This Amendment 002 is raised to address a question.

**Q1.** The Indigenous Participation Requirement in the ITT notes that, "The IPR must include work opportunities through the provision of goods, services, training, employment, apprenticeship or sub-contracting. Opportunities must contribute directly to the performance of the Work being procured." Can you elaborate on the types of training that would fall within the parameters of this IPR and count towards the 7% of contract value requirement.

**A1.** Canada directs the bidder to refer to the IPR for specific details and associated contact information. Examples of IPR components related to training that would be considered applicable to the scope of this project are (but are not limited to):

- Direct employment of community members and provision of safety equipment required for completion of the work
- Training related to construction, remedial excavation, and environmental management of contaminated sites
- Training related to certification for heavy equipment operation
- Safety Training Courses related to construction sites and contaminated sites
- First Aid Training
- Training Related to Career Development in construction, remedial excavation and management of contaminated sites
- Work Experience Training Workshops to provide community members information on careers related to the remediation and management of contaminated sites

**All other terms and conditions remain unchanged.**
