SOLICITATION AMENDMENT 001 IS RAISED TO ANSWER THE FOLLOWING QUESTIONS AND MODIFY THE REQUEST FOR PROPOSAL, AS FOLLOWS:

(1)

Question 1:

Regarding the security cabling section 3.1.1.1 which says: “field device cabling is existing and must be re-used”, we want your confirmation that any device requested as “supply and replace” or “connect” has already an existing cable going back to the control panel, and we can use this existing cable, kindly confirm?

Answer 1:

Field device cabling for ‘supply and replace’ devices is existing, with the exception of the following sections that identify net new requirements:

- 3.1.2.4, sixth to ninth bullet is net new, cabling is required – see section 3.1.1.3
- 3.1.2.6, sixth to ninth bullet is net new, cabling is required – see section 3.1.1.3
- 3.1.2.8, eleventh to fourteenth bullet is net new, cabling is required – see section 3.1.1.3
- 3.1.3.7, eighth bullet “Supply and install cabling and nine (9) Honeywell 270R panic”.

Question 2:

Regarding the security cabling section 3.1.1.2 says: “If unable to install cabling within client secure space, EMT conduit must be installed”, can we have a site visit to be able to determine spaces that need EMT conduits? Or if you can give us a rough estimate about the required EMT to be unified, overall bidders?

Answer 2:

There is a possible requirement for conduit, wire mold or raceway on the two new doors on 18th Floor South, as the wall above these doors are partial (not floor to ceiling). There are no other known requirements.

Question 3:

Regarding section 3.1.2.10 says “A Health Canada in-house technician shall be on-site to program the Keyscan Panels”, does this mean that programming & commissioning for the Access Control software are out of our scope of work?

Answer 3:

A Health Canada in-house technician will be responsible to program the Keyscan Panels and NETCOM2 modules to the Access Control software. Acceptance testing by the Health Canada in-house technician and the security contractor will evaluate the hardware components supplied within the scope of work.

Question 4:

Regarding section 3.1.3.10 says “A Health Canada in-house technician shall be on-site to program DSC control panels”, does this mean that programming & commissioning for the

Solicitation No. - N° de l'invitation H1121-214780/A	Amd. No. - N° de la modif. 001	Buyer ID - Id de l'acheteur hn336
Client Ref. No. - N° de réf. du client H1121-214780	File No. - N° du dossier hn336.H1121-214780	CCC No./N° CCC - FMS No./N° VME

Intrusion system software are out of our scope of work? Just will do basic programming for devices and zones as requested.

Answer 4:

The security contractor will be responsible for basic setup of the DSC panel, including enrolling keypads, expansion modules and power supplies/outputs as a stand-alone system to ensure proper operation of all field devices. The security contractor shall provide the Health Canada in-house technician with a marked-up drawing of the field devices zone numbers. The Health Canada in-house technician will program the TL-280RE network communicator to communicate to the Intrusion Detection software and perform final zone type programming and zone descriptors via DLS5 software from the HC/PHAC network.

Question 5:

The required parts list excludes the Access Control and Intrusion systems software and servers, so kindly confirm that the Access Control and Intrusion system will be connected to the existing software at a central location, and it's out of our scope of work.

Answer 5:

The Access Control and Intrusion Detection systems software and servers are not required within the scope of work.

Question 6:

Regarding the required HID cards: do you have any recommended part numbers or not?

Answer 6:

Quote 35 bit format for 125 kHz prox cards to fully comply with Health Canada's existing Corporate 1000® card account.

Question 7:

Regarding the required HID Signo 20 reader: do you have any recommended part numbers from this series?

Answer 7:

HID Signo 20NKS 00 000000

Question 8:

Regarding the required HID Signo 40 reader: do you have any recommended part numbers from this series?

Answer 8:

HID Signo 40NKS 00 000000

Solicitation No. - N° de l'invitation H1121-214780/A	Amd. No. - N° de la modif. 001	Buyer ID - Id de l'acheteur hn336
Client Ref. No. - N° de réf. du client H1121-214780	File No. - N° du dossier hn336.H1121-214780	CCC No./N° CCC - FMS No./N° VME

Question 9:

Please confirm version of software currently being used by Health Canada's centrally managed electronic security systems for the Keyscan system specified within the documents. As per Statement of Work Security Contractor, Section 2 point 2.3 Background and Specific Scope of the Requirement - The current electronic security system is the Chubb AFx Series, which requires replacement in order to connect to Health Canada's centrally managed electronic security systems.

Answer 9:

Keyscan Aurora version 1.0.20.0

Question 10:

The requested completion of this project is March 14, 2023. Many manufacturers have been affected by the Global Supply chain issues and may not be able to provide equipment in time to meet this requested completion time. Will the project completion date be extended if the equipment is not able to be delivered in time?

Answer 10:

Funding is only secured for this fiscal year, therefore we can not extend the deadline.

Question 11:

HID Corporate 1000 cards have been requested but no additional information. To properly provide the access cards requested, please provide the format type and the model of cards (ex. PVC, Clamshell, fobs, etc.)

Answer 11:

PVC cards that allow vertical or horizontal punch-outs. Quote 35 bit format for 125 kHz prox cards to fully comply with Health Canada's existing Corporate 1000® card account.

Question 12:

Please confirm that all existing equipment (devices and wiring) that is to be migrated to the new system is in working condition.

Answer 12:

To the best of our knowledge, all devices and wiring are in working condition.

Question 13:

Please confirm that any licenses that may be required to add the new controllers and intrusion alarm system to the existing infrastructure are provided by others

Answer 13:

Software licenses are not required within the statement of work.
