTM D7485-16 that exist for quantitating those compounds does not use label compounds.

Could it be possible to have more details about the method you require?

R1. This work requires an analytical method that uses isotope dilution techniques to quantify the analytes. These techniques require the use of the listed labeled surrogates or equivalents.

All other terms and conditions of the Bid Solicitation remain the same.
