Requirement Details

Tendering Procedure: Selective Tendering

The following SA Holders have been invited to submit a proposal:

Alpha Controls & Instrumentation Inc
Canadawide Scientific
ESBE Scientific Industries Inc
Fisher Scientific
Geneq
High Purity Water Services Inc
Montreal Biotechnologies Inc
TekniScience Inc
Thermo Fisher Scientific (Mississauga Inc)
VWR International Ltd.

Context:

To procure an integrated high-purity water storage and distributing tank, containing:

- a storage tank with a capacity of at least 500 L,
- distribution pumps and distribution pump control system to ensure constant velocity in the loop and provide fresh water as needed
- an in-line water sanitation system to prevent bacterial growth on tank inner surfaces (in-line UV lamp) and removes bacteria from the water loop (0.22 µm filter)

As the operations of multiple laboratories are dependant on high purity water, the system must be reliable, robust and able to produce water quality that meets or exceeds that of currently used water storage tank and pump system.

Security Requirement: *There is a security requirement with this requirement*
