

Questions & Answers

Title: Strategic Innovation Fund (SIF) Project-Level GHG Estimation	
Solicitation Number: ISED-204337	Date: August 25, 2022

NO	Questions	Answers
1	For the mandatory and point rated requirements, can the Crown confirm if they would accept experience of the Bidder to include the experience of the parent, subsidiaries or other affiliates of the Bidder, its subcontractors, or its proposed resources?	Yes that is permissible, however the individuals that will ultimately end up working on the SIF files (subcontractors/consultants) must have the experience to meet the mandatory and point rated requirements.
2	Attachment 1 to Part 4 states "The Bidder must submit a detailed CV of their proposed resource(s) demonstrating that each proposed resource meets the minimum mandatory requirements (references, educational, and work experience) as per the flexible grid found in Table 1 below". However, there does not appear to be a table identified as either "Table 1" or a flexible grid. Can the Crown confirm which requirements need to be met by proposed resources?	The flexible grid is referring to the Mandatory Technical Criterion table found on Pg. 17. Additionally, proposed resources should also provide support on how the bidder meets Point-Rated Technical Criteria.
