 - .1 Outlets must be accessible, incorporated into the unit and wires must not be visible.
- .2 When wire management openings pass through a work surface (with the exception of a transaction surface), a meeting table surface or a support or a modesty panel, the openings must be provided with a grommet. Reusable covers must be provided for each grommet to conceal the openings when not in use.

All work surfaces greater than and including 1372mm (54 in.) in length must be provided with a minimum of two (2) grommets or two (2) finished gaps incorporated into the work surfaces.
- .4 The wire management system must be a grommet or a finished gap where the work surface meets a perpendicular panel or upper storage when specified.
- .5 The method of wire management must not cause the face of a pedestal to protrude beyond the front edge of the work surface when the pedestal is placed beneath the work surface.
