## **AMENDMENT 001**

### **Waterproof Dry Suits**

**Question 1:** Can you please confirm if product orders for suits would be done through Task Authorizations as well?

**Answer 1:** Yes.

**Question 2:** Please clarify if all products will be ordered under a task authorization or if that's just for repairs, modifications, training, etc.

**Answer 2:** All goods/services will be issued under task authorizations.

**Question 3:** Ref. ANNEX "A". 4.1.2 "The dry suit must be lightweight, which is defined to be not weighing more than 2.5 kilograms for a size medium suit when dry"; is the total weight of 3.2 kg acceptable for the proposed waterproof suit?

**Answer 3:** No, 2.5 Kilograms is the maximum acceptable weight due to amount of other necessary equipment operators are required to carry during operations.

**Question 4:** Ref. ANNEX "A". 4.1.3 "(b) Breathability rating of at least 5000 (A1) / 8000 (B1) g/sq m/24h"; is the Breathability rating of at least 3500 (A1) / 4800 (B1) g/sq m/24h acceptable for the proposed waterproof suit?

**Answer 4:** No, the breathability rating of at least 5000 (A1) / 8000 (B1) g/sq m/24h is the acceptable range to allow for the required balance of breathability and still being waterproof. Operators are required to function in these suits while doing some activities above water which requires this level of breathability to avoid overheating and excessive sweating.
