TENDER ADDENDUM

All-Terrain Telescopic Variable Reach Forklift

ES019

May 12, 2022

ADDENDUM No. 2

The following shall be read in conjunction with and shall form an integral part of the Tender / Proposal and Contract Documents:

Question 6: Regarding Mandatory Requirement Item #10, Hydraulic Quick Attachment - Capacity to quick attach a general-purpose bucket, currently owned Reactor plow (model # P/N SB308JCBQ, S/N 151067-01-01. 950 LB) and 48-inch pallet forks.

We will have the bucket and forks attach to the hydraulic quick attachments. However, for the Reactor Plow, is it acceptable to supply an adapter that will allow the new all-terrain telescopic variable reach forklift to attach to the Reactor plow? The adapter would be supplied by the manufacturer of the Reactor plow.

Answer 6: The supply of an adapter to attach the currently owned Reactor Plow to the new all-terrain telescopic variable reach forklift is acceptable as long as it does not impede upon the right angle and left angle range of motion of the plow through the forklift's joystick and allows for the quick attachment of both hydraulic lines and currently owned Reactor plow.
