Solicitation Amendment 003

Q1. Will detailed construction drawings with a parts list be made available? Will you require detailed shop drawings to be submitted for review prior to construction?

A1. Detailed construction drawings will not be supplied. Any shop drawings produced are to be submitted to the Departmental Representative for review.

Q2. In Solicitation Addendum 1, line A3, it mentions “ Anti-climb mesh is to be installed before the tower sections are delivered.

Are we responsible for tower assembly before it arrives to the Shearwater location? Given the towers are in a KDSS format, typically these are shipped in parts and assembled on the site location they will be deployed.

If these are to be assembled before delivery, I will need to know so I can carry for the appropriate number of trucks to have the material shipped.

A2. Structures should be assembled prior to delivery to ensure proper fitment, and labeled to ensure CCG can match tower “tops” to “bottoms”.

Towers can be shipped as one piece per tower, or tower pieces can be assembled at the bolted connections as per the tower design upon delivery at the delivery location. No welding is permitted at the delivery location. All required lifting equipment is the contractor’s responsibility.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME
