

Amendment 2 is raised to:

- Include the below Question /Answer from Industry.
  - Extend the solicitation closing date from 05 August 2022 to 15 September 2022 as per request from Industry.
  - Extend the requested delivery date to reflect 6 week extension of solicitation closing date. The requested goods delivery date will be extended from 31 March 2023 to 15 May 2023
- 

Industry Question #1:

I have a question for solicitation W8476-216466/002/B – Long Range Telescope. Section 3.2.11 of the Technical Requirements states the LRT must be Coyote Brown with a matte finish.

In Annex D it states the Pre-Award Samples being offer must fully represent the finished item.

Due to the short timeframes to submit and provide samples for evaluation, we request Canada allow the Pre-Award Samples to be Black with a matte finish. As the colour of the item doesn't affect operational performance or capabilities in a testing environment, we believe having the scope in Black won't compromise the testing process in any way. All other technical requirements will be met including the special markings as requested. All production items upon contract award will be in Coyote Brown. Will this be acceptable to Canada?

Response #1:

Yes this is Acceptable.

---

Industry Question #2:

Company would like to request a timing extension from Canada/DND till the 15<sup>th</sup> of September, 2022 for submission of the documents and samples required for solicitation *Long Range Telescope (W8476-216466/002/B)*? Reason being is due to the fact that further questions are required to provide clarification to the new requirements, new samples will need to be acquired and many people are on summer leave.

Response #2:

Solicitation closing date will now be extended to 15 September 2022.  
Requested delivery will now be extended to 15 May 2022.
