## **IMPORTANT NOTICE TO BIDDERS**

### **Security**

This notice is to advise ALL interested bidders that in order to be awarded a contract which contains a security requirement, all bidders MUST hold a valid Security Clearance granted or approved by PWGSC Canadian Industrial Security Directorate (CISD) at the level indicated in this solicitation document. Should the bidder not currently hold a valid Security Clearance or require the level to be upgraded, PWGSC will sponsor the bidder. Please submit your written request with the following information to Lynn Grogan by e-mail to [Lynn.Grogan@tpsgc-pwgsc.gc.ca](mailto:Lynn.Grogan@tpsgc-pwgsc.gc.ca).

- Legal Company Name
- Mailing address
- Surname and given name of contact person
- Telephone number of contact person
- Title of contact person
- Facsimile number
- E-mail address of contact person
- Procurement Business Number
- Preferred Language of correspondence
- Level of Security Required

Additional information on PWGSC security can be found on the following website:  
<http://ssi-iss.tpsgc-pwgsc.gc.ca> or by dialing 1-866-368-4646 (Toll free).

### **Support the use of apprentices**

Through Canada's Economic Action Plan 2013, the Government of Canada proposes to support the employment of apprentices in federal construction and maintenance projects. To support this initiative, a voluntary certification signaling the Contractor's commitment to hire and train apprentices is available at Annex F.

## PART 1 - GENERAL INFORMATION

### 1.1 Introduction

The bid solicitation is divided into seven parts plus attachments and annexes, as follows:

- Part 1 General Information: provides a general description of the requirement;
- Part 2 Bidder Instructions: provides the instructions, clauses and conditions applicable to the bid solicitation;
- Part 3 Bid Preparation Instructions: provides Bidders with instructions on how to prepare their bid;
- Part 4 Evaluation Procedures and Basis of Selection: indicates how the evaluation will be conducted, the evaluation criteria that must be addressed in the bid, and the basis of selection;
- Part 5 Certifications and Additional Information: includes the certifications and additional information to be provided;
- Part 6 Security, Financial and Other Requirements: includes specific requirements that must be addressed by Bidders; and
- Part 7 Resulting Contract Clauses: includes the clauses and conditions that will apply to any resulting contract.

The Annexes include the Statement of Work, the Security Requirements Checklist, the Electronic Payment Instruments, COVID-19 Vaccination Requirement Certification, Cost Estimate Form for Extra Work and the Voluntary Certification to Support the Use of Apprentices.

### 1.2 Summary

- 1.2.1 To provide maintenance services on the Emergency Electrical Power Supply Systems, to ensure the integrity and uninterrupted performance of the systems, including all necessary tools, services, consumable items, materials, travel and labour on equipment in accordance with the Statement of Work attached herein as Annex A. This requirement is for Public Work and Government Services Canada located at Shirley's Bay, 3701 Carling Avenue, Ottawa, Ontario, K2K 0Y1.

The period of any resulting Contract will be for a period of five (5) years.

- 1.2.2 There are security requirements associated with this requirement. For additional information, consult Part 6 - Security, Financial and Other Requirements, and Part 7 - Resulting Contract Clauses. For more information on personnel and organization security screening or security clauses, Bidders should refer to the [Contract Security Program](http://www.tpsgc-pwgsc.gc.ca/esc-src/introduction-eng.html) of Public Works and Government Services Canada (<http://www.tpsgc-pwgsc.gc.ca/esc-src/introduction-eng.html>) website.
- 1.2.3 The requirement is subject to the provisions of the World Trade Organization Agreement on Government Procurement (WTO-AGP), the Canada-European Union Comprehensive Economic and Trade Agreement (CETA), Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP) and the Canadian Free Trade Agreement (CFTA).
- 1.2.4 There is a **mandatory site visit** associated with this requirement where personnel security screening is required prior to gaining access to PROTECTED information, assets or sites. Consult Part 2 – Bidder Instructions.

1.2.5 This bid solicitation allows bidders to use the epost Connect service provided by Canada Post Corporation to transmit their bid electronically. Bidders must refer to Part 2 entitled Bidder Instructions, and Part 3 entitled Bid Preparation Instructions, of the bid solicitation, for further information.

### **1.3 Debriefings**

Bidders may request a debriefing on the results of the bid solicitation process. Bidders should make the request to the Contracting Authority within 15 working days from receipt of the results of the bid solicitation process. The debriefing may be in writing, by telephone or in person.

### **1.4 COVID-19 Vaccination Requirement**

This requirement is subject to the COVID-19 Vaccination Policy for Supplier Personnel. Failure to complete and provide the COVID-19 Vaccination Requirement Certification as part of the offer will render the offer non-responsive.

## PART 2 - BIDDER INSTRUCTIONS

### 2.1 Standard Instructions, Clauses and Conditions

All instructions, clauses and conditions identified in the bid solicitation by number, date and title are set out in the [Standard Acquisition Clauses and Conditions Manual](https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual>) issued by Public Works and Government Services Canada.

Bidders who submit a bid agree to be bound by the instructions, clauses and conditions of the bid solicitation and accept the clauses and conditions of the resulting contract.

The [2003](#) (2020-05-28) Standard Instructions - Goods or Services - Competitive Requirements, are incorporated by reference into and form part of the bid solicitation.

Subsection 5.4 of [2003](#), Standard Instructions - Goods or Services - Competitive Requirements, is amended as follows:

Delete: 60 days  
Insert: 120 days

### 2.2 Submission of Bids

Bids must be submitted only to Public Works and Government Services Canada (PWGSC) Bid Receiving Unit by the date, time and place indicated in the bid solicitation.

Note: For bidders choosing to submit using epost Connect for bids closing at the Bid Receiving Unit in the National Capital Region (NCR) the email address is:

[tpsgc.dgareceptiondessoumissions-abbidreceiving.pwgsc@tpsgc-pwgsc.gc.ca](mailto:tpsgc.dgareceptiondessoumissions-abbidreceiving.pwgsc@tpsgc-pwgsc.gc.ca)

Note: Bids will not be accepted if emailed directly to this email address. This email address is to be used to open an epost Connect conversation, as detailed in Standard Instructions [2003](#), or to send bids through an epost Connect message if the bidder is using its own licensing agreement for epost Connect.

Due to the nature of the bid solicitation, bids transmitted by facsimile to PWGSC will not be accepted.

### 2.3 Former Public Servant

Contracts awarded to former public servants (FPS) in receipt of a pension or of a lump sum payment must bear the closest public scrutiny, and reflect fairness in the spending of public funds. In order to comply with Treasury Board policies and directives on contracts awarded to FPSs, bidders must provide the information required below before contract award. If the answer to the questions and, as applicable the information required have not been received by the time the evaluation of bids is completed, Canada will inform the Bidder of a time frame within which to provide the information. Failure to comply with Canada's request and meet the requirement within the prescribed time frame will render the bid non-responsive.

## Definitions

For the purposes of this clause, "former public servant" is any former member of a department as defined in the [Financial Administration Act](#), R.S., 1985, c. F-11, a former member of the Canadian Armed Forces or a former member of the Royal Canadian Mounted Police. A former public servant may be:

- a. an individual;
- b. an individual who has incorporated;
- c. a partnership made of former public servants; or
- d. a sole proprietorship or entity where the affected individual has a controlling or major interest in the entity.

"lump sum payment period" means the period measured in weeks of salary, for which payment has been made to facilitate the transition to retirement or to other employment as a result of the implementation of various programs to reduce the size of the Public Service. The lump sum payment period does not include the period of severance pay, which is measured in a like manner.

"pension" means a pension or annual allowance paid under the [Public Service Superannuation Act](#) (PSSA), R.S., 1985, c. P-36, and any increases paid pursuant to the [Supplementary Retirement Benefits Act](#), R.S., 1985, c. S-24 as it affects the PSSA. It does not include pensions payable pursuant to the [Canadian Forces Superannuation Act](#), R.S., 1985, c. C-17, the [Defence Services Pension Continuation Act](#), 1970, c. D-3, the [Royal Canadian Mounted Police Pension Continuation Act](#), 1970, c. R-10, and the [Royal Canadian Mounted Police Superannuation Act](#), R.S., 1985, c. R-11, the [Members of Parliament Retiring Allowances Act](#), R.S. 1985, c. M-5, and that portion of pension payable to the [Canada Pension Plan Act](#), R.S., 1985, c. C-8.

## Former Public Servant in Receipt of a Pension

As per the above definitions, is the Bidder a FPS in receipt of a pension? **Yes ( ) No ( )**

If so, the Bidder must provide the following information, for all FPSs in receipt of a pension, as applicable:

- a. name of former public servant;
- b. date of termination of employment or retirement from the Public Service.

By providing this information, Bidders agree that the successful Bidder's status, with respect to being a former public servant in receipt of a pension, will be reported on departmental websites as part of the published proactive disclosure reports in accordance with [Contracting Policy Notice: 2019-01](#) and the [Guidelines on the Proactive Disclosure of Contracts](#).

## Work Force Adjustment Directive

Is the Bidder a FPS who received a lump sum payment pursuant to the terms of the Work Force Adjustment Directive? **Yes ( ) No ( )**

If so, the Bidder must provide the following information:

- a. name of former public servant;
- b. conditions of the lump sum payment incentive;
- c. date of termination of employment;
- d. amount of lump sum payment;
- e. rate of pay on which lump sum payment is based;
- f. period of lump sum payment including start date, end date and number of weeks;
- g. number and amount (professional fees) of other contracts subject to the restrictions of a work force adjustment program.

## 2.4 Enquiries - Bid Solicitation

All enquiries must be submitted in writing to the Contracting Authority no later than ten (10) calendar days before the bid closing date. Enquiries received after that time may not be answered.

Bidders should reference as accurately as possible the numbered item of the bid solicitation to which the enquiry relates. Care should be taken by Bidders to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the question(s) or may request that the Bidder do so, so that the proprietary nature of the question(s) is eliminated and the enquiry can be answered to all Bidders. Enquiries not submitted in a form that can be distributed to all Bidders may not be answered by Canada.

## 2.5 Applicable Laws

Any resulting contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

Bidders may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their bid, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the Bidders.

## 2.6 Mandatory Site Visit

Due to the nature of this requirement and in order to gain access to the site, **it is MANDATORY that all interested bidders submit the Names (legal name) and birth dates of their representatives that will be attending the Mandatory Site Visit to the Contracting Authority email at [Lynn.Grogan@tpsgc-pwgsc.gc.ca](mailto:Lynn.Grogan@tpsgc-pwgsc.gc.ca) no later than May 12, 2022 at 1:00 pm EDT. It is recommended that two names for each attending contractor be submitted as substitutes will not be accepted.**

**It is mandatory that the Bidder or a representative of the Bidder visit the work site. Arrangements have been made for the site visit to be held at Shirley's Bay, 3701 Carling Ave, Ottawa, Ontario, K2K 0Y1 on May 18, 2022. The site visit will begin at 10:00 am EDT and will be held at the main entrance.**

Personnel security screening is required prior to gaining authorized access to secure worksites. The Bidder's Company Security Officer (CSO) must ensure that their representatives hold a valid security clearance at the required level for the site visit. Failure to comply with the security requirements will result in the representative(s) being denied access to the site.

This site visit is subject to the COVID-19 Vaccination Policy for Supplier Personnel. The person(s) who attend must be fully vaccinated against COVID-19, or, for personnel that are unable to be vaccinated due to a certified medical contraindication, religion or other prohibited grounds of discrimination under the Canadian Human Rights Act, subject to accommodation and mitigation measures that have been presented to and approved by Canada.

Bidders must communicate with the Contracting Authority (Lynn Grogan) no later than May 12, 2022 at 1:00 pm EDT to confirm attendance and provide the name(s) of the person(s) holding a valid security clearance at the required level who will attend. Bidders must also complete and submit the following certification:

### COVID-19 Vaccination Requirement Certification

I, \_\_\_\_\_ (first and last name), as the representative of  
\_\_\_\_\_ (name of business) pursuant to  
\_\_\_\_\_ (insert solicitation number), warrant and certify that all  
personnel that will attend this site visit on this business' behalf are:

- (a) fully vaccinated against COVID-19; or
- (b) for personnel that are unable to be vaccinated due to a certified medical contraindication, religion or other prohibited grounds of discrimination under the Canadian Human Rights Act, subject to accommodation and mitigation measures that have been presented to and approved by Canada.

I certify that all personnel that will attend on behalf of \_\_\_\_\_ (name of business) have been notified of the vaccination requirements of the Government of Canada's COVID-19 Vaccination Policy for Supplier Personnel, and that the \_\_\_\_\_ (name of business) has certified to their compliance with this requirement.

I certify that the information provided is true as of the date indicated below and will continue to be true for the duration of the site visit. I understand that the certifications provided to Canada are subject to verification at all times. Canada reserves the right to request additional information to verify the certifications at all times. I also understand that Canada will declare a bid non-responsive or a contractor in default, if a certification is found to be untrue, whether made knowingly or unknowingly.

Signature: \_\_\_\_\_  
Date: \_\_\_\_\_

Information you provide on this Certification Form and in accordance with the Government of Canada's COVID-19 Vaccination Policy for Supplier Personnel will be protected, used, stored and disclosed in accordance with the Privacy Act. Please note that you have a right to access and correct any information on your file, and you have a right to file a complaint with the Office of the Privacy Commissioner regarding the handling of your personal information. These rights also apply to all individuals who are deemed to be personnel for the purpose for the Contract and who require access to federal government workplaces where they may come into contact with public servants.

**Bidders who do not confirm attendance, provide the name(s) of the person(s) who will attend, or who do not complete and submit the above certification as required will not be allowed access to the site.** Bidders will be required to sign an attendance sheet. Bidders should confirm in their bid that they have attended the site visit. Bidders who do not attend the mandatory site visit or do not send a representative will not be given an alternative appointment and their bid will be declared non-responsive. Any clarifications or changes to the bid solicitation resulting from the site visit will be included as an amendment to the bid solicitation.

#### 2.6.1 Additional restrictions will include:

- must not have symptoms of COVID-19
- must respect physical distancing measures while on site.

#### ***The following mandatory health and safety protection is to be worn by all visitors:***

- Work boots (Steel Toe)
- Hard hat
- Safety vest
- Face masks due to COVID

To learn more about COVID-19, visit the Public Health Agency of Canada:

<https://www.canada.ca/en/public-health/services/diseases/coronavirus-disease-covid-19.html>

Bidders who do not comply will not be permitted to attend the site visit.

## 2.7 Bid Challenge and Recourse Mechanisms

- (a) Several mechanisms are available to potential suppliers to challenge aspects of the procurement process up to and including contract award.
- (b) Canada encourages suppliers to first bring their concerns to the attention of the Contracting Authority. Canada's [Buy and Sell](#) website, under the heading "[Bid Challenge and Recourse Mechanisms](#)" contains information on potential complaint bodies such as:
- Office of the Procurement Ombudsman (OPO)
  - Canadian International Trade Tribunal (CITT)
- (c) Suppliers should note that there are **strict deadlines** for filing complaints, and the time periods vary depending on the complaint body in question. Suppliers should therefore act quickly when they want to challenge any aspect of the procurement process.

## **PART 3 - BID PREPARATION INSTRUCTIONS**

### **3.1 Bid Preparation Instructions**

Canada requests that the Bidder submits its bid in accordance with section 08 of the 2003 standard instructions. The epost Connect system has a limit of 1GB per single message posted and a limit of 20GB per conversation.

The bid must be gathered per section and separated as follows:

Section I: Technical Bid (1 soft copy epost)  
Section II: Financial Bid (1 soft copy epost)  
Section III: Certifications (1 soft copy epost)  
Section IV: Additional Information (1 soft copy epost)

Due to the nature of the bid solicitation, bids transmitted by facsimile will not be accepted.

Prices must appear in the financial bid only. No prices must be indicated in any other section of the bid.

#### **Section I: Technical Bid**

In their technical bid, Bidders should demonstrate their understanding of the requirements contained in the bid solicitation and explain how they will meet these requirements. Bidders should demonstrate their capability in a thorough, concise and clear manner for carrying out the work.

The technical bid should address clearly and in sufficient depth the points that are subject to the evaluation criteria against which the bid will be evaluated. Simply repeating the statement contained in the bid solicitation is not sufficient. In order to facilitate the evaluation of the bid, Canada requests that Bidders address and present topics in the order of the evaluation criteria under the same headings. To avoid duplication, Bidders may refer to different sections of their bids by identifying the specific paragraph and page number where the subject topic has already been addressed.

#### **Section II: Financial Bid**

Bidders must submit their financial bid in accordance with the Pricing Schedule detailed below in Canadian funds. The total amount of Applicable Taxes are excluded.

The following requirement must be strictly adhered to. Failure to do so will render the bidders' proposal as non-responsive.

It is mandatory that bidders submit firm prices/rates for the period of the Contract for all items listed hereafter.

**Pricing Schedule 1 - Firm Price**

**Submit** a firm all-inclusive prices including all necessary tools, equipment and services, consumable materials, labour for all inspections, transportation, testing, cleaning, maintenance services as detailed in Annex A, Statement of Work, attached herein, in Canadian funds.

Building: Shirley's Bay  
Address: 3701 Carling Avenue, Ottawa, Ontario

Pricing Schedule 1					
Description	Year 1	Year 2	Year 3	Year 4	Year 5
Power Generator Set and its associated equipment, components and parts as per Part 3 Equipment Inventory in Annex A, Statement of Work.	\$	\$	\$	\$	\$
<b>Subtotal per Year</b>	\$	\$	\$	\$	\$
<b>Total for 5 Years</b>	\$				

**IN THE CASE OF ERROR IN THE EXTENSION OF PRICES, THE UNIT PRICE WILL GOVERN. CANADA MAY ENTER INTO CONTRACT WITHOUT NEGOTIATION.**

**Summary of Pricing Schedule 1**

Note: The annual totals from each table will be added together and these totals must be placed in the 'Firm Price' column of each Summary table for each respective year. These annual Firm Price totals must then be divided into Monthly rates and put in the appropriate Firm Monthly Rate space.

Summary of Pricing Schedule 1			
Period	Firm Monthly Rate	Number of months	Annual Firm Price
Year 1	\$	x 12	\$
Year 2	\$	x 12	\$
Year 3	\$	x 12	\$
Year 4	\$	x 12	\$
Year 5	\$	x 12	\$
<b>Total of Pricing Schedule 1</b>			\$

**IN THE CASE OF ERROR IN THE EXTENSION OF PRICES, THE UNIT PRICE WILL GOVERN. CANADA MAY ENTER INTO CONTRACT WITHOUT NEGOTIATION.**

**Pricing Schedule 2: Extra Work – As and When Requested**

Building: Shirley's Bay  
Address: 3701 Carling Avenue, Ottawa, Ontario

Extra work as described in Annex A - PWGSC Statement of Work EJ196-201811, "Extra Work" will be conducted on an "As and When Requested" basis where charges shall be made for actual labour, repair and replacement parts. Estimated quantity of hours per year for extra work is for evaluation purposes only.

When "As and When Requested" work is requested during the contract period, the contractor must complete and submit the Annex E "Cost Estimate Form for Extra Work". Written authorization must be obtained from the Technical Authority prior to conducting any extra work.

**Submit** a Firm All-inclusive Labour Rate (including Overhead, Profit, and all related Costs) in Canadian funds.

**2.1 LABOUR:** Our fixed hourly rate per **Certified Diesel Engine Technician** shall be:

<b>Regular Time:</b> <i>Monday to Friday 06.00 until 18.00</i>	<b>Year 1</b>	<b>Year 2</b>	<b>Year 3</b>	<b>Year 4</b>	<b>Year 5</b>

**2.5 MATERIALS:** Materials will be charged at our laid-down cost plus a mark-up of:

	Year 1	Year 2	Year 3	Year 4	Year 5
<b>Percentage Mark Up</b>	%	%	%	%	%
<b>Estimated Expenditure</b>	\$5,000.00	\$5,000.00	\$5,000.00	\$5,000.00	\$5,000.00
<b>Extended Price:</b>					
<b>SUB-TOTAL:</b>					

\* The Extended Price for materials is calculated by adding the mark-up quoted to the total estimated expenditure (Example: Year 1, \$500.00 estimated expenditure; 10% mark-up quoted = \$500.00 + (\$500.00 x 10%) = \$550.00). The estimated expenditures is for evaluation purposes only.

Parts will be supplied FOB Destination including all delivery charges. The following definitions have been used to arrive at the figures as noted:

i) MARK-UP - The difference between the Contractor's laid-down cost for product and resale price to the Crown. Mark-up includes applicable internal cost allocation by the Contractor such as material handling and general and administrative (G&A) expenses plus profit.

ii) LAID-DOWN COST - The cost incurred by a vendor to acquire a specific product or service for resale to the government. This includes but is not limited to the supplier's invoice price (less trade discounts), plus any applicable charges for incoming transportation, foreign exchange, customs duty and brokerage.

AUTHORIZATION FOR DELIVERY: The consignee shall request delivery of goods/services identified in Pricing Schedule 2, 2.1 to 2.4 (i), (ii), (iii) and 2.5 on an authorization form provided by the Technical Authority.

**TOTAL ASSESSED PROPOSAL PRICE**

**Sum of Basis of Pricing**

<b>Pricing Schedule 1, 1.1, 1.2, 1.3</b>	<b>= Subtotal \$</b>	<b>_____ +</b>
<b>Pricing Schedule 2: 2.1 to 2.4</b>	<b>= Subtotal \$</b>	<b>_____ +</b>
<b>Pricing Schedule 2: 2.5</b>	<b>= Subtotal \$</b>	<b>_____ +</b>
<b>Total assessed proposal price</b>	<b>=</b>	<b>\$ _____</b>

**IN THE CASE OF ERROR IN THE EXTENSION OF PRICES, THE UNIT PRICE WILL GOVERN. CANADA MAY ENTER INTO CONTRACT WITHOUT NEGOTIATION.**

### **3.1.2 Electronic Payment of Invoices – Bid**

If you are willing to accept payment of invoices by Electronic Payment Instruments, complete Annex “C” Electronic Payment Instruments, to identify which ones are accepted.

If Annex “C” Electronic Payment Instruments is not completed, it will be considered as if Electronic Payment Instruments are not being accepted for payment of invoices.

Acceptance of Electronic Payment Instruments will not be considered as an evaluation criterion.

### **Section III: Certifications**

Bidders must submit the certifications and additional information required under Part 5.

### **Section IV: Additional Information**

In Section IV of their bid, bidders should provide:

1. their legal name;
2. their Procurement Business Number (PBN);
3. the name of the contact person (provide also this person’s mailing address, phone and facsimile numbers and email address) authorized by the bidder to enter into communications with Canada with regards to their offer, and any contract that may result from their offer; and
4. for Part 2, article 3, Former Public Servant, of the Request for Proposal: the required answer to each question; and, if the answer is yes, the required information.

## PART 4 - EVALUATION PROCEDURES AND BASIS OF SELECTION

### 4.1 Evaluation Procedures

- (a) Bids will be assessed in accordance with the entire requirement of the bid solicitation including the technical and financial evaluation criteria.
- (b) An evaluation team composed of representatives of Canada will evaluate the bids.

#### 4.1.1 Mandatory Technical Evaluation

##### 4.1.1.1 Submission of Evidence

Submission of Evidence as described at 4.1.1.2 to 4.1.1.7 must be included with the bid at time of solicitation closing. However, if the following is not submitted with the bid by the solicitation closing date, the Contracting Authority will so inform the Bidder and provide the Bidder with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within that time period will render the bid non-responsive.

**The evidence provided by the bidder may be verified.**

##### 4.1.1.2 Certified Diesel Engine Technician or Certified Generator System Technician

To carry out the work on this requirement, the Bidder must provide one (1) **Certified Diesel Engine Technician** OR one (1) **Certified Generator System Technician** to perform maintenance of the Emergency Electrical Power Supply System.

The Bidder must provide the name of the **Certified Diesel Engine Technician** or the **Certified Generator System Technician**:

	First and Last Name
<b>Certified Diesel Engine Technician</b>	
<b>OR</b>	
<b>Certified Generator System Technician</b>	

The following certificates/cards must be provided for the **Certified Diesel Engine Technician** proposed by the Bidder. Each of the certificates/cards must be valid (not expired) as of the bid closing date of this RFP.

- A valid Certificate of Qualification (C of Q) as a Diesel Mechanic (i.e.-automotive mechanic, heavy equipment mechanic, engine service technician) to carry out work as defined by the attached Statement of Work, at Annex A; and
- Have the appropriate training from / by the Original Equipment Manufacturer (OEM) or an established service provider bidding on this solicitation with the appropriate minimum of five years of experience in the related field.

**OR**

The following certificates/cards must be provided for the **Certified Generator System Technician** proposed by the Bidder. Each of the certificates/cards must be valid (not expired) as of the bid closing date of this RFP.

- Possession of a valid and recognized Canadian university or college degree, certificate, license, manufacturer-specific training/certification or professional standing. The university or college must have a provincial or territorial degree-granting status. (exception is made for the EGSA course); and
- Have the appropriate training from / by the OEM or an established service provider bidding on this solicitation with the appropriate minimum of five years of experience in the related field.

#### **4.1.1.3 Certified Petroleum Mechanic**

To carry out the work on this requirement, the Bidder must provide one (1) **Certified Petroleum Mechanic** to perform the maintenance of the Emergency Electrical Power Supply System.

The Bidder must provide the name of the **Certified Petroleum Mechanic**:

	<b>First and Last Name</b>
<b>Certified Petroleum Mechanic</b>	

The following certificates/cards must be provided for the **Certified Petroleum Mechanic** proposed by the Bidder. Each of the certificates/cards must be valid (not expired) as of the bid closing date of this RFP.

- A valid Ontario Petroleum license - PM 3 for above ground systems;

**OR**

- A valid diploma or certification from a recognized post-secondary institution as a PM3 (or equivalent) in the applicable province (other than Ontario and Québec) or territory to install or maintain above and/or underground fuel storage systems.

#### **4.1.1.4 Certified Electrician**

To carry out the work on this requirement, the Bidder must provide one (1) **Certified Electrician** to perform the maintenance of the Emergency Electrical Power Supply System.

The Bidder must provide the name of the **Certified Electrician**.

	<b>First and Last Name</b>
<b>Certified Electrician</b>	

The following certificates/cards must be provided for the **Certified Electrician** proposed by the Bidder. Each of the certificates/cards must be valid (not expired) as of the bid closing date of this RFP.

- A valid Certificate of Qualification (C of Q) in accordance with the provincial or territorial law in which the work is to be performed for each electrician engaged by and sent to site by the Bidder or subcontractor of the Bidder to carry out electrical work as defined by the Electrical Act and undertaken as part of the attached Statement of Work, at Annex A.

#### **4.1.1.5 Certified Transfer Switch Technician**

To carry out the work on this requirement, the Bidder must provide one (1) **Certified Transfer Switch Technician** to perform the maintenance of the Emergency Electrical Power Supply System.

The Bidder must provide the name of the **Certified Transfer Switch Technician**:

	First and Last Name
<b>Certified Transfer Switch Technician</b>	

The following certificates/cards must be provided for the **Certified Transfer Switch Technician** proposed by the Bidder. Each of the certificates/cards must be valid (not expired) as of the bid closing date of this RFP.

- A letter or certificate of training by the Original Equipment Manufacturer (OEM) to install and maintain Transfer Switch (es) identified within the attached Statement of Work in Annex A.

#### **4.1.1.6 Certified Infrared Thermographer**

To carry out the work on this requirement, the Bidder must provide one (1) **Certified Infrared Thermographer** to perform the maintenance of the Emergency Electrical Power Supply System.

The Bidder must provide the name of the **Certified Infrared Thermographer**:

	First and Last Name
<b>Certified Infrared Thermographer</b>	

The following certificates/cards must be provided for the **Certified Infrared Thermographer** proposed by the Bidder. Each of the certificates/cards must be valid (not expired) as of the bid closing date of this RFP.

- A valid certificate of training from an International Electrical Testing Association (NETA) accredited course in Infrared Level II or III Thermography.

#### **4.1.1.7 Additional Training Certificates/Cards**

Valid copies of the following training certificates/cards must be provided for all personnel proposed by the Contractor to carry out the work on this requirement.

All certificates/cards are to be recognized by the Human Resources Skills Development Canada (HRSDC) – Labour Program and/or Workplace Safety & Insurance Board (WSIB) and/or Construction Safety Association of Ontario (CSAO) and/or any other recognized legislative or regulatory body in the Province or territory in which the work is to be performed.

- a valid Confined Space Awareness certificate/wallet card;
- a valid Working at Heights certificate/wallet card;
- a valid First Aid/CPR certificate/wallet card;
- a valid Workplace Hazardous Material Inventory System/Globally Harmonized System; (WHMIS/GHS) certificate/wallet card;
- a valid Asbestos Work Practices Awareness Certificate/wallet card;
- personnel performing work on electrical equipment that is live or may become live must be in possession of a valid Arc Flash Training Certificate/wallet card.

#### **4.1.1.8 Mandatory Employee Experience and Past Performance**

The Bidder must provide evidence for each of its proposed personnel's recent experience by providing **two (2)** similar projects/contracts completed within the last **eight (8) years** prior to the solicitation closing date.

It is mandatory that the personnel has a minimum of **five (5) years' experience within the past eight (8) years** prior to the solicitation closing date in the field of maintenance of Emergency Power Supply systems comparable in size, scope and complexity to the equipment listed in Annex A, Statement of Work, Part 3.

- The Bidder must provide the information using the form below.
- Similar is defined as a comprehensive maintenance service on Emergency Power Supply Systems comparable in size, scope and complexity to the equipment listed in Annex A, Statement of Work, Part 3 Equipment Inventory.
- Past eight (8) years is defined as from January 1, 2014 up to and including the RFP closing date.

In cases where the performance period of the project or contract overlap with or duplicate in part the performance period of another project or contract, the overlapping or duplicate period will only be considered once when calculating the minimum requirement of five (5) years' experience.

#### 4.1.1.10 Company Information

##### **OEM refers to the Original Equipment Manufacturer or the current owner of the OEM.**

A letter(s) from the OEM(s) (Original Equipment Manufacturer) of the equipment detailed below (see also Annex A, Statement of Work) should be submitted with the bid by the bid solicitation closing date. However, if the following is not submitted with the bid by the bid solicitation closing date, the Contracting Authority will so inform the Bidder and provide the Bidder with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within that time period will render the bid non-responsive.

If there is more than one OEM, letters are required from each OEM.

- Transfer Switch – ASCO
- Transfer Switch – Eaton

The letter must confirm that the Bidder:

1. is the OEM; **OR**
2. is an authorized service agent of the OEM; **OR**
3. has a valid sub-contracting agreement with the OEM; **AND**
4. has access to the following in order to, service and maintain the components, sub-systems, systems and integrated systems identified above and within the attached inventory, Annex A, Statement of Work:
  - 4.1 Service and maintenance tools & materials;
  - 4.2 Compatible parts;
  - 4.3 Software;
  - 4.4 Hardware;
  - 4.5 Firmware; **AND**
5. has access to the complete operational and adjustment procedures of the OEM for all components, sub-systems, systems, integrated systems and related equipment identified within the attached inventory. This includes direct access to manufacturer's technical support service and service bulletins.

**The Bidder must also submit a letter(s) issued to the authorized service agent(s) by the OEM(s) confirming the name of the authorized service agent(s).**

#### **AND/OR**

**Should the Bidder not be the OEM or the authorized service agent of the OEM(s) or not have a valid sub-contracting agreement with the OEM for the above noted equipment, a letter(s) from the authorized service agent of the OEM (s) (Original Equipment Manufacturer) of this equipment should be submitted with the bid by the bid solicitation closing date. However, if the following is not submitted with the bid by the bid solicitation closing date, the Contracting Authority will so inform the Bidder and provide the Bidder with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within that time period will render the bid non-responsive.**

If there is more than one OEM, letters are required from each authorized service agent of each OEM.

- Transfer Switches – ASCO
- Transfer Switches - Eaton

The letter must confirm that the Bidder:

1. has a valid sub-contracting agreement with the authorized service agent; **AND**

2. has access to the following in order to, service and maintain the components, sub-systems, systems and integrated systems identified above and within the attached inventory, Annex A, Statement of Work:

- 2.1 Service and maintenance tools & materials;
- 2.2 Compatible parts;
- 2.3 Software;
- 2.4 Hardware;
- 2.5 Firmware; **AND**

3. has access to the complete operational and adjustment procedures of the OEM for all components, sub-systems, systems, integrated systems and related equipment identified within the attached inventory. This includes direct access to manufacturer's technical support service and service bulletins.

**The Bidder must also submit a letter(s) issued to the authorized service agent(s) by the OEM(s) confirming the name of the authorized service agent(s).**

#### **4.1.2 Reference Checks**

In conducting its evaluation of the bids, Canada may, but will have no obligation to contact any or all references supplied by bidders to verify and validate any information submitted by them.

#### **4.1.3 Apprentices**

Apprentices employed by the Contractor must be fully registered in a Tradesman Program related to the services in Annex A, Statement of Work. Apprentices must work, at any time, under the direction of a Journeyman Mechanic. Canada reserves the right to request proof of registration in a Tradesman Program at any time during the term of the contract.

#### **4.2 Basis of selection**

A bid must comply with the requirements of the bid solicitation and meet all mandatory technical evaluation criteria to be declared responsive. The responsive bid with the lowest evaluated price will be recommended for award of a contract.

## PART 5 – CERTIFICATIONS AND ADDITIONAL INFORMATION

Bidders must provide the required certifications and additional information to be awarded a contract.

The certifications provided by Bidders to Canada are subject to verification by Canada at all times. Unless specified otherwise, Canada will declare a bid non-responsive, or will declare a contractor in default if any certification made by the Bidder is found to be untrue, whether made knowingly or unknowingly, during the bid evaluation period or during the contract period.

The Contracting Authority will have the right to ask for additional information to verify the Bidder's certifications. Failure to comply and to cooperate with any request or requirement imposed by the Contracting Authority will render the bid non-responsive or constitute a default under the Contract.

### 5.1 Certifications Required with the Bid

Bidders must submit the following duly completed certifications as part of their bid.

#### 5.1.1 Integrity Provisions - Declaration of Convicted Offences

In accordance with the Integrity Provisions of the Standard Instructions, all bidders must provide with their bid, if applicable, the Integrity declaration form available on the Forms for the Integrity Regime website (<http://www.tpsgc-pwgsc.gc.ca/ci-if/declaration-eng.html>), to be given further consideration in the procurement process.

#### 5.1.2 COVID-19 vaccination requirement certification

In accordance with the COVID-19 Vaccination Policy for Supplier Personnel, all Bidders must provide with their bid, the COVID-19 Vaccination Requirement Certification provided at Annex D to Part 5, to be given further consideration in this procurement process. This Certification incorporated into the bid solicitation on its closing date is incorporated into, and forms a binding part of any resulting Contract.

### 5.2 Certifications Precedent to Contract Award and Additional Information

The certifications and additional information listed below should be submitted with the bid but may be submitted afterwards. If any of these required certifications or additional information is not completed and submitted as requested, the Contracting Authority will inform the Bidder of a time frame within which to provide the information. Failure to provide the certifications or the additional information listed below within the time frame specified will render the bid non-responsive.

#### 5.2.1 Integrity Provisions – Required Documentation

In accordance with the section titled Information to be provided when bidding, contracting or entering into a real property agreement of the [Ineligibility and Suspension Policy](http://www.tpsgc-pwgsc.gc.ca/ci-if/politique-policy-eng.html) (<http://www.tpsgc-pwgsc.gc.ca/ci-if/politique-policy-eng.html>), the Bidder must provide the required documentation, as applicable, to be given further consideration in the procurement process.

#### 5.2.2 Federal Contractors Program for Employment Equity - Bid Certification

By submitting a bid, the Bidder certifies that the Bidder, and any of the Bidder's members if the Bidder is a Joint Venture, is not named on the Federal Contractors Program (FCP) for employment equity "FCP Limited Eligibility to Bid" list available at the bottom of the page of the [Employment and Social Development Canada \(ESDC\) - Labour's](https://www.canada.ca/en/employment-social-development/programs/employment-equity/federal-contractor-program.html#) website (<https://www.canada.ca/en/employment-social-development/programs/employment-equity/federal-contractor-program.html#>).

Canada will have the right to declare a bid non-responsive if the Bidder, or any member of the Bidder if the Bidder is a Joint Venture, appears on the "FCP Limited Eligibility to Bid list at the time of contract award.

## PART 6 - SECURITY, FINANCIAL AND OTHER REQUIREMENTS

### 6.1 Security Requirements

1. Before award of a contract, the following conditions must be met:
  - (a) the Bidder must hold a valid organization security clearance as indicated in Part 7 - Resulting Contract Clauses;
  - (b) the Bidder's proposed individuals requiring access to classified or protected information, assets or sensitive work sites must meet the security requirements as indicated in Part 7 - Resulting Contract Clauses;
  - (c) the Bidder must provide the name of all individuals who will require access to classified or protected information, assets or sensitive work sites;
2. Bidders are reminded to obtain the required security clearance promptly. Any delay in the award of a contract to allow the successful Bidder to obtain the required clearance will be at the entire discretion of the Contracting Authority.
3. For additional information on security requirements, Bidders should refer to the [Contract Security Program](http://www.tpsgc-pwgsc.gc.ca/esc-src/introduction-eng.html) of Public Works and Government Services Canada (<http://www.tpsgc-pwgsc.gc.ca/esc-src/introduction-eng.html>) website.

### 6.2 Employee Information for Security

The Bidder should specify the following information regarding employees proposed in Part 4, Section 4.1.1.2 and 4.1.1.6 (Technical Bid) to provide services against any resulting contract:

LEGAL NAME (First and Last)	DATE OF BIRTH dd-mm-yyyy	CURRENT CLEARANCE HELD

### 6.3 Financial Capability

SACC Manual clause [A9033T](#) (2012-07-16) Financial Capability

### 6.4 Insurance Requirements

#### 6.4.1 Insurance - Proof of Availability Prior to Contract Award

The Bidder must provide a letter from an insurance broker or an insurance company licensed to operate in Canada stating that the Bidder, if awarded a contract as a result of the bid solicitation, can be insured in accordance with the Insurance Requirements specified in Contract at clause 7.13.

If the information is not provided in the bid, the Contracting Authority will so inform the Bidder and provide the Bidder with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within that time period will render the bid non-responsive.

## PART 7 - RESULTING CONTRACT CLAUSES

The following clauses and conditions apply to and form part of any contract resulting from the bid solicitation.

### 7.1 Statement of Work

The Contractor must perform the Work in accordance with the Statement of Work at Annex A.

### 7.2 Standard Clauses and Conditions

All clauses and conditions identified in the Contract by number, date and title are set out in the [Standard Acquisition Clauses and Conditions Manual](https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual>) issued by Public Works and Government Services Canada.

#### 7.2.1 General Conditions

[2035 \(2021-12-02\)](#), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

### 7.3 Security Requirements

**7.3.1** The following security requirements (SRCL and related clauses provided by the Contract Security Program) apply and form part of the Contract.

1. The Contractor/Offeror must, at all times during the performance of the Contract/Standing Offer, hold a valid Facility Security Clearance at the level of **SECRET**, issued by the Contract Security Program (CSP) of the Industrial Security Sector (ISS), Public Works and Government Services (PWGSC).
2. The Contractor/Offeror personnel requiring access to sensitive work site(s) must EACH hold a valid personnel security screening at the level of **SECRET**, granted or approved by the CSP/ISS/PWGSC.
3. Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of the CSP/ISS/PWGSC.
4. The Contractor/Offeror must comply with the provisions of the:
  - a) Security Requirements Check List and security guide (if applicable), attached at Annex B;
  - b) *Industrial Security Manual* (Latest Edition).

### 7.4 Term of Contract

#### 7.4.1 Period of Contract

The period of the Contract is from \_\_\_\_\_ to \_\_\_\_\_ inclusive. *(to be inserted at contract award)*

### 7.5 Authorities

#### 7.5.1 Contracting Authority

The Contracting Authority for the Contract is:

Name: Lynn Grogan  
Title: Supply Specialist  
Public Works and Government Services Canada  
Acquisitions Branch

Solicitation No. - N° de l'invitation  
EJ196-201181/A  
Client Ref. No. - N° de réf. du client  
201181

Amd. No. - N° de la modif.  
File No. - N° du dossier  
fk280.EJ196-201181

Buyer ID - Id de l'acheteur  
fk280  
CCC No./N° CCC - FMS No./N° VME

---

Real Property Contracting Directorate  
140 O'Connor Street, East Tower, 4th Floor  
Ottawa, ON K1A 0S5

Telephone: 613-296-2961  
E-mail address: [Lynn.Grogan@tpsgc-pwgsc.gc.ca](mailto:Lynn.Grogan@tpsgc-pwgsc.gc.ca)

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

**7.5.2 Technical Authority** *"TO BE PROVIDED AT CONTRACT AWARD"*

The Technical Authority for the Contract is:

Name: \_\_\_\_\_  
Title: \_\_\_\_\_  
Organization: \_\_\_\_\_  
Address: \_\_\_\_\_

Telephone: \_\_\_\_ - \_\_\_\_ - \_\_\_\_  
Facsimile: \_\_\_\_ - \_\_\_\_ - \_\_\_\_  
E-mail address: \_\_\_\_\_.

The Technical Authority named above is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

**7.5.3 Contractor's Representative**

The name and particulars of the person to be contacted for general enquiries and follow-up purposes:

Name: \_\_\_\_\_  
Title: \_\_\_\_\_  
Company Name: \_\_\_\_\_  
Address: \_\_\_\_\_

Telephone: \_\_\_\_\_  
Facsimile: \_\_\_\_\_  
Cellular: \_\_\_\_\_  
E-mail: \_\_\_\_\_

**7.6 Proactive Disclosure of Contracts with Former Public Servants**

By providing information on its status, with respect to being a former public servant in receipt of a [Public Service Superannuation Act](#) (PSSA) pension, the Contractor has agreed that this information will be reported on departmental websites as part of the published proactive disclosure reports, in accordance with [Contracting Policy Notice: 2019-01](#) of the Treasury Board Secretariat of Canada.

## 7.7 Payment

### 7.7.1 Limitation of Expenditure

The Contractor will supply the goods and services under the Contract to an estimated total expenditure that must not exceed \$ **(to be determined)** (Applicable Taxes excluded) of which \$ **(to be determined)** (Applicable Taxes excluded) is for goods and/or services enumerated or described in Pricing Schedule 1, and \$ **(to be determined)** (Applicable Taxes excluded) is for additional goods and/or services that may be requested on an "As and When Requested" basis at the prices and/or rates set out in Pricing Schedule 2.

### 7.7.2 Basis of Payment - Firm Prices and "As and When"

In consideration of the Contractor satisfactorily completing all of its obligations under the Contract, the Contractor will be paid firm prices, in accordance with General Conditions 2035 16 (2021-12-02) 'Payment Period' and the following tables. Applicable Taxes are extra, if applicable.

- a) Firm rates will be paid in accordance with Pricing Schedule 1 in twelve (12) equal monthly payments.
- b) "As and When Requested" Work:

Any costs incurred for Extra Work will be paid, in accordance with Pricing Schedule 2 and the Statement of Work, Annex A, on an "as and when requested" basis, after completion, inspection and acceptance of the work performed.

Canada's total liability to the Contractor under the "as and when requested" portion of the Contract must not exceed **(to be determined)**. Applicable Taxes are extra, if applicable.

The Contractor must not perform any work or provide any service that would result in Canada's total liability being exceeded before obtaining the written approval of the Contracting Authority. The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum:

- (a) when it is 75 percent committed, or
- (b) if the Contractor considers that the said sum may be exceeded, the Contractor must promptly notify the Contracting Authority

whichever comes first.

If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority, a written estimate for the additional funds required. Provision of such information by the Contractor does not increase Canada's liability.

Canada will not pay the Contractor for any design changes, modifications or interpretations of the Work, unless they have been approved, in writing, by the Contracting Authority before their incorporation into the Work.

### 7.7.3 (Pricing tables will be inserted at contract award)

### 7.7.4 SACC Manual Clauses

A9117C (2007-11-30) T1204 - Direct Request by Customer Department, apply to and form part of the Contract.

A3015C (2014-06-26) Certifications – Contract

### 7.7.5 Electronic Payment of Invoices – Contract

The Contractor accepts to be paid using any of the following Electronic Payment Instrument(s):

- a. Visa Acquisition Card;
- b. MasterCard Acquisition Card;
- c. Direct Deposit (Domestic and International);
- d. Electronic Data Interchange (EDI);
- e. Wire Transfer (International Only);
- f. Large Value Transfer System (LVTS) (Over \$25M).

### 7.8 Invoicing Instructions - Maintenance Services

The Contractor must submit invoices in accordance with the section entitled "Invoice Submission" of the general conditions along with the monthly maintenance report described in Annex A "the Statement of Work" of the Contract.

Invoices cannot be submitted until all work identified in the invoice has been completed and that all maintenance service call reports related to the Work identified in the invoice have been received by the Technical Authority.

2. The Contractor must distribute the invoices and reports as follows:

- a) The original and two (2) copies of the invoices and maintenance reports must be forwarded to the address shown on page 1 of the Contract for certification and payment.

### 7.9 Certifications and Additional Information

#### 7.9.1 Compliance

Unless specified otherwise, the continuous compliance with the certifications provided by the Contractor in its bid or precedent to contract award, and the ongoing cooperation in providing additional information are conditions of the Contract and failure to comply will constitute the Contractor in default. Certifications are subject to verification by Canada during the entire period of the Contract.

#### 7.10 Applicable Laws

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

#### 7.11 Priority of Documents

If there is a discrepancy between the wording of any documents that appear on the list, the wording of the document that first appears on the list has priority over the wording of any document that subsequently appears on the list.

- (a) the Articles of Agreement;
- (b) the general conditions 2035 (2021-12-02);
- (c) Annex A, Statement of Work;
- (d) Annex B, Security Requirements Check List;
- (e) Annex E, Cost estimate Form for Extra Work;
- (f) the Contractor's bid dated \_\_\_\_\_, *(to insert at the time of contract award)*.

## 7.12 Foreign Nationals (Canadian Contractor)

SACC *Manual* clause [A2000C](#) (2006-06-16) Foreign Nationals (Canadian Contractor)

## 7.13 Insurance Requirements

### 7.13.1 Insurance – Specific Requirements

The Contractor must comply with the insurance requirements specified in the **following article 7.13.2 Commercial General Liability Insurance**. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.

The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.

The Contractor must forward to the Contracting Authority within ten (10) days after the date of award of the Contract, a Certificate of Insurance evidencing the insurance coverage and confirming that the insurance policy complying with the requirements is in force. Coverage must be placed with an Insurer licensed to carry out business in Canada. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

### 7.13.2 Commercial General Liability Insurance

1. The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than \$2,000,000 per accident or occurrence and in the annual aggregate.
2. The Commercial General Liability policy must include the following:
  - a. Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.
  - b. Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.
  - c. Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.
  - d. Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.
  - e. Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

- f. **Blanket Contractual Liability:** The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.
- g. Employees and, if applicable, Volunteers must be included as Additional Insured.
- h. Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)
- i. Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.
- j. Notice of Cancellation: The Contractor will provide the Contracting Authority thirty (30) days prior written notice of policy cancellation or any changes to the insurance policy.
- k. If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.
- l. Owners' or Contractors' Protective Liability: Covers the damages that the Contractor becomes legally obligated to pay arising out of the operations of a subcontractor.
- m. Non-Owned Automobile Liability - Coverage for suits against the Contractor resulting from the use of hired or non-owned vehicles.
- n. Advertising Injury: While not limited to, the endorsement must include coverage piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.
- o. All Risks Tenants Legal Liability - to protect the Contractor for liabilities arising out of its occupancy of leased premises.
- p. Sudden and Accidental Pollution Liability (minimum 120 hours): To protect the Contractor for liabilities arising from damages caused by accidental pollution incidents.
- q. Litigation Rights: Pursuant to subsection 5(d) of the Department of Justice Act, S.C. 1993, c. J-2, s.1, if a suit is instituted for or against Canada which the Insurer would, but for this clause, have the right to pursue or defend on behalf of Canada as an Additional Named Insured under the insurance policy, the Insurer must promptly contact the Attorney General of Canada to agree on the legal strategies by sending a letter, by registered mail or by courier, with an acknowledgement of receipt.

**For the province of Quebec, send to:**

*Director Business Law Directorate,  
Quebec Regional Office (Ottawa),  
Department of Justice,  
284 Wellington Street, Room SAT-6042,  
Ottawa, Ontario, K1A 0H8*

**For other provinces and territories, send to:**

*Senior General Counsel,  
Civil Litigation Section,  
Department of Justice*

*234 Wellington Street, East Tower  
Ottawa, Ontario K1A 0H8*

A copy of the letter must be sent to the Contracting Authority. Canada reserves the right to co-defend any action brought against Canada. All expenses incurred by Canada to co-defend such actions will be at Canada's expense. If Canada decides to co-defend any action brought against it, and Canada does not agree to a proposed settlement agreed to by the Contractor's insurer and the plaintiff(s) that would result in the settlement or dismissal of the action against Canada, then Canada will be responsible to the Contractor's insurer for any difference between the proposed settlement amount and the amount finally awarded or paid to the plaintiffs (inclusive of costs and interest) on behalf of Canada.

**7.14 Cellular Phones**

The Contractor's Foreman or Site Supervisor must be equipped with a cellular phone at all times. All expenses including installation, air time, activating fees, and the cost of the phones themselves, is the responsibility of the Contractor. The Contractor must maintain an uninterrupted communication service.

**7.15 Government Site Regulations**

The Contractor must comply with all regulations, instructions and directives in force on the site where the Work is performed.

**7.16 Pre-Commencement Meeting**

A pre-commencement meeting is mandatory for the Contractor prior to commencing any work and minutes of the meeting will be taken. The time and place of this meeting will be determined by the Technical Authority.

The Contractor is to supply the Technical Authority with a copy of its safety policy as required by the applicable Provincial Occupational Safety and Health Regulations.

**7.17 Voluntary Reports for Apprentices Employed during the Contract**

The Contractor should compile and maintain records on the number of apprentices that were hired to work on the contract and their trade specialty.

The Contractor should provide this data in accordance with the format below. If no apprentices were hired during the contract period, the Contractor should still provide a "nil" report.

The data should be submitted to the Contracting Authority six months after contract award or at the end of the contract, whichever comes first.

<b>Number of apprentices hired</b>	<b>Trade specialty</b>

(Add lines if needed)

## 7.18 Dispute Resolution

- (a) The parties agree to maintain open and honest communication about the Work throughout and after the performance of the contract.
- (b) The parties agree to consult and co-operate with each other in the furtherance of the contract and promptly notify the other party or parties and attempt to resolve problems or differences that may arise.
- (c) If the parties cannot resolve a dispute through consultation and cooperation, the parties agree to consult a neutral third party offering alternative dispute resolution services to attempt to address the dispute.
- (d) Options of alternative dispute resolution services can be found on Canada's Buy and Sell website under the heading "[Dispute Resolution](#)".

## **ANNEX "C" to PART 3 OF THE BID SOLICITATION**

### **ELECTRONIC PAYMENT INSTRUMENTS**

The Bidder accepts to be paid by any of the following Electronic Payment Instrument(s):

- VISA Acquisition Card;
- MasterCard Acquisition Card;
- Direct Deposit (Domestic and International);
- Electronic Data Interchange (EDI);
- Wire Transfer (International Only);
- Large Value Transfer System (LVTS) (Over \$25M)

**ANNEX "D" to PART 5 OF THE BID SOLICITATION**

**COVID-19 Vaccination Requirement Certification**

I, \_\_\_\_\_ (first and last name), as the representative of \_\_\_\_\_ (name of business) pursuant to \_\_\_\_\_ (insert solicitation number), warrant and certify that all personnel that \_\_\_\_\_ (name of business) will provide on the resulting Contract who access federal government workplaces where they may come into contact with public servants will be:

- (a) fully vaccinated against COVID-19;
- (b) for personnel that are unable to be vaccinated due to a certified medical contraindication, religion or other prohibited grounds of discrimination under the Canadian Human Rights Act, subject to accommodation and mitigation measures that have been presented to and approved by Canada; or
- (c) partially vaccinated against COVID-19 for a period of up to 10 weeks from the date of their first dose and subject to temporary measures that have been presented to and approved by Canada, immediately after which period the personnel will meet the conditions of (a) or (b) or will no longer access federal government workplaces where they may come into contact with public servants under this Contract;

until such time that Canada indicates that the vaccination requirements of the COVID-19 Vaccination Policy for Supplier Personnel are no longer in effect.

I certify that all personnel provided by \_\_\_\_\_ (name of business) have been notified of the vaccination requirements of the Government of Canada's COVID-19 Vaccination Policy for Supplier Personnel, and that the \_\_\_\_\_ (name of business) has certified to their compliance with this requirement.

I certify that the information provided is true as of the date indicated below and will continue to be true for the duration of the Contract. I understand that the certifications provided to Canada are subject to verification at all times. I also understand that Canada will declare a contractor in default, if a certification is found to be untrue, whether made knowingly or unknowingly, during the bid or contract period. Canada reserves the right to ask for additional information to verify the certifications. Failure to comply with any request or requirement imposed by Canada will constitute a default under the Contract.

Signature: \_\_\_\_\_  
Date: \_\_\_\_\_

**Optional**

For data purposes only, initial below if your business already has its own mandatory vaccination policy or requirements for employees in place. Initialing below is not a substitute for completing the mandatory certification above.

Initials: \_\_\_\_\_

Information you provide on this Certification Form and in accordance with the Government of Canada's COVID-19 Vaccination Policy for Supplier Personnel will be protected, used, stored and disclosed in accordance with the Privacy Act. Please note that you have a right to access and correct any information on your file, and you have a right to file a complaint with the Office of the Privacy Commissioner regarding the handling of your personal information. These rights also apply to all individuals who are deemed to be personnel for the purpose for the Contract and who require access to federal government workplaces where they may come into contact with public servants.

---

## ANNEX "F"

### VOLUNTARY CERTIFICATION TO SUPPORT THE USE OF APPRENTICES

1. To encourage employers to participate in apprenticeship training, Contractors bidding on construction and maintenance contracts by Public Works and Government Services Canada (PWGSC) are being asked to sign a voluntary certification, signaling their commitment to hire and train apprentices.
2. Canada is facing skills shortages across various sectors and regions, especially in the skilled trades. Equipping Canadians with skills and training is a shared responsibility. In Economic Action Plan (EAP) 2013, the Government of Canada made a commitment to support the use of apprentices in federal construction and maintenance contracts. Contractors have an important role in supporting apprentices through hiring and training and are encouraged to certify that they are providing opportunities to apprentices as part of doing business with the Government of Canada.
3. Through the Economic Action Plan 2013 and support for training programs, the Government of Canada is encouraging apprenticeships and careers in the skilled trades. In addition, the government offers a tax credit to employers to encourage them to hire apprentices. Information on this tax measure administered by the Canada Revenue Agency can be found at: [www.cra-arc.gc.ca](http://www.cra-arc.gc.ca). Employers are also encouraged to find out what additional information and supports are available from their respective provincial or territorial jurisdiction.
4. Signed certifications will be used to better understand contractor use of apprentices on Government of Canada maintenance and construction contracts and may inform future policy and program development.
5. The Contractor hereby certifies the following:

*In order to help meet demand for skilled tradespeople, the Contractor agrees to use, and require its subcontractors to use, reasonable commercial efforts to hire and train registered apprentices, to strive to fully utilize allowable apprenticeship ratios<sup>1</sup> and to respect any hiring requirements prescribed by provincial or territorial statutes.*

The Contractor hereby consents to this information being collected and held by PWGSC, and Employment and Social Development Canada to support work to gather data on the hiring and training of apprentices in federal construction and maintenance contracts.

*Name:  
Signature:  
Company Name:  
Company Legal Name:  
Solicitation Number:*

*Optional information to provide:  
Number of apprentices planned to be working on this contract:  
Trades of those apprentices:*

---

<sup>1</sup> The journeyman-apprentice ratio is defined as the number of qualified/certified journeymen that an employer must employ in a designated trade or occupation in order to be eligible to register an apprentice as determined by provincial/territorial (P/T) legislation, regulation, policy directive or by law issued by the responsible authority or agency.

**PART 1 GENERAL**

**1.1 Definitions**

1.1.1 Actions

- 1.1.1.1 Checking/Check: visual observation to ensure the device or system is in place and is not damaged or obstructed.
- 1.1.1.2 Inspecting/Inspection: physical examination to determine that the device or system will perform in accordance with its intended function.
- 1.1.1.3 Testing/Test: full operation of a device or system to ensure that it will perform in accordance with its intended operation or function.
- 1.1.1.4 Maintaining/Maintenance: routine recurring work; checking, inspecting, testing & service required to keep the components, sub-systems, system and integrated systems as identified in Part 3 – Equipment Inventory, in such condition that they may be continuously utilized, at their original or designed capacity and efficiency for their intended purpose.
- 1.1.1.5 Service: to make fit for use, adjust, or maintain in order to keep the equipment identified in Part 3 – Equipment Inventory, in an operational condition as per their original design intent.
- 1.1.1.6 Service Call: onsite diagnosis and correction made by a qualified person as outlined in 1.4.3 – Service Call.
- 1.1.1.7 Thermographic Survey: performing a survey with thermographic equipment.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 5 of 82

1.1.2 Equipment

1.1.2.1 Thermographic Equipment: Equipment capable of :

- 1) detecting temperature ranges up to 500 Celsius
- 2) showing differential temperature
- 3) producing quality of images of 3 Mega pixel or better
- 4) accuracy of image +/- 2%
- 5) showing on site, the actual event via LCD screen at the request of the Technical Authority
- 6) displaying in Colour
- 7) file type JPEG or BMP for pictures of actual equipment showing, grey and white, Thermal Fusion and normal view on display screen.
- 8) 24 Degree optics as a minimum

1.1.3 Individuals

1.1.3.1 Qualified Person:

- 1) Someone who is in possession of a valid and recognized Canadian university or college degree, certificate, license, manufacturer-specific training/certification or professional standing. The university or college must have a provincial or territorial degree-granting status.

and

- 2) Someone having the appropriate training from/by the OEM or an established service provider bidding on this solicitation.

and

- 3) Someone having the appropriate minimum of experience in the related field.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 6 of 82

- 1.1.3.2 Electrician: someone who is in possession of a valid Certificate of Qualification (C of Q) at the Journeyman level in the province that the work is to be performed.
- 1.1.3.3 Master Electrician: an individual who is licensed under the Ontario Electricity Act, Regulation 570/05-
- 1.1.3.4 Diesel Engine Technician: someone who holds the appropriate minimum three years of experience and training with diesel engines and generator systems, and who is capable of performing the diesel-related tasks described within this Statement of work.

OR

- 1.1.3.5 Certified Generator System Technician: someone who holds a valid and recognized Canadian university or college degree, certificate, license, manufacturer specific training / certification or professional standing. The university or college must have a provincial or territorial degree-granting status. (Exception is made for the EGSA course)

and

- 1.1.3.6 Have the appropriate training from / by the OEM or an established service provider bidding on this solicitation with the appropriate minimum of three years of experience in the related field.
- 1.1.3.7 Petroleum Mechanic: an individual who is in possession of a valid Ontario Petroleum license - PM 2 for underground tank systems or PM 3 for above ground systems.
- 1.1.3.8 Transfer Switch Technician: someone who holds the appropriate minimum five years of experience and training with transfer switches and who is capable of performing the related tasks described within this Statement of work.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 7 of 82

- 1.1.3.9 Infrared Thermographer: an individual who is in possession of an International Electrical Testing Association (NETA) accredited Infrared Level II or III Thermography Certificate.

## **1.2 Codes, Standards, Regulations and Requirements**

### 1.2.1 General

- 1.2.1.1 The Contractor must comply with all Codes, Standards, Regulations and Requirements listed in this section.
- 1.2.1.2 The Contractor must keep within his possession a copy of the most current edition of the applicable Codes, Standards, Regulations and Requirements in force at the time of entering into the Statement of Work for the duration of the Contract.
- 1.2.1.3 In the event that concurrent documents exist, the most stringent set of Codes, Standards, Regulations and Requirements must apply.
- 1.3.1.4 In the event of a change in the Codes, Standards, Regulations and Requirements related to this Statement of Work, the contractor must inform the Technical Authority.

### 1.2.2 National, Provincial and/or Territorial Codes

- 1.2.2.1 National and Provincial, Building Codes - As they pertain to the installation, verification and maintenance of Emergency Power Supply Systems.
- 1.2.2.2 National and Provincial, Fire Codes - As they pertain to the installation, verification and maintenance of Emergency Power Supply Systems.
- 1.2.2.3 National and Provincial, Electrical Safety Codes - As they pertain to the installation, verification and maintenance of Emergency Power Supply Systems.
- 1.2.2.4 National and Provincial, Health & Safety Codes - As they pertain to the works undertaken on site.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 8 of 82

---

1.2.3 Standards

1.2.3.1 Canadian Underwriters Laboratories of Canada (CAN/ULC) Standards

- 1) CAN/ULC/ORD - C58.12.92 - Leak detection devices (volumetric type) for underground flammable liquid storage tanks
- 2) CAN/ULC/ORD - C58.14.92 - Non Volumetric leak detection devices for underground flammable liquid storage tanks.
- 3) CAN/ULC-S1001-11 – Standard for Integrated Systems Testing of Fire Protection and Life Safety

1.2.3.2 Canadian Standards Association (CSA) Standards

- 1) CSA C282 - Emergency electrical power supply for buildings
- 2) CSA Z460 - Control of hazardous energy - Lockout and other methods
- 3) CSA Z462 - Workplace Electrical Safety (Arch Flash Protection)
- 4) CSA-B 139 - Installation code for oil-burning equipment

1.2.3.3 National Fire Protection Association (NFPA) Standards

- 1) NFPA70 B – Recommended practice for electrical equipment maintenance.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

1.2.4 Health and Safety

1.2.4.1 *Canada Labour Code Part II, Canada Occupational Safety and Health Regulations*

1.2.4.2 Health Canada / Workplace Hazardous Materials Information System (WHMIS)

1.2.4.3 Material Safety Data Sheets (MSDS)

1.2.5 Other required Codes, Standards, Regulations and Requirements

1.2.5.1 Canadian Environmental Protection Act (CEPA) 1999 - Canadian Environmental Protection Act 1999, Hazardous Waste Regulation

1.2.5.2 Canadian Environmental Protection Act (CEPA) 2008-197 - Regulations for Storage tank systems for petroleum products and allied petroleum products.

1.2.5.3 Inter-National Electrical Testing Association (NETA) Maintenance and testing specifications for electrical power distribution equipment and systems

1.2.5.4 Canadian Council of Ministers of the Environment (CCME) - PN 1326 - Environmental code of practice for aboveground and underground storage tank systems containing petroleum and allied petroleum products

1.2.5.5 The Technical Standards and Safety Act (TSSA) 2000, Ontario Regulation 215/01 TSSA - Ontario Region Requirement.

1.2.5.6 Provincial

1) Provincial Environmental Protection Act Ex.- Ontario- R.R.O. 1990 Regulation 347 Waste Management.

2) The Ontario Electricity Act 1998 – Ont. Regulation 570/05 Ontario Collage of Trades and Apprenticeship Act 2009 – S.O. 2009,

Page 10 of 82

Chapter 22 Ontario Ministry of Training, Colleges and Universities  
– Trade Certifications.

- 3) Ontario Health and Safety Act and its associated regulations.

### **1.3 Submittals**

#### 1.3.1 Fees, Permits and Certificates

1.3.1.1 Pay all fees and obtain all permits. Provide authorities with plans and information for acceptance certificate. Provide inspection certificates as evidence that work conforms to the requirement of the Authority having Jurisdiction.

#### 1.3.1.2 Electrical Inspection Permits

- 1) The Contractor is responsible to provide electrical inspection permits for all electrical work prior to the electrical work taking place. Refer to the National, Provincial or Territorial electrical codes as per 1.2 – Codes, Standards, Regulations and Requirements.
- 2) If an electrical inspection permit is not required, it is the Contractor's responsibility to provide a letter from the Electrical Safety Authority (ESA) confirming that the contractor is not required to provide electrical inspection permits for that specific work.

#### 1.3.2 Site/Work Specific Implementation Plan

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 11 of 82

---

- 1.3.2.1 The Contractor must submit a detailed, site/work specific, implementation plan to the Technical Authority twenty working days prior to the commencement of work as identified in the Statement of Work.
- 1) The site/work specific, implementation plan must include:
    - a) A detailed site specific, inspection schedule.
    - b) A detailed work plan and Sequence of operation for the Annual inspection including the installation plan for a load bank if applicable.
    - c) The site-Specific Health and Safety Plan.
    - d) Hazardous Waste Management Plan
    - e) Samples of relevant inspection checklists.
    - f) Sample of a relevant Thermographic report.
  - 2) As part of the site/work specific, implementation plan the contractor must perform:
    - a) A site-specific safety hazard assessment;
    - b) A health and safety risk/hazard analysis for site tasks and operations found within the implementation plan.
    - c) A Hazardous Waste Audit.
- 1.3.2.2 The Technical Authority will review Contractor's, site/work specific implementation plan and provide comments to the Contractor within ten working days after the receipt of plan.
- 1.3.2.3 The Contractor must revise the site/work specific implementation plan as appropriate and resubmit the plan to the Technical Authority within ten working days after receipt of comments.
- 1.3.2.4 The Technical Authority's review of the Contractor's detailed site/work specific implementation plan should not be construed as final and does not reduce the Contractor' overall responsibility for providing the personnel required in the implementation plan.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 12 of 82

---

1.3.2.5 The Technical Authority reserves the right to amend the site/work specific implementation plan at any time due to operational requirements and must sign off on all amendments to the plan, in consultation with the Contractor.

1.3.3 Site-Specific Inspection schedule

1.3.3.1 As part of the site/work specific, implementation plan, and every subsequent year after, the Contractor must submit to the Technical Authority a detailed site specific, inspection schedule.

- 1) The schedule must include the additional monthly, semi-annual and annual requirements as defined in Part 2 – Execution.

1.3.3.2 The Technical Authority's review of Contractor's annual detailed inspections schedule should not be construed as final and does not reduce the Contractors' overall responsibility for providing the required personnel on the scheduled inspection dates.

1.3.3.3 The Technical Authority reserves the right to amend the inspection schedule at any time due to operational requirements and must sign off on all amendments to the plan, in consultation with the Contractor.

1.3.3.4 In the event of a cancellation or a rescheduling that affects the completion of the work, if the Contractor has not been provided with a 2 hours cancellation notification prior to the original start time, the Contractor must be paid a maximum of a 3 hour service call as per Pricing Schedule 2, billable hourly rates for each individual sent to site.

1.3.4 Work Plan and Sequence of Operation for the Annual inspection

1.3.4.1 As part of the site/work specific, implementation plan the Contractor must submit to the Technical Authority, a detailed work plan including a sequence of operation for all of the events covered under the Annual inspection. This work plan must include but is not limited to:

- 1) Lockout-Tag out procedures
- 2) Site-Specific Electrical Inspection Procedures

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 13 of 82

- 3) Isolation & Re-energization Procedures
- 4) Spill Containment Procedures
- 5) Quantities of Hazardous Waste Products to be produced during the Annual inspection.

1.3.4.2 The Technical Authority reserves the right to amend the Work Plan at any time due to operational requirements and must sign off on all amendments to the plan, in consultation with the Contractor.

1.3.5 Health and Safety

1.3.5.1 Site-Specific Health and Safety Plan

- 1) As part of the site/work specific, implementation plan, the Contractor must submit to the Technical Authority their site-specific Health and Safety Plan.
- 2) The Health and Safety Plan must include:
  - a) Results of site-specific safety hazard assessment.
  - b) Results of health and safety risk or hazard analysis for site tasks and operations found in work plan.
  - c) The Technical Authority's review of Contractor's final Health and Safety plan should not be construed as approved and does not reduce the Contractor' overall responsibility for Health and Safety.

1.3.5.2 Accident Report

- 1) The Contractor must submit to the Technical Authority within twenty-four hours of incident and/or accident reports of incidents and/or accidents that occur during the term of the Contract.

1.3.5.3 Correction – Health and Safety Issues

- 1) The Contractor must provide the Technical Authority within two working days with written report of action taken to correct non-compliance of Health and Safety issues.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 14 of 82

---

1.3.5.4 Hazardous Material (WHMIS-MSDS)

- 1) The Contractor must submit any and all Workplace Hazardous Materials System (WHMIS) Material Safety Data Sheets (MSDS) for Hazardous Materials used on site to the Technical Authority five working days before such materials are brought to site.

1.3.6 Logbooks

1.3.6.1 The Contractor is responsible for supplying and completing the CSA C282 Logbook or Technical Authority approved equivalent. Logbooks are to be kept in the emergency power supply room. The logbook must be used to record the work performed at each visit and identify parts and materials used.

1.3.6.2 The completed original logbooks must be submitted to the Technical Authority and become the property of Canada.

1.3.7 Inspection Checklists

1.3.7.1 Sample checklists are available from the Technical Authority upon request.

1.3.7.2 The Contractor is responsible for providing and completing the inspection checklists required by this Statement of Work. These inspection checklists must be in conformance with the minimum requirements defined by the applicable Codes, Standards and Regulations.

1.3.7.3 Additional inspections, checks and tests, as identified in Part 2 – Execution, must also be included and recorded on the Contractor's checklists.

1.3.7.4 The inspection checklists must be submitted to and approved by the Technical Authority as part of the site/work specific, implementation plan.

1.3.7.5 The checklists must be used to record the work performed at each inspection and must identify the specific tasks undertaken.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 15 of 82

1.3.7.6 The completed checklists are to be kept in a vinyl hard cover 3 "D" ring type loose leaf binder for 212 mm X 275 mm size paper with the required logbooks in the emergency power supply room.

1.3.7.7 The completed original inspection checklists must be submitted to the Technical Authority and become the property of Canada.

1.3.8 Building Life Safety Compliance Testing Manual

1.3.8.1 Signature of personnel performing any of the identified checks, inspections or tests as outlined in this Statement of Work must be entered into the Building Life Safety Compliance Testing Manual.

1.3.9 Material Removal Records

1.3.9.1 The Contractor must submit to the Technical Authority records for all removals from site, for both materials designated for alternative disposal and general waste as defined by the Canadian Environmental Protection Act (CEPA) 1999, Hazardous Waste Regulation and other applicable provincial, municipal or territorial legislation.

1.3.10 Reports for Tests, Checks, Maintenance and Service

1.3.10.1 Monthly and Semi-Annual Reports

- 1) A detailed and comprehensive signed computerized or hard copy report of the monthly and semi-annual test procedures carried out, must be submitted to the Technical Authority within ten working days following the completion of the inspections, tests, checks, maintenance and service defined within this Statement of Work.
- 2) The report must include the major and minor deficiencies noted during the inspections, tests, checks, maintenance and service defined within this Statement of Work.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 16 of 82

---

1.3.10.2 Annual Report

- 1) A detailed and comprehensive signed computerized or hard copy of the annual inspection report must be submitted to the Technical Authority no later than fifteen working days following the completion of the Annual inspection, tests, checks, maintenance and service.
- 2) The Annual Report must also include :
  - a) Major and minor deficiencies noted during the inspections, tests, checks, maintenance and service.
  - b) The Thermographic Report
  - c) The Liquid Analysis Report
  - d) The Fuel Oil Lab Report

1.3.10.3 Fuel Oil Laboratory Report

- 1) The Contractor must ensure that the laboratory selected meets with the approval of the Technical Authority and is capable of analyzing the quality of the sample as per the requirements identified within the American Society for Testing and Materials (ASTM) Standard D4176 Specification for Diesel Fuel Oils.
- 2) The Contractor must submit a copy of the laboratory certification fifteen days prior to conducting the sample analysis.

1.3.10.4 Thermographic Report

- 1) A detailed and comprehensive signed Thermographic report must be submitted to the Technical Authority with the Annual report. The Thermographic report must:
  - a) Identify deficiencies and defects;
  - b) Include signature in final report;
  - c) Include images and photographs (file type JPEG or BMP) of actual equipment.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON

1.3.10.5 Liquid Analysis Report

- 1) The Contractor must provide a liquid analysis report for the anti-freeze and lubricating oil liquid comparing it against the manufacturer's recommendations. The results must be submitted within the annual report.

1.3.10.6 Fuel Oil Lab Report

- 1) The Contractor must provide a fuel lab report to be submitted with the annual report.

**1.4 General Requirements**

1.4.1 Purpose

1.4.1.1 The maintenance and service of building components, sub-systems, systems and integrated systems is of utmost importance to ensure the successful operation of the installed services and utilities.

1.4.1.2 The maintenance must not be considered completed until it can be demonstrated to the Technical Authority that the work defined within this Statement of Work has been satisfactorily performed by the Contractor.

1.4.2 Objective

1.4.2.1 The objective of this Statement of Work is to engage a Contractor to provide maintenance on the Emergency Electrical Power Supply System to ensure the integrity and uninterrupted performance of the systems as indicated in Part 3 – Equipment Inventory, including but not limited to:

- 1) Diesel Generator(s)
- 2) Fuel System(s)
- 3) Transfer Switch(s)
- 4) Breaker(s)
- 5) Disconnect(s)
- 6) Panel Board(s)

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 20 of 82

1.4.3 Service Calls

1.4.3.1 The Contractor must provide a qualified person(s) as defined by Section 1.1 - Definitions, to respond, on site, on a twenty-four hour, seven day a week basis at no extra labour cost to Canada.

1.4.3.2 The Contractor must respond within 30 minutes and be on site ready to work within two hours. All service call work must be executed by a qualified service personnel named in the Contract and such work must proceed continuously until the system is returned to safe operating condition.

1.4.3.3 Request for Service Calls must only be accepted from the National Call Centre or the Technical Authority.

1.4.3.4 All service calls will be at extra cost to Canada and must be calculated based on the As and When Requested Work Pricing Schedule 2 in the Contract. Billable hours begin when the responding qualified person(s) are on site. Upon completion of the required service work, billable time ends. Canada will accept a minimum charge of two (2) hours. Canada will not accept Truck/Travel or Fuel charges.

1.4.4 Problem Escalation

1.4.4.1 If within the first four hours of working on the equipment, the Contractor's service technician has not been able to make significant progress of determining the problem with the equipment, they must then contact their technical support manager, service manager or engineering manager for advice on a further course of action;

1.4.4.2 If the problem is not corrected within a total of eight hours, the service technician must contact their technical support manager, service manager or engineering manager, who must arrange to have someone with more expertise (i.e. an engineer) available on site within the following twenty-four hours.

1.4.4.3 The Contractor must submit a written report within forty-eight hours to the Technical Authority providing a clear and concise rationale of the events

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 21 of 82

---

leading up to the failure of any component, sub-system, system or integrated system and how the issue was fixed.

#### 1.4.5 Notifications

- 1.4.5.1 An annually approved schedule is required before the start of the first test and every subsequent year thereafter.
- 1.4.5.2 The Technical Authority must be notified a minimum of fifteen working days prior to all tests to allow time to make necessary access and security arrangements.
- 1.4.5.3 The Contractor must ensure that proper notification procedures are in place to avoid false alarms during service, repairs and testing of the equipment identified in Part 3 – Equipment Inventory.
- 1.4.5.4 The Contractor must ensure that proper notification procedures are in place to avoid any miscommunication. The list of minimum contacts includes but is not limited to: the Technical Authority (TA), PSPC Building Systems Technician (BST), the monitoring service, the fire department and the site security. If there is an issue or delay in gaining access to the site the Contractor's employee or technician must contact the TA and the BST for assistance and at the very least, leave a voicemail message. If the TA or BST does not respond within 30 minutes the Contractor's employee or technician can leave the site. Request to re-schedule the test/inspection must be sent to the TA by the end of the next day of business (16:00).
- 1.4.5.5 The Contractor must notify the Technical Authority in writing within twenty-four hours or the next day of business, if they miss a scheduled test/inspection for any reason other than cancellation or re-scheduling notification by PSPC. Request to re-schedule the test/inspection must be sent to the TA by the end of the next day of business (16:00).
- 1.4.5.6 The Contractor must notify the Technical Authority in writing within twenty-four hours of repairs or service deemed necessary that were identified during inspections, checks, tests and Service calls that are not included within the Statement of Work.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 22 of 82

---

1.4.6 Operational Requirements

1.4.6.1 The Contractor must provide required maintenance as per Contractual requirements and at the indicated frequency, inclusive of the manufacturer's recommendations to maintain the equipment at its original performance level to provide trouble-free operations.

1.4.7 Extra Work

1.4.7.1 The Equipment Inventory identified in Part 3 – Equipment Inventory must be inspected, tested and maintained as described herein. All additional parts and labour required to effect repairs to this equipment will be at extra cost to Canada.

1.4.7.2 For any repairs associated with the Equipment Inventory, the Contractor must submit to the Technical Authority for review, within twenty-four hours, a comprehensive part & labour cost summary and the reason for repair(s). If the request is deemed fair and reasonable by the Technical Authority, compensation will be provided to the Contractor as per the "As and When Requested Work" Pricing Schedule 2 in the Contract. The proposed repairs must not proceed without prior consent in writing from the Technical Authority.

1.4.7.3 While the Contractor is on site, deficiencies discovered that can be repaired with available material from the Contractor's stock must be billed as per the "As and When Requested Work" Pricing Schedule 2 in the Contract. The approval to proceed with this corrective work can only be authorized by the Technical Authority.

1.4.7.4 Components used to repair or replace existing components must be new, compatible with the existing inventory, Canadian Underwriters Laboratories of Canada (ULC) and/or Canadian Standards Association (CSA) listed and

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 23 of 82

must comply with the applicable provisions of the codes, standards, regulations and requirements identified in Section 1.2 – Required Codes, Standards, Regulations and Requirements.

1.4.7.5 The Contractor is to identify modifications or improvements to the equipment or system(s) that will enhance equipment serviceability, life expectancy and/or efficiency. The Contractor must submit an estimated cost of the repairs based on the “As and When Requested Work” Pricing Schedule 2 in the Contract.

1.4.7.6 The Contractor is to follow the “As and When Requested Work” format when called upon by the Technical Authority to assist the Property Management Team with any extra work. Examples of this type of work or service call would include but are not be limited to, By-Passes, On Site Stand-By, Shut-Downs and Projects.

1.4.8 Building Access Hours

1.4.8.1 Regular, Silent and Weekend Building Working Hours

- 1) Regular building working hours are from 06:00 AM until 06:00 PM, Monday to Friday.
- 2) Silent building hours are from 06:00 PM until 06:00 AM, Monday to Friday.
- 3) Weekend building working hours are from 06:00 PM, Friday to 06:00 AM, Monday.

1.4.8.2 Inspections, Maintenance, Testing and Service

- 1) **With Disruption and Interference**
  - a) The inspections, maintenance, testing and service as defined by this Statement of Work must be carried out at such a time as to not inadvertently interfere with the operation of any equipment

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 24 of 82

within the building (e.g. cause the shut-down of the computers or any other integrated building systems).

- b) Routine maintenance, testing and service to the Service Electrical Power Supply Systems as required by this Statement of Work, which may cause disruption to the building occupants and/or systems, must not be carried out during normal working hours as defined in article 1.4.8.1- Regular, Silent and Weekend Working Hour.
- c) Disruptive tasks include load transfer, testing of ancillary functions, or other tests and services deemed unacceptable by the Technical Authority.
- d) Testing with disruption and interference tasks required by this Contract must only take place during the **Weekend working hours.**

2) **Without Disruption and Interference**

- a) a) Routine maintenance, testing and service to the Emergency Electrical Power Supply Systems as required by this Statement of Work, which will not cause disruption to the building occupants and/or systems, may be carried out during **Regular working hours** as defined in article 1.4.8.1- Regular, Silent and Weekend Working Hour.

1.4.8.3 Site Specific Maintenance Schedule

- 1) **To be established at the Pre-commencement Meeting.**

## **1.5 Responsibilities**

### 1.5.1 Completion of the Statement of Work

- 1.5.1.1 The Contractor must have the complete operational and adjustment procedures of the manufacturers for the equipment concerned, including direct access to the manufacturer's technical support services and service bulletins.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 25 of 82

1.5.1.2 The manufacturers may possess Proprietary Rights on some or all of the equipment listed in Section 3 – Equipment Inventory. Should a need arise to test, inspect, reconfigure, replace or reprogram such equipment, the Contractor must ensure the Work is completed at no additional cost to Canada.

1.5.1.3 It is the responsibility of the Contractor to provide one vinyl hard cover 3 “D” ring type loose leaf binder for 212 mm X 275 mm size paper, which holds the required checklists as per Section 1.3 - Submittals. The binder must be kept available in the emergency power supply room and becomes the property of Canada.

1.5.2 Negligence on the Part of Canada and Other Parties

1.5.2.1 The Contractor is not required, as part of his Statement of work, to make renewals or repairs necessitated by reason of the negligent operation or misuse of the equipment by Canada or other parties or by reason of any other cause beyond the Contractor's control.

1.5.2.2 The Contractor must notify the Technical Authority by phone within an hour and subsequently to follow up with a written report by fax or e-mail within twenty-four hours of any negligent operation or misuse of the equipment by Canada and other parties. The Contractor may be required to make repair or replace components necessitated by such occurrence at extra cost.

1.5.3 Documentation

1.5.3.1 It is the responsibility of the Contractor to document the tasks and activities associated with checks, tests, maintenance and service as identified within this Statement of Work.

1.5.3.2 The documentation as a result of the above is to be provided to the Technical Authority in accordance to the procedures identified within Section 1.3 – Submittals.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 26 of 82

---

1.5.3.3 Checks, tests, maintenance and service must be documented as identified within this Statement of Work and must be demonstrated as being correct and complete to the satisfaction of the Technical Authority.

1.5.4 Health and Safety

1.5.4.1 Site Specific Health and Safety Plan: See Section 1.3 – Submittals.

1.5.4.2 It is the responsibility of the Contractor to ensure the health and safety of persons on site, safety of property on site and protection of persons adjacent to site and environment to the extent that they may be affected by conduct of work.

1.5.4.3 It is the responsibility of the Contractor to comply with and enforce compliance by employees with safety requirements of the Statement of Work documents, applicable Federal, Provincial, Territorial and local statutes, regulations, ordinances, and with the site-specific Health and Safety Plan.

1.5.4.4 It is the responsibility of the Contractor to comply with the *Canada Labour Code Part II*, and the associated Canada Occupational Health and Safety Regulations.

1.5.4.5 It is the responsibility of the Contractor to comply with the Ontario Health and Safety Act and its associated regulations.

1.5.4.6 It is the responsibility of the Contractor to remove from the site any person employed on the site by the Contractor that, in the opinion of the Technical Authority, is a security risk, has been conducting himself/herself improperly or has violated the requirements of the site specific Health and Safety Plan. The Contractor must replace the removed individual with another individual with the same mandatory qualifications within twenty-four hours.

1.5.5 Working Alone Policy

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 27 of 82

- 1.5.5.1 No employee must work alone on the site at any time. It is the responsibility of the Contractor to ensure that the appropriate measures are implemented for two or more of its employees to be on site at all times during any job function.

## **1.6 Summary of Work**

### 1.6.1 Inclusions of the Statement of Work

#### 1.6.1.1 Labour

- 1) The labour for all inspections, testing, cleaning, maintenance, service and contract administration expenses must be provided by the Contractor at no extra cost to Canada.
- 2) The labour for Service Calls must be provided by the Contractor on a 7 days a week / 24 hours basis for the duration of the Statement of Work as per subsection 1.4.3. - Service Calls.

#### 1.6.1.2 Tools, Equipment and Services

- 1) The Contractor must furnish all necessary Personal Protective Equipment (PPE), tools, services, transportation, materials and labour to execute the work required for the testing, checking, inspection & maintenance of the Emergency Electrical Power Supply System(s), sub-systems and related equipment under the terms and conditions contained herein identified in Part 3 – Equipment Inventory.

#### 1.6.1.3 Consumable Materials

- 1) The Contractor must provide all necessary consumable materials required for the maintenance and service of the diesel generator equipment. This includes, but is not limited to oil, lubricating oil, lubricating oil filters, fuel oil filters, combustion air filters, distilled water, and cleaning materials.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 28 of 82

- 2) Consumable materials used to repair or replace existing system components must be new, compatible with the existing inventory, Canadian Underwriters Laboratories of Canada (ULC) and/or Canadian Standards Association (CSA) listed and must comply with the applicable provisions of the codes, standards, regulations and requirements identified in Section 1.2 – Required Codes, Standards, Regulations and Requirements.

1.6.2 Schedule

1.6.2.1 The first inspection and test must be carried out fifteen working days following the work start date as identified in this Statement of Work, with each successive test following at:

- 1) Monthly;
- 2) Semi-Annually; and
- 3) Annually, as applicable, to be first Monthly.

1.6.3 Hazardous Waste Management Plan

1.6.3.1 General

- 1) The Contractor must comply with the Environmental Protection Act and applicable Provincial and Territorial Codes, Standards and Requirements as per Section 1.2 - Required Codes, Standards, Regulations and Requirements, including local hazardous waste management programs.
- 2) The Contractor must conduct a hazardous waste audit to determine the hazardous waste generated during maintenance, service or repair activities over the duration of the Statement of Work, and prepare a written hazardous waste management plan as part of the Site - Work Specific Implementation Plan under Section 1.3 - Submittals.
- 3) All maintenance personnel must be fully briefed on the hazardous waste management work plan and must be required to conform to it

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 29 of 82

for all aspects of the work. The Contractor must be responsible for the enforcement of this requirement. The Technical Authority reserves the right to require the dismissal from the site of personnel who fail to comply with the requirements of the hazardous waste management plan.

1.6.3.2 Scheduling

- 1) The Contractor must coordinate the work involving hazardous waste removal and disposal with other activities at site to ensure timely and orderly progress of work.

1.6.3.3 Execution of Work

- 1) The Contractor must place hazardous waste generated by the performance of the maintenance items and duties required by this Statement of Work in the hazardous waste containers provided by Canada. The containers are to be stored, on the site in an area designated by the Technical Authority. The Contractor must do work in accordance with the hazardous waste management plan.
- 2) Hazardous waste includes but is not limited to :
  - a) Engine oil
  - b) Fuel oil
  - c) Anti-freeze
  - d) Fuel oil filters
  - e) Engine oil filters
  - f) Batteries
- 3) Hazardous waste materials must be handled in accordance with the appropriate Codes, Standards, Regulations and Requirements as identified within section 1.2 – Codes, Standards, Regulations and Requirements.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 30 of 82

---

- 4) The Contractor must clean up work area as work progresses.
- 5) The Contractor must remove tools on completion of work, and leave work areas in clean and orderly condition.
- 6) Mechanical and electrical equipment, sub-systems and systems must be protected from damage and blockage.

1.6.3.4 Health and Safety

- 1) Unforeseen Hazard
  - a) When unforeseen safety-related factor, hazard, or condition occurs during performance of the work, the Contractor has the right to follow procedures in place for Employee's Right to Refuse Work, in accordance with Acts and regulations of the province having jurisdiction. The Contractor must immediately advise the Technical Authority verbally and in writing within twenty-four hours.
- 2) Correction of Non-Compliance by the Contractor
  - a) Immediately address Health and Safety non-compliance issues identified by authority having jurisdiction or by the Technical Authority.
  - b) Provide the Technical Authority with written report of action taken to correct non-compliance of Health and Safety issues as identified in Section 1.3 – Submittals.
  - c) The Technical Authority may stop work if non-compliance of Health and Safety regulations is not corrected.
- 3) On-site Contingency and Emergency response plan

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 31 of 82

---

- a) The Contractor must comply with the standing emergency plan for the site where the work is being performed.

1.6.4 Disposal of Waste

1.6.4.1 Burying of rubbish and waste materials by the Contractor is prohibited.

1.6.4.2 Disposal of waste, volatile materials, mineral spirits, paint thinners or petroleum products into waterways, storm or sanitary sewers is prohibited.

1.6.4.3 Unless specified otherwise, materials for removal become the Contractor's property.

**1.7 Work Restrictions**

1.7.1 Use of site and facilities

1.7.1.1 The Contractor must execute work with least possible interference or disturbance to the normal use of the premises. Arrangements with Technical Authority must be made to facilitate work.

1.7.1.2 The Contractor must maintain security measures established by the existing facility and as approved by the Technical Authority.

1.7.2 Maintenance of Existing Services

1.7.2.1 The Contractor must provide the following in order to maintain existing services:

- 1) Personnel, pedestrian and vehicular traffic access.
- 2) A flag person where work impedes on regular traffic flow.
- 3) Safety barricades, signage and all precautionary measures required to assure the continued use to building access and services.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 32 of 82

---

- 4) Liability for damage, safety of equipment and overloading of existing equipment;
- 5) Where building security is reduced by the work, temporary means of maintaining security must be provided i.e. posting a person or persons to monitor entry to the building.

1.7.3 Intended interruption of Services

- 1.7.3.1 The Contractor must notify the Technical Authority fifteen working days prior to intended interruptions of services and obtain written permission before beginning the work.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 33 of 82

---

**PART 2 EXECUTION**

**2.1 General - Emergency Power Supply System(s)**

2.1.1 Performance

- 2.1.1.1 All work must be performed in accordance with the applicable Federal, Provincial or Territorial building, fire and electrical codes as identified in Section 1.2 – Codes, Standards, Regulations and Requirements.
- 2.1.1.2 The Contractor must execute such work in a careful and workmanlike manner.
- 2.1.1.3 Each system, sub-system, integrated system and component associated with the Emergency Electrical Power Supply Systems as identified within Part 3 – Equipment Inventory, must be checked, inspected and tested as per the applicable Codes, Standards, Regulations and Requirements in Section 1.2.

2.1.2 Required Consumable Materials

- 2.1.2.1 The Contractor must provide and store on site, as directed by the Technical Authority, the following consumable materials. These materials must be replaced on an annual basis by the Contractor ;
  - 1) A minimum of 4.54 litres of distilled water.
  - 2) Fuel filter(s) of each type and quantity required on fuel system as per Part 3 – Equipment Inventory.
  - 3) Oil filter(s) of each type and quantity required as per Part 3 – Equipment Inventory.
  - 4) Coolant filter(s) of each type and quantity required as per Part 3 – Equipment Inventory.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 34 of 82

2.1.3 Scheduling and Planning

2.1.3.1 Maintenance Implementation Strategy

- 1) The Contractor must review the maintenance implementation strategy and planning with the Technical Authority. The Contractor must provide the Technical Authority with a detailed maintenance implementation strategy schedule as per Section 1.3 Submittals.

2.1.3.2 Weekly, Monthly, Test Intervals

- 1) The Contractor must schedule maintenance intervals according to CAN/CSA - C282, which must include:
  - a) Weekly Requirements
    - i) Except when Monthly, Semi-Annual and Annual events occur during the term of this Statement of Work, the Weekly requirements will be performed by Canada and other parties.
  - b) Monthly Requirements
    - i) The monthly checks, inspections and tests must also include the applicable weekly requirements.
  - c) Semi-Annual Requirements
    - i) The semi-annual maintenance, checks, inspections and tests must also include the applicable weekly and monthly requirements.
  - d) Annual Requirements
    - i) The annual maintenance, inspection and tests must also include the applicable weekly, monthly and semi-annual requirements.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 35 of 82

- ii) As part of the annual checking, inspection and testing procedures the Contractor is responsible for providing and covering the cost of a load bank and all necessary cabling for connection to the Emergency Electrical Power Supply System or Systems being tested, to meet the required maximum load capacity of the generator.
- iii) The Contractor must provide their installation location and isolation procedures to the Technical Authority as part of the Annual Inspection –Sequence of Operation Section 1.3 – Submittals.
- iv) The Contractor must submit a detailed sequence of operation for all of the events covered under the Annual inspection as detailed in Section 1.3 – Submittals.
- v) The Contractor must provide a liquid analysis report for the anti-freeze and lubricating oil liquid as per Section 1.3 – Submittals.

e) e) Five Year Requirements

- ii) The five-year maintenance, checking, inspection and testing must be performed in the third year of the Contract duration.

2) Semi-annual and annual tests intervals

- a) There must be a minimum of at least six months between the semi-annual and the annual test of Emergency Power Supply system(s).

2.1.4 Inspections Closeout Tasks

- 2.1.4.1 The Contractor must restore the systems as identified in Part 3 – Equipment Inventory to the operational state as recorded prior to the commencement of the scheduled checks, inspections and tests included in this Statement of Work.

2.1.5 Personnel on site

- 2.1.5.1 Electrical work

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 36 of 82

---

- 1) Electrical work must be performed by qualified electrician(s), as per Section 1.1 – Definitions.

2.1.5.2 Monthly required personnel

- 1) The monthly inspections, checks, and tests must be carried out with personnel holding the following qualifications as identified in part 1.1 Definitions:
  - a) Diesel Engine Technician
  - b) Petroleum Mechanic
  - c) Electrician (only as needed when connecting or switching or isolating equipment)
- 2) A minimum of two qualified personnel must be present for monthly inspections. One can be dual-trained.

2.1.5.3 Semi-Annual Inspection Required Personnel

- 1) Personnel required under the monthly inspections are required at the semi-annual inspection.
- 2) Other qualified personnel or service(s) relevant to the semi-annual testing and work identified within this Statement of Work as outlined in Section 1.1. - Definitions.

2.1.5.4 Annual Inspection Required Personnel

- 1) Personnel required under the semi-annual inspections are required at the annual inspection.
- 2) Other qualified personnel or service(s) relevant to the annual testing and work identified within this Statement of Work.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 37 of 82

---

## **2.2 Additional Monthly Requirements**

### 2.2.1 Engine Cooling System with Remote Radiator

2.2.1.1 The volume of ant-freeze within the entire cooling system is unknown. Any need to replacing or replenishing any amount of anti-freeze in the system will be at extra cost to Canada. This extra cost is for the anti-freeze only; extra labour charges will not be accepted.

#### 2.2.1.2 Glycol Expansion Overflow Tank(s)

- 1) Must be checked for leaks and corrosion.
- 2) Must be checked for proper function of the pressure gauge and pressure relief cap.

#### 2.2.1.3 Motor(s)

- 1) Must be checked for overheating, vibration or excessive noise.
- 2) Motor belts must be checked for tension, alignment and general condition.

#### 2.2.1.4 Pumps(s)

- 1) Suction and discharge pressures must be checked.
- 2) Pumps must be checked for leaks. Where leaks are detected, the Contractor must recommend replacement or repack seals.
- 3) Bearings must be checked for overheating, vibration and excessive noise.
- 4) Required lubricants must be checked and topped-up and the drip rate of the lubricant must be adjusted.

#### 2.2.1.5 Motor Starter(s)

- 1) Motor starters must be checked for correct operations.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 38 of 82

2.2.1.6 Piping

- 1) Piping must be checked for leaks and the other abnormal circumstances.

2.2.2 Engine Cooling System with Engine Mount Radiator

2.2.2.1 The volume of anti-freeze within the entire cooling system is unknown. Any need to replacing or replenishing any amount of anti-freeze in the system will be at extra cost to Canada. This extra cost is for the anti-freeze only; extra labour charges will not be accepted.

2.2.2.2 Glycol Expansion Overflow Tank(s)

- 1) Must be checked for leaks and corrosion.
- 2) Must be checked for proper function of the pressure gauge and pressure relief cap.

2.2.2.3 Pump(s)

- 1) Suction and discharge pressures must be checked. Where leaks are detected, the Contractor must recommend replacement or repacking of seals.
- 2) Bearings must be checked for overheating, vibration and excessive noise.
- 3) Required lubricants must be checked and topped-up as required. The drip rate of the lubricant must be adjusted, as required.

2.2.3 Fire Pump Transfer Switch(s)

2.2.3.1 Must be tested to ensure correct operation during monthly diesel generator test.

2.2.4 General Annunciator Panel(s) - Local & Remote

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 39 of 82

- 1) Annunciator panel(s) must be checked to confirm correct operation.

2.2.5 Emergency Power Supply System Room or Enclosure/Container

2.2.5.1 Motor Starters

- 1) Motor starters must be checked for correct operation.

**2.3 Additional Annual Requirements**

2.3.1 Thermographic Survey Requirement

2.3.1.1 After the first 90 minutes of the 120 minutes annual full load test, the Contractor must conduct a complete Thermographic Survey (as defined in Section 1.1 – Definitions) of the electrical equipment identified in Part 3 - Equipment Inventory, to identify any thermal anomalies.

2.3.1.2 The Contractor must provide a written report as per Section 1.3 - Submittals.

2.3.2 Load Bank

- 1) Proper mounting of all panel covers, including latches, must be checked, where applicable.
- 2) Dust and grime from both interior and exterior surfaces of the control cabinet must be removed.
- 3) Coils and fans must be cleaned as specified by the manufacturer.
- 4) Indicating lamps, which are required to be illuminated as part of their normal function, must be inspected to assure that they are operational.
- 5) Load bank must be inspected for any unusual noises, vibration or smells.
- 6) Electrical connections must be inspected to ensure proper tightness.
- 7) Load bank must be inspected for signs of heating (e.g. discoloration or damaged insulation).
- 8) Movable linkages must be inspected.
- 9) Meters and gauges must be calibrated.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 40 of 82

- 10) Control panel switches and remote control panel switches must be tested for correct operation.
- 11) The equipment ventilation system, including belts, must be checked and tested.
- 12) Necessary temporary cabling for connection must be provided and installed from the load bank to the Emergency Electrical Power Supply System or systems being tested and removed after completion.

### 2.3.3 Engine Cooling System with Remote Radiator

2.3.3.1 The volume of anti-freeze within the entire cooling system is unknown. Any need to replacing or replenishing any amount of anti-freeze in the system will be at extra cost to Canada. This extra cost is for the anti-freeze only; extra labour charges will not be accepted.

#### 2.3.3.2 Glycol Expansion Overflow Tank(s)

- 1) Must be checked for leaks and corrosion.
- 2) Must be checked for proper function of the pressure gauge and pressure relief cap.

#### 2.3.3.3 Motor(s)

- 1) Must be inspected for overheating, vibration or excessive noise.
- 2) Must be cleaned and bolts tightened to recommended manufacturers' torque values.
- 3) Motor belts must be checked for tension, alignment and general condition.
- 4) Bearings must be oiled, as per manufacturer's requirements.
- 5) Motors must be greased, if applicable (continuous use/seasonal use).
- 6) Guards must be inspected to ensure tightness.

#### 2.3.3.4 Pump(s)

- 1) Must be greased as per manufacturer's requirements.
- 2) Must be tested to confirm that it turns freely by hand.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 41 of 82

- 3) Systems must be inspected for leaks. The Contractor must recommend replacement or repacking of seals.
- 4) Bearings must be inspected for overheating, vibration, and excessive noise.
- 5) Lubricant must be inspected and topped up. The drip rate of lubricant must be adjusted as per manufacturer's requirements.
- 6) Motor couplings must be checked for worn parts, tightness of mounting shaft and condition of safety guard.
- 7) Suction/discharge must be inspected.

2.3.3.5 Motor starter(s)

- 1) Must be cleaned of dirt, rust or corrosion.
- 2) Must be inspected for frayed strands on flexible leads, flexing over entire length.
- 3) Electrical connections must be torqued to the manufacturer's recommended values.
- 4) Must be inspected for noise, shading coils, magnetic surfaces, sealing, mechanical binding and loose rivets.
- 5) Must be inspected for proper sizing of over-current and overload devices
- 6) Mechanical components must be inspected.
- 7) Electrical connections must be inspected for discoloration of any current carrying parts.
- 8) Spring clip pressure of fuse clips must be inspected.
- 9) Coils must be inspected for signs of overheating or mechanical wear.
- 10) Push buttons, selector switches and/or pilot devices must be cleaned and device contacts inspected.
- 11) Pilot circuit must be tested for continuity.
- 12) Contacts must be inspected for flashing; if noted, the Contractor must adjust contacts to eliminate contact bounce.
- 13) Copper fuse ferrules must be polished. The Contractor must inspect for loose ferrules and proper size fuses.
- 14) Contact tips must be inspected and the Contractor must recommend replacement of the tip if burnt excessively and must not file silver tips. Then he must wipe clean.
- 15) Magnet faces must be cleaned, shading checked.
- 16) Striking coil must be inspected for misalignment and binding.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 42 of 82

- 17) Overload relays must be tripped by hand to ensure mechanically free. The Contractor must clean, check heater coil and tighten coil connections.
- 18) Arc shields must be checked for breaks and burning of arc blow out segments, recommend replacement if 1/3 vaporized.
- 19) Rectifier's continuity and voltage must be inspected.
- 20) Relays must be cleaned, inspected for mechanical binding and striking. Contacts must be checked.
- 21) Starting sequences must be tested to ensure controls function properly.
- 22) Pilot devices, pressure switches and temperature switches, bottom and top limits of operation must be checked. The Contractor must check for fluttering of contacts (revealed by pumping of main contacts).

2.3.3.6 Piping

- 1) Piping must be inspected for corrosion and condition of paint, where applicable. The Contractor must report for need to touch-up paint where required.
- 2) Insulation and supports must be inspected.
- 3) Pump assembly and immediate work area must be cleaned upon completion of maintenance procedures outlined herein.

2.3.4 Engine Cooling System with Engine Mount Radiator

2.3.4.1 The volume of ant-freeze within the entire cooling system is unknown. Any need to replacing or replenishing any amount of anti-freeze in the system will be at extra cost to Canada. This extra cost is for the anti-freeze only; extra labour charges will not be accepted.

2.3.4.2 Engine Cooling

- 1) Glycol Expansion Overflow Tank(s) must be:
  - a) Checked for proper function of pressure gauge and pressure relief cap.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 43 of 82

b) Checked for leaks and corrosion.

2.3.4.3 Pump(s):

- 1) Suction and discharge pressures must be checked. Where leaks are detected, the Contractor must recommend replacement or repacking of seals.
- 2) Bearings must be checked for overheating, vibration and excessive noise.
- 3) Required lubricants must be checked and topped-up as required. Drip rate of the lubricant must be adjusted, as required.

2.3.5 Engine Exhaust System

- 1) Muffler and/or scrubber must be inspected and cleaned.
- 2) Exhaust piping must be inspected for cracks, corrosion, rust, or any other signs of deterioration.
- 3) Exhaust pipe supports must be inspected for proper support and anchoring.
- 4) Exhaust pipe insulation must be inspected for cracks and deterioration.

2.3.6 Single Generator Control Panel

2.3.6.1 The breakers located within control panels on generator set or remotely must be:

- 1) Inspected for condition of insulators and barriers
- 2) Inspected for proper anchorage and alignment.
- 3) Inspected for unusual heating.
- 4) Inspected for correct tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or Table 100.12 of NETA
- 5) Cleaned as per manufacturers recommendations.
- 6) Tested to ensure smooth operation.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 44 of 82

- 2.3.6.2 The Programmable Logic Controller(s) must be inspected and the program must be compared with the previous inspection.
- 2.3.6.3 The engine and generator safeties must be inspected and tested to ensure correct operation of safety features as per CSA C-282.
- 2.3.6.4 Communication/operation and Annunciation Between Generator Control Panel and Other Relevant Equipment
- 1) The following equipment must be inspected and tested for correct annunciation:
    - a) Engine
    - b) Generator
    - c) Fuel system
    - d) Ventilation systems
    - e) Building Automation System (BAS)
    - f) Power distribution transfer switches.
    - g) Fire-pump transfer switches.
    - h) Fire alarm system.
    - i) Battery charger.
- 2.3.6.5 General Annunciator Panel(s) - Local & Remote
- 1) Annunciator panels must be inspected & tested to confirm correct operation.
- 2.3.6.6 Emergency Power Off (EPO) Station
- 1) EPO located on the control panel must be inspected and tested to confirm for correct operation.
  - 2) EPO located at the entrance to generator room or outside the room must be inspected and tested to confirm for correct operation.
- 2.3.6.7 Transfer Switches

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 45 of 82

- 1) Base building transfer switch(s) programming and time delays must be tested.
- 2) Tenant service transfer switch(s) programming and time delays must be tested.
- 3) Fire Pump Transfer Switch(s) must be tested to insure correct operation only. Maintenance is to be performed by Canada and other parties.
- 4) Emergency power circuit breaker for fire pumps transfer switch(s):
  - a) Must be inspected for condition of insulators and barriers
  - b) Must be inspected for proper anchorage and alignment.
  - c) Must be inspected for unusual heating.
  - d) Must be inspected for correct tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or Table 100.12 of InterNational Electrical Testing Association (NETA).
  - e) Must be cleaned as per manufacturer's recommendations.
  - f) Must be tested to ensure smooth operation.

2.3.6.8 Room or Enclosure/Container Ventilation Systems

- 1) Room/enclosure air supply and exhaust system(s) motorized dampers:
  - a) Must be cleaned and inspected.
  - b) Must be operated over full cycle to confirm proper operation.
  - c) Must be tested to ensure that dampers open and close to proper positions.
  - d) Must be inspected to ensure that motor shaft and linkage is not damaged or obstructed.
  - e) Linkage must be lubricated.
- 2) Room/enclosure air supply and exhaust system(s) room thermostat must be tested for correct and accurate operation.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 46 of 82

- 3) Room/ enclosure air supply and exhaust system(s) fan and motor assembly must be:
  - a) Checked for excessive noise, vibration and overheating.
  - b) Inspected to ensure fan blades are clean.
  - c) Checked to confirm belt, condition, tension and alignment
  - d) Lubricated.
  - e) Cleaned internally and externally.
  - f) Tested to insure that fan rotates freely.
  - g) Inspected for solid mounting. Tighten mounting bolts if found to be loose.
  - h) Inspected for shaft play and bearing wear. Recommend replacement of defective equipment if discovered.
  - i) Inspected to ensure integrity of safety guard, if fitted with such.
  
- 4) Room/enclosure air supply and exhaust system(s) motor starter(s):
  - a) Must be checked, inspected and tested
  - b) Must be cleaned of dirt, rust or corrosion.
  - c) Must have their electrical connections torqued to manufacturers' recommended values.
  - d) Must be inspected for frayed strands on flexible leads, flexing over entire length.
  - e) Must be inspected for noise, shading coils, magnetic surfaces, sealing, mechanical binding and loose rivets.
  - f) Must be inspected for proper sizing of over-current and overload devices.
  - g) Must have their mechanical connectors inspected.
  - h) Spring clip pressure of fuse clips must be inspected.
  - i) Electrical connections must be inspected for discoloration of any current carrying parts.
  - j) Coils must be inspected for signs of overheating or mechanical wear.
  - k) Push buttons, selector switches and/or pilot devices must be cleaned and device contacts must be inspected.
  - l) Pilot circuit must be tested for continuity.
  - m) Contactors must be inspected for flashing; if noted, then adjust contactor to eliminate contact bounce.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 47 of 82

- n) Copper fuse ferrules must be polished. The Contractor must inspect for loose ferrules and proper size fuses.
- o) Contact tips must be inspected. The Contractor must recommend replacement if burnt excessively, must not file silver tips. The Contractor must wipe clean and recommend replacement if less than 50% contact surface remains.
- p) Magnet faces must be cleaned, shading checked. Striking coil must be inspected for misalignment and binding. Correct as required.
- q) Overload relays must be tripped by hand to ensure mechanically free. The Contractor must clean, check heater coil and tighten coil connections.
- r) Arc shields must be checked for breaks and burning of arc blow out segments. The Contractor must recommend replacement if 1/3 vaporized.
- s) Rectifiers continuity and voltage must be inspected.
- t) Relays must be cleaned. The Contractor must inspect for mechanical binding and striking and check contacts.
- u) Starting sequences must be tested to ensure controls function properly.
- v) Pilot devices, pressure switches and temperature switches, bottom and top limits of operation must be checked. The Contractor must check for fluttering of contacts (revealed by pumping of main contacts).

## **2.4 Fuel System(s) Associated With Emergency Power Supply System(s)**

### 2.4.1 General

2.4.1.1 A Qualified Person, as defined in Section 1.1 - Definitions of this specification, must perform the maintenance of the fuel system associated with Emergency Electrical Power Supply System(s).

- 1) The Contractor must record the checks, inspections and tests results and provide reports as defined within this Statement of Work. Refer to Appendix A, B, & C attached mandatory inspection checklists.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 48 of 82

- 2) The Contractor must schedule maintenance intervals according to but not limited to Canadian Environmental Protection Act (CEPA) 2008-197 or Provincial/Territorial requirements, National Fire code, CCME - PN1326- Environmental code of practice, CSA – B139, ULC/ORD –C58.12.92, ULC/ORD – C58.14.92 depending on the fuel system volume, as follows:
- a) Weekly:
    - i) Refer to Appendix A performed by Canada and other parties, Except when monthly or annual occur during the term of this Statement of Work.
  - b) Monthly:
    - i) Refer to Appendix A, & B. The monthly inspection and test must also include the weekly inspection.
  - c) Annual:
    - i) Refer to Appendix A, B, & C. The annual maintenance, inspection and test must also include the applicable weekly and monthly inspection.

#### 2.4.2 Annual Testing Requirement

2.4.2.1 The Contractor must test the Quality of the fuel as follows:

- 1) Annually
  - a) CAN/ CSA 282 - visual inspection of fuel (clear and bright test) and;
  - b) The Contractor must submit the fuel sample to a qualified laboratory certified to perform analysis on diesel fuel for contamination and fuel degradation.
    - i) The Contractor must ensure that the laboratory selected meets with the approval of the Technical Authority and

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 49 of 82

- is capable of analyzing the quality of the sample as per the requirements identified within ASTM Standard D4176 Specification for Diesel Fuel Oils.
- ii) The Contractor must submit lab reports as per the requirements identified in Section 1.3 - Submittals.
  - iii) Test results must indicate that the diesel fuel tested meets the ASTM standard specification as recommended by the engine manufacturer.
  - iv) The Contractor must change fuel filter(s) on a yearly basis using the onsite stock.
- c) Depending on the combined results of the clear and bright test and the laboratory test results, the Contractor must be available to supervise the stabilizing, filtering and fuel replacement at no cost to Canada. Canada must bear the actual filtering & fuel replacement costs excluding Contractor's supervision cost and must be responsible for the disposal of old fuel.
- d) Upon completion of any of the options identified within part (c) above, the Contractor is responsible for re-submitting a new fuel sample for analysis. Canada must bear the actual cost of this second analysis. Results must be submitted to the Technical Authority.

### 2.4.3 Additional Scheduling and Planning Requirements

#### 2.4.3.1 Fuel transfer pumps system

- 1) Fuel pumps
  - a) Fuel pumps must be greased, in accordance with the manufacturers' recommendations.
  - b) Fuel pumps must be tested to see that it turns freely by hand.
  - c) Suction/ discharge pressures must be inspected.
  - d) Stem must be inspected for leaks. The Contractor must recommend replacement or repacking of seals.
  - e) Bearings must be inspected for overheating, vibration, and excessive noise.
  - f) Lubricant must be inspected and topped up.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 50 of 82

- g) Drip rate of lubricant must be adjusted, in accordance with the manufacturers' recommendations.
  - h) Motor couplings must be checked for worn parts, tightness of mounting shaft and condition of safety guard.
- 2) Motors
- a) Motors must be inspected for overheating, vibration or excessive noise.
  - b) Motors must be cleaned and bolts tightened to recommended manufacturers' torque values.
  - c) Belts must be inspected for correct tension alignment and general condition.
  - d) Bearings must be oiled, in accordance with the manufacturers' recommendations
  - e) Motors must be greased, in accordance with the manufacturers' recommendations
  - f) Guards must be inspected to be in place and must be tightened in accordance with the manufacturer's recommendations.
- 3) Duplex Pumps Controllers
- a) Must be cleaned of dirt, rust or corrosion
  - b) Must be inspected for frayed strands on flexible leads, flexing over entire length.
  - c) Must be inspected for noise, shading coils, magnetic surfaces, sealing, mechanical binding and loose rivets.
  - d) Must have their electrical connections torqued to manufacturers' recommended values.
  - e) Must be inspected for proper sizing of over current and overload devices
  - f) Electrical connections must be inspected for discoloration of any current carrying parts.
  - g) Mechanical connectors must be inspected.
  - h) Spring clip pressure of fuse clips must be inspected.
  - i) Coils must be inspected for signs of overheating or mechanical injury.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 51 of 82

- j) Push buttons, selector switches and/or pilot devices must be cleaned and device contacts must be inspected.
- k) Pilot circuit must be tested for continuity.
- l) Contactors must be inspected for flashing; if noted then adjust contactor to eliminate contact bounce.
- m) Copper fuse ferrules must be polished. The Contractor must inspect for loose ferrules and proper size fuses.
- n) Contact tips must be inspected. The Contractor must recommend replacement if burnt excessively, must not file silver tips. The Contractor must wipe clean and recommend replacement if less than 50% contact surface remains.
- o) Magnet faces must be cleaned, shading checked. Striking coil must be inspected for misalignment and binding. The Contractor must correct as required.
- p) Overload relays must be tripped by hand to ensure mechanically free. The Contractor must clean, check heater coil and tighten oil connections.
- q) Arc shields must be checked for breaks and burning of arc blow-out segments. The Contractor must recommend replacement if 1/3 vaporized.
- r) Rectifier's continuity and voltage must be inspected.
- s) Relays must be cleaned. The Contractor must inspect for mechanical binding and striking and check contacts.
- t) Starting sequences must be tested to ensure controls function properly.
- u) Pilot devices, pressure switches and temperature switches bottom and top limits of operation must be checked. The Contractor must check for fluttering of contacts (revealed by pumping of main contacts).
- v) Duplex Pumps Controllers must be inspected for proper sizing of over current and overload devices.
- w) Breakers must be inspected for unusual heating, inspected for correct tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturer's published data or Table 100.12 of InterNational Electrical Testing Association (NETA).
- x) Cleaned as per manufacturer's recommendations and tested to ensure smooth operation.

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 52 of 82

---

- y) The Contractor must inspect and test Microprocessor base monitoring and controls.
- z) The Contractor must inspect and test alternate lead/standby pump to start on call for fuel.
- aa) The Contractor must inspect and test interconnection with low and high level fuel monitoring system.
- bb) The Contractor must inspect and test interconnection of leak detection system.
- cc) The Contractor must inspect and test local audible alarm and event summaries.
- dd) The Contractor must inspect and test interface with BAS and remote monitoring

**PART 3 EQUIPMENT INVENTORY**

**3.1 General**

3.1.1 Inventory

3.1.1.1 The following is a list of the minimum number of components included in this Statement of Work. Please note inventory is deemed as accurate as possible.

**3.2 BLDG 91 SDMO – T82F**

3.2.1 Building Information

Civic Address	3701 Carling Ave.
City	Ottawa, ON
Postal Code	K2K 0Y1

3.2.2 Power Generator Set No. 1

Location	Outside in Enclosure
Manufacturer	SDMO
Model No.	GS-500
Duty	Standby
Assembly Complete with	Steel base, base isolators

3.2.2.1 Engine

Manufacture / Make	VOLVO
Model No.	TAD 1613GE
Serial No. Engine Family	4VPXL16.OACB
Horse Power	16L
Cylinders	12
Fuel Type	Diesel
Block heaters	1 @ 208 Volt, 3 kW, each
No. of Oil Filters	3
Oil Filter Manufacturer	FLEETGUARD 2 – LF9667 Extended Service, 1 – LF3654 – Regular service

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 54 of 82

3.2.2.2 Engine Exhaust System

Silencer	yes
Exhaust Piping	Insulated
Drainpipe	Complete with Shutoff Valve

3.2.2.3 Alternator

Manufacture	Leroy Somer
Serial No; Gen-1 No.	154574/1
Model No; Gen -1 No.	LSA 47-1L9 C 9/4
Rating	450 – kW, 563 – kVA
Voltage	600 Volts
Amperage	541 amps
Power Factor	.8
Configuration	3 Phase – 3 wire
RPM	1800
Frequency	60 Hz
Duty	Standby

1) Generator output Breaker

Voltage	380V
Amperage	175A
Location	Mounted on Gen Set

3.2.2.4 Engine Cooling System - Mounted Radiator

Radiator	Engine Mounted
Cooling Fan	Engine driven

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 55 of 82

3.2.3 Additional Equipment for Generator No. 1

3.2.3.1 Fuel System

Type	Diesel
Day Tank Capacity	NA
Construction	Double Walled
Complete with	Concrete Curb Leak Container
Fuel Level Gauge System	Electric
Alarms	Fuel Containment Alarm

3.2.3.2 Transfer Switches

Manufacturer	ASCO
Cat. No.	E94031000G7
Serial No. (m/g-1)	X23115
Voltage	600/347
Amperage	1000A
Configuration	3 phase 3 Wire

1) Normal Power Circuit Breaker

Location	Cutler Hammer – Westinghouse
Switch Board No	1000A
m/g set 1: cct. Breaker No	CRT RPGD12A100

2) Emergency Power Circuit Breaker

Location	Cutler Hammer – Westinghouse
Switch Board No	1000A
m/g set 1: cct. Breaker No	RPGD12A100

**3.3 BLDG 34**

3.3.1 Building Information

Civic Address	3701 Carling Ave
City	Ottawa
Postal Code	K2K 0Y1

3.3.2 Power Generator Set No. 1

Location	Outside in C-Can
Manufacturer	BBC Brown Boveri Canada
Model No.	527R serial # C26 – M830 – 101
Duty	2 Hours – rate – 10%
Assembly Complete with	Steel base, base isolators

3.3.2.1 Engine

Manufacture / Make	DETROIT DIESEL GM
Model No.	71237305
Serial No. Engine Family	12VAC7305
Horse Power	630HP
Cylinders	12
Fuel Type	Diesel
Block heaters	1 @ 120 Volt, 1.5 kW, each
No. of Oil Filters	2
Oil Filter Manufacturer	NAPA 1671

3.3.2.2 Engine Exhaust System

Silencer	NA
Exhaust Piping	Insulated
Drainpipe	Complete with Shutoff Valve

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 57 of 82

3.3.2.3 Alternator

Manufacture	BBC
Serial No; Gen-1 No.	C26-M830 – 101
Rating	350 – kW, 430 – kVA CONT.
Voltage	347/600 Volts
Amperage	421 amps
Power Factor	1.0
Configuration	3 Phase – 3 wire
RPM	1800
Frequency	60 Hz
Duty	2 hours @ 10%

1) Generator Set Control Panel

Manufacture	No name
Model No.	NA
Serial No.	NA
Location	In enclosure with Genset

2) Generator output Breaker

Voltage	600
Amperage	400
Location	In enclosure PSPC # 10-120-002

3.3.2.4 Engine Cooling System - Mounted Radiator

Radiator	Engine Mounted
Cooling Fan	Engine driven
Number of drive belts	N/A

3.3.3 Additional Equipment for Generator No. 1

3.3.3.2 Engine Starting System (Battery)

Number of Batteries	2
Manufacture	Federal
Model	908D – Series 4000 – 8D – 1400
Battery Voltage	12V
System Voltage	24 – Volts

3.3.3.3 Battery Charger

Manufacture	Enertec
Model No	HX2410S1BAO
Serial No	511203

3.3.3.4 Fuel System

Type	Diesel
Day Tank Capacity	N/A
Construction	Double Walled
Complete with	Concrete Curb Leak Container
Fuel Level Gauge System	Electric
Alarms	Fuel Containment Alarm

3.3.3.5 Fuel Filters

Number of Filters for Each System	1
Manufacturer	Detroit Diesel
Model No.	23523140

3.3.3.6 Transfer Switches

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON

Cylinders	6
Fuel Type	Diesel
Block heaters	Nelson, 93194-A
No. of Oil Filters	1 x LF691A
Oil Filter Manufacturer	Fleetguard
Fuel Filter	1 x FF5319

3.6.2.2 Engine Exhaust System

Exhaust Piping	Insulated
Drainpipe	Complete with Shutoff Valve

3.6.2.3 Alternator

Manufacture	CAT
Serial No; Gen-1 No.	-
Rating	438KVA, 350 KW
Voltage	600
Amperage	421
Power Factor	1.0
Configuration	3 Phase – 3 wire
RPM	1800
Frequency	60 Hz

1) Generator Set Control Panel

Manufacture	CAT
Model No.	-
Serial No.	-
Location	Mounted on the generator

2) Generator output Breaker

Voltage	600
Amperage	-

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

3.6.2.4 Engine Cooling System - Remote Radiator

Radiator Location	Outside of building
Cooling Fan	Engine driven
Number of drive belts	1

3.6.2.5 Engine Starting System (Battery)

Number of Batteries	2
Manufacture	Total Battery
Model	8D
Battery Voltage	12V
System Voltage	24V

3.6.3.6 Battery Charger

Manufacture	Mechron
Model No	CR1F120-024-020B
Serial No	3874

3.6.3.7 Fuel System

Type	Diesel
Construction	Double Walled
Fuel Level Gauge System	Electric
Alarms	Fuel Containment Alarm

3.6.3.8 Transfer Switches

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

**PART 4 FUEL APPENDIX**

**4.1 Fuel Appendix A – Weekly Storage Tank Inspection**

4.1.1 Requirements

4.1.1.1 These requirements combine several codes and legislations to ensure a minimum due diligence is achieved. Always adhere to the National Fire Code and manufacturers' recommendations as a minimum. All testing records must be kept for a minimum of five years with the respective Property Manager. If a facility has an oil-water separator, its components will comply with the previously mentioned procedures.

Fuel Appendix A PWGSC Weekly Storage Tank Inspection Checklist				
Site identifier (DFRP):		Facility name:		
Year of installation:		Tank ID:		
Capacity (liters/gallons)		Stored product:		
Tank type (AST-UST)		Tank material		
Date of inspection:		Name of employee who performed inspection:		
Facility Manager:		Manufacturer of tank:		
	Item	Acceptable	Non-compliant	Corrective Action
<b>A</b>	<b>Applies To All Storage Tanks</b>			
1	Liquid-vapor tight fill connection and cap present and in good working order			
2	Locked ULC listed spill containment at fill pipe with a minimum 15 liters capacity			
3	Secondary containment monitoring system in good working order			

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 73 of 82

4	ULC rated product level gauge is present and in good working order			
5	Secondary containment free of product and debris			
<b>B</b>	<b>Fixed fuel-fired device such as furnace, irrigation pump or generator</b>			
6	Functioning emergency shut off device @ pump, furnace or generator with appropriate signage present and in good working order			
7	Product inventory control log book or software present for inventory reconciliation complies with regulatory requirements			
<b>C</b>	<b>Piping for all types of tanks</b>			
8	Corrosion protection on metal surfaces in good working order			
9	Lockable, functioning shut off valve on the supply pipe, located as close as possible to the pipe as its exits the tank			
<b>D</b>	<b>Markings and Signage for tanks</b>			
10	CPPI identifier and CEPA registration tag attached to fill pipe			
11	WHMIS (both UST and AST) and TDGR placards (for AST only) present and in good condition			
12	PWGSC "No smoking"+ anti-static signage present on or near the tank systems (as applicable to the respective tank systems)			
13	Overfill protection device marking present and in good condition			
14	Dip chart present and in good condition			
15	Dip records for the tank and level recorded in log book (all types of tank systems) and/or software inventory records being recorded and available			
<b>E</b>	<b>Emergency Procedures</b>			

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 74 of 82

16	Spill kit present, appropriately sized and in good condition with an emergency response plan (in spill kit or displayed in the tank's vicinity)

**4.2 Fuel Appendix B - Monthly Storage Tank Inspection Checklist**

4.2.1 Requirements

4.2.1.1 These requirements combine several codes and legislations to ensure a minimum due diligence is achieved. Always adhere to the National Fire Code and manufacturers' recommendations as a minimum. All testing records must be kept for a minimum of five (5) years with the respective Property Manager. If a facility has an oil-water separator, then its components will comply with the procedures A through E.

<b>Fuel Appendix B PWGSC Monthly Storage Tank Inspection Checklist</b>				
Site identifier (DFRP):		Facility name:		
Year of installation:		Tank ID:		
Capacity (litres/gallons)		Stored product:		
Tank type (AST-UST)		Tank material		
Date of inspection:		Name of employee who performed inspection:		
Facility Manager:		Manufacturer of tank:		
	Item	Acceptable	Non-compliant	Corrective Action
<b>A</b>	<b>Applies To All Storage Tank Locations</b>			
1	Fencing and gate (when present) in good order			
2	Collision protection surrounding the tank present and in good order			
3	Functioning lighting system at fill port			
<b>B</b>	<b>Applies To All Storage Tanks</b>			
4	Have any corrective actions occurred to address corrosion protection deficiencies noted in weekly inspections?			
5	Product shut off device @ pump in good working order			
6	Tank secondary containment monitoring system is in good working order (if it has been triggered notify PM immediately)			

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 76 of 82

7	Vent whistle (if present) or other auditory visual alarms (mandatory for registered systems) are in good working order			
8	Inspect above ground piping and fuel filters for leaks (ensure compatibility with fuel type and date of last replacement for filter is indicated)			
9	Spill container free of product (notify PM immediately if it does have fuel in it)			
10	ULC/CSA labeled fire extinguisher (20 ABC) present and undamaged			
11	High-Low fuel level alarm visual/auditory notification system functioning and in good order			
12	Successful monthly start-up of generator and verification of operation of the transfer pump (s), as well as condition of sump (s)			
<b>C</b>	<b>Piping for all types of tanks</b>			
13	Visually verify condition of the anti-siphon (isolation) valve			
14	Lockable shut off fuel supply-return valve are in the open position			
15	Locked drainage valve (if provided for secondary containment zone) is in a closed position			
16	Markings and Signage for all tanks.			
17	PWGSC registration tag is present and in good condition.			
18	Electrical power shut off device signage in good order.			
19	Fuel Management System (FMS) controller lockout/restart functioning and in good order.			

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

**4.3 Fuel Appendix C - Annual Storage Tank Inspection Checklist**

4.3.1 Requirements

- 4.3.1.1 The annual compliance assessment should only be done by a provincially licensed and experienced contractor since many of items will have come in direct contact with the fuel and/or electrical service.
- 4.3.1.2 The annual system verification will entail a full series of tests according to both National Fire Code and manufacturers' recommendations. Mandatory annual integrity testing for UST and all buried piping are to be done according to National Fire Code, Storage Tank Regulations and manufacturer's recommended pressure and time period.
- 4.3.1.3 Please attach the original copy of the testing results to this form.
- 4.3.1.4 All records must be kept for a minimum of five (5) years with the respective Property Manager. If a facility has an oil-water separator, then its components will comply with the procedures A through G.

<b>Fuel Appendix C</b>				
<b>PWGSC Annual Storage Tank Inspection Checklist</b>				
Site identifier (DFRP):		Facility name:		
Year of installation:		Tank ID:		
Capacity (liters/gallons)		Stored product:		
Tank type (AST-UST)		Tank material		
Date of inspection:		Name of employee who performed inspection:		
Facility Manager:		Manufacturer of tank:		
	Item	Acceptable	Non-compliant	Corrective Action
<b>A</b>	<b>Applies to All Storage Tank Locations</b>			
1.	access for emergency and delivery vehicles to enable a 15 m turning radius surrounding location			

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 79 of 82

2.	No ignition sources within a 7.5 m radius			
3.	Drainage control present in case of spill or emergency			
4.	Lighting fixtures operational at fill port and/or pump			
<b>B</b>	<b>Applies to all Storage Tanks</b>			
5.	ULC rated vent cap in good working order and the cap height must be at least 2000 mm for diesel vs. 3500 mm for gasoline above grade, as well as a minimum 1200 mm above the tank surface			
6.	Operational condition of the federal storage tank system registration tag			
7.	ULC labeled Emergency tank vent (AST only) is in good working order			
8.	Secondary containment free of product and debris			
9.	Corrosion protection system verification being conducted and documented			
10.	Corrosion protection monitoring is in good working order			
11.	Liquid-vapor tight fill connection + fill cap is functioning and in good working order			
12.	Fuel shut off device @ pump is in working order			
13.	Conduct diagnostic on the tank system's inventory monitoring controls			
14.	Locked ULC listed spill containment at fill pipe (15 liters capacity minimum) is in good working order			
15.	Stair access (if reach height to fuel dispenser exceeds 990 mm) present and in good working order			
16.	Overfill protection device is in good order and labeled			
17.	Full length suction pipe (waste oil and oil-water separators only) present			

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 80 of 82

18.	Secondary containment free of product			
19.	Tank secondary containment monitoring system in good working order			
20.	Graduated ULC rated product level gauge present and in good working order			
21.	Ensure AST support frame minimum is 150 mm above grade is in good order			
22.	Presence of ground water, vapor and monitoring well (+ cap)			
23.	Vent whistle or other auditory visual alarms systems present and in good working order			
24.	Verify any sump for leaks and correct if necessary			
25.	Ground water, vapor and monitoring wells in good working order			
26.	Records for tank bottom water-sludge level are present			
<b>C</b>	<b>Fixed fuel-fired device such as furnace, irrigation pump or generator</b>			
27.	Emergency pump shut off device (@ pump, furnace or generator) with signage is present and in good order			
28.	Low-High fuel level alarm in good working order			
29.	Transfer pumps leak inspection conducted and documented			
30.	Product inventory control system diagnostic being conducted and documented			
31.	National Fire Code required annual fuel quality test or rotation of entire fuel capacity of tank being conducted and documented			
32.	Piping control valves in good working order			
<b>D</b>	<b>Markings and Signage for all Tanks</b>			
33.	CPPI and tank identification tags at the fill pipe present and legible			

**Shirley's Bay,  
3701 Carling Ave. Ottawa, ON  
Various Generator Systems**

28/07/2021

Page 81 of 82

34.	TDGR placard (for AST only) present and legible			
35.	ULC label (for AST) present and legible			
36.	Overfill protection device marking present and legible			
37.	Electrical power shut off device signage present			
38.	Piping product label (once piping protrudes inside building) and direction of flow are present and legible			
39.	Confirm presence and condition of monitoring well cover identification and replace if necessary			
<b>E</b>	<b>Piping for all types of tanks</b>			
40.	Corrosion protection on metal surfaces			
41.	Corrosion protection monitoring is functioning and inspections are being recorded on a monthly basis			
42.	Anti-siphon (isolation) valve is present and in good working order			
43.	Lockable product shut off valve functioning and in open position			
44.	Drainage valve (for secondary containment if applicable) is functioning and locked in a closed position			
45.	ULC/CSA/ASTM/ASME valves are labeled accordingly			
46.	Operation condition of all fuel carrying piping aboveground
