*The unit price contained in Column B will be multiplied by the total quantity in Column A to give a total extended price in Column C (ex: A x B = C). The price per unit of measure must remain the same regardless of format size. As an example, if the unit price per tablet was \$0.25 it would remain the same for a bottle of 100's (\$25.00) or for a bottle of 200's (\$50.00).

**The format size indicated in this column are to provide suppliers with an indication of the most commonly ordered bottle/pack sizes by the identified Users and in no way represents a commitment on the part of Canada. Identified Users reserve the right to order additional format sizes available but not listed in this column.

***Ontario (Ministry of Health and Long Term Care) has format size requirements in order to run their program. As such, should the Bidder with the lowest price per item not have Ontario's required format size available, Canada reserves the right to award Ontario's quantities to the next lowest Bidder per item who can meet the format size required by Ontario. Please see Annex A-2 attached for Ontario's format requirements.

Items 97 to 108 will be evaluated by the lowest aggregate price per grouping for that item. As an example, the bidder with the lowest aggregate price per grouping for items #97A, 97B, 97C and 97D will be awarded all the products listed in that grouping. If bidding on an aggregate grouping, the bidder must submit a price for each item within the grouping. Bids not containing a price for each item will be deemed non-responsive for that grouping.
