This amendment 008 is raised to answer a question from a potential supplier.

Question #5:

On page 35 of the subject RFP in Annex B "Technical Specifications", the table for each fabric items #1-5 lists the standards to use to test each property:

CAN/CGSB 4.2 - Property
ASTM D276- Quantitative analysis of fibre mixtures
5.1-M90- Unit mass of fabrics
No 24.2-M91- Dimensional Change in Commercial Type Laundering

However, these standards you have provided have been withdrawn.

Standards continuously undergo periodic review and amendment. To maintain their test facility accreditation, test labs have only six months from the date an update is issued to have their testing methods updated to match the new standard.

Please provide the current (not withdrawn) test methods/standards that we are supposed to use for these tests.

Answer #5:

Although all three tests have been discontinued, the tests 1 & 2 (**1. ASTM D276- Quantitative Analysis of Fiber Blends** & **2. 5.1-M90- Unit Mass of Fabrics**) can still be done by labs, and are therefor required.

For test 3 (**No 24.2-M91- Dimensional change in commercial washing**), if the lab is able to do it, please use this test method, if not, please use its replacement **No 24-2002(2013) - Dimensional change in commercial washing**).

Please note that the testing method No 24-2002(2013) - Dimensional change in commercial washing) is also discontinued, however it is still valid.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
