This Solicitation Amendment No. twenty (20) is raised to include the following Addendum No. seven (7).

The following Addendum to the tender is effective immediately. This addendum shall form part of the contract documents.

INSERT: NORR Addendum 7

1. Answer the following questions:

Updated Response:

Q152. On drawing E03-03, there are two loads to be connected from the DP-BAN2 panel: P-23A and P-23B. However, these loads are not present on the single line on page E04-01. Please confirm that these two loads are indeed to be connected

A152. P-23A/B are connected to DP-BAX as shown on single line diagram. The mechanical schedule updated in NORR Addendum 7

Q196. Q67 in Amendment No.11 clarifies that SSF-4 is quartz and is only 13mm thick. The quartz suppliers have expressed concern with this. These kitchen counters are to have mitred edges and 13mm does not offer enough surface for the adhesive at the mitre. They recommend minimum of 20mm for quartz in this application. If the owner/architect chooses to stay at 13mm, the fabricator will not warranty the countertops.

A196. 20mm is fine for the quartz thickness in NORR Addendum 6.

Q197. Please confirm if Intercom is to be integrated to the cctv/access control. can you provide information on the size of the underground fuel tank to be removed? this is necessary to determine the size of equipment needed to remove the tank.

A197. Intercom to be integrated to cctv/access control system.

Q198. Questions in relation to the Fire Alarm:

1. Are the North and South Towers considered separate buildings? Particularly in regards to how the Fireman Handsets will function.
2. Do any of the Annunciators and DGP's require Paging Capability? If so, which ones?
3. What will be used to connect the nodes, Copper or Fiber? Please confirm if Intercom is to be integrated to the cctv/access control. can you provide information on the size of the underground fuel tank to be removed? this is necessary to determine the size of equipment needed to remove the tank.

A198. 1. North and South Towers are part of the same building.

2. two Annunciators requires Paging Capability.
3. Copper

Q199. Section 09 25 13 Direct Applied Finish. There is no finish schedule that makes reference to this product. Is this intended to be the "Spray-on Cementitious Wall Finish" identified in the List of Materials (CODE PT-SPC)? If so, is this finish only in the Atrium Stair E walls?

A199. Yes, and Yes. See updated drawing A42-03 in NORR Addendum 7.

All other terms and conditions remain the same.
