

The purpose of this amendment is to answer questions posed by Industry.

Question 1:

Please confirm that industry's answers to the RFI will be treated as commercially sensitive and will not be shared outside of Government of Canada (GoC).

Answer 1:

Interested suppliers are encouraged to provide any information or feedback that will assist Canada in completing the OA phase of the procurement. In the event there is any information considered to be sensitive or proprietary in nature, we ask that this information be highlighted in your response to the RFI as indicated in section 1.6. Once identified, Canada will treat this information as commercial confidential, and the provided information will not be shared outside of the GoC as indicated in section 1.7. Except for information that is marked as sensitive or proprietary, the information gathered from the responses may be summarized and provided to all stakeholders, where the confidentiality of each participant's response will be maintained. Canada may edit a response or request that the participant edit it so that the proprietary nature of the questions and responses is eliminated, and the enquiry can be answered in summary of feedback document that Canada may post on buyandsell.gc.ca.
