Description of Work:
Innovation, Science and Economic Development Canada has a requirement for one (1) English Application SW Architect Level 3 and one (1) English Technical Architect Level 3 to support the Centre of Excellence in their Salesforce initiatives.
Duties and deliverables may include but are not be limited to the following:

Senior Application/Software Architect

- Translate business requirements into an architected solution;
- Propose best approach to configure solution optimizing for performance and cost efficiencies;
- Design solution architecture to span multiple-org Salesforce platforms and support solution integration
- Design solution architecture to optimize solution performance and build to scale
- Clearly articulate design considerations including defining solution risk/benefit analysis
- Produce documentation such as solution design documents, options analysis, configuration standards;
- Lead solution design sessions, architect and document solutions;
- Recommend industry best practices to technology and business stakeholders;
- Provide knowledge transfer and coaching to Centre of Excellence (CoE) team members through documentation and information sessions including hands-on assistance to developers, business analysts, user interface designers, and other relevant team members; and
- Provide updates/status reporting to project team management as required.
- Present proposed solution architecture for approval to Departmental Management and Executive Committees as required

Senior Technical Architect

- Produce documentation such as development standards, architectural design, gap analysis between current and desired end state;
- Mentor and coach development team to use approved standards and techniques, including code reviews;
- Complete options analysis/research for complex system integration with Salesforce and existing/potential business systems and provide recommendations, including data management and the risk and ranking of Salesforce adoption;
- Provide technical input to ensure system wide consistency of design, optimization of system performance , and overall system scalability and maintainability;
- Review security requirements such as SSO (Single Sign-On) and data security, and provide strategies to implement the solution; and
- Provide updates/status reporting to project team management as required.

- Bidders must submit a bid for all resource categories
- The work is currently being performed by Lumina IT Inc.
