**CCGS JOHN CABOT HOT WATER TANKS
SOLICITATION AMENDMENT 004**

The Solicitation Amendment 004 is being raised to answer a set of questions (Section A) and modify the bid solicitation (Section B), which includes a solicitation period extension, as follows:

- I. add NEWHT material alternatives;
- II. add connection dimensions; and
- III. add a maximum delivery date.

A. Questions and Answers:

5. Question:

At page 27 of 36 of the bid solicitation, at paragraph 3.1.3. you mention:

"Each NEWHT assembly must be heavy-duty cement lined carbon steel."

Can we supply Stainless Steel 316L for the NEWHT assembly instead of carbon steel?

Answer:

Yes, see modifications Number 13 and 15

6. Question:

At page 27 of 36 of the bid solicitation, at paragraph 3.1.10. you mention:

"Each NEWHT assembly must have a 0.75 inch NPT safety relief valve connection mounted on the side or the top."

As per the manufacturer's Piping and Instrumentation Diagram, it shows a 0.5 inch NPT connection. Please advise if the safety relief valve connection is 0.75 inch NPT or 0.5 inch NPT?

Answer:

The existing galvanized electric water heater tanks are fitted with a 0.5 inch NPT safety relief valve connection.

7. Question:

At page 27 of 36 of the bid solicitation, at paragraph 3.1.11. you mention:

"Each NEWHT assembly must have a 0.75 inch NPT drain connection mounted on the on the low side, or mounted on the bottom preferably."

As per the manufacturer's Piping and Instrumentation Diagram, it shows a 1.25 inch NPT connection. Please advise if the drain connection is 0.75 inch NPT or 1.25 inch NPT?

Answer:

The existing galvanized electric water heater tanks are fitted with a 1.25 inch NPT drain connection.

See modification Number 14

8. Question:

At page 27 of 36 of the bid solicitation, at paragraph 3.2.3. you mention:

"Each NEWHT assembly must be equipped with the following controls:

- a. magnetic contactor(s);
- b. operating thermostat; and
- c. safety high-temperature cut-out thermostat with manual reset."

The magnetic contactors are inside the electrical control panel (if you order a complete set of NEWHT assemblies, the electrical control panel is not included) and the magnetic contractors come only as spare items. So, should we include the magnetic contactors together with a complete set of NEWHT assemblies as well?

Answer:

Yes, the magnetic contactors form part of the associated equipment.

9. Question:

At page 28 of 36 of the bid solicitation, at paragraph 5.1.1. (b) you mention:

"The following minimum spare parts, components, consumables, etc.:

- i. 2 immersion electric heating elements;
- ii. 1 complete set of replacement gaskets;
- iii. 1 complete set of replacement O-rings;
- iv. 1 magnetic contactor;
- v. 1 operating thermostat;
- vi. 1 safety relief valve;
- vii. 1 safety high-temperature cut-out thermostat with manual reset;
- and
- viii. if an anode is required, 2 anodes."

The supplier can supply the items and not include replacement gaskets and replacement O-rings. Does this work for you?

Answer:

If the NEWHT assemblies and the associated equipment doesn't include any gasket or O-ring, yes.

If the NEWHT assemblies and the associated equipment include gaskets or O-rings, no.

10. Question:

Delivery takes about 22 weeks upon order and 18 months warranty after delivery. Does this work for you?

Answer:

No, see modifications Number 11 and 12

The warranty period is in accordance with Section 9 - Warranty, of General Conditions 2010A (2021-12-02), Goods - Medium Complexity.

B. Modifications

10. At page 1 of 1, Section "Solicitation Closes - L'invitation prend fin"
