The reasons for this amendment 007 is to respond to a question from industry,

The question is as follows;

“As mentioned in the virtual meeting, we would like further clarification on what is expected of the Qty 8 Training sessions in the First Year, because we feel that this is an excessive number of courses.

Will these be 8 identical Training courses to cycle all the personnel through (at up to 6 students per course) – meaning you have up to 48 personnel who require Training in the first year?

Please confirm that this Training is in-class only, for routine operator maintenance, inspection and pre-drop checks, packing, trouble shooting and servicing / replacing components, as per Annex A para a and b.”

The answer provided is;

“The training courses are intended to be identical and will cover at a minimum: Daily/routine operator maintenance, inspection and pre-drop checks, packing, troubleshooting, and servicing and replacing components. If industry believes additional content should be included to the training DND is welcome to the addition of this information. The training is intended to be primarily in class with hands on learning of the equipment at the offerors facility but does not have to be limited solely to a classroom setting depending on the vendors training proposal.

The DND additionally is looking for courses of up to 6 individuals, therefore the DND may have up to 48 personnel requiring the training”
