Description of Work:

The objective of this supply arrangement is to proactively establish a procurement vehicle through which the NRC can obtain the services of qualified, frequently needed project delivery resources on an “as and when needed” basis in response to demand to execute IM/IT related projects. Typical projects that consultants may be assigned to include, but will not be limited to:

- Implementation of new research facilities and associated infrastructure and research IT;
- Development of high performance computing capabilities;
- Service or business process re-engineering and subsequent implementation;
- Development and of security or other architectures and subsequent implementations;
- Design and implementation of cloud service offerings for delivery of internal or external services;
- Design and development of custom applications or portals using traditional or low-code platforms; and
- Support of project intake review and authorization processes.
