This RFP amendment 02 is raised to answer bidders' questions

Interior Light and Fixtures:

In regard to SOR#16 - Two 12" x 48" white LED ceiling light panels must be installed lengthwise down the centre line –

Q1) Do you require these to be 12volt to run off the battery or 120 to run off the inverter?

Q2) In regard to SOR #18 - A minimum 20" in length LED light bar with integrated on/off switch or equivalent must be placed above the work bench, mounted to the bottom of the top shelf - Do you require these to be 12volt to run off the battery or 120 to run off the inverter?

Answer 1&2) The LED ceiling light and LED work bench light must work off the 12 volt battery which would be powered by the inverter when plugged in.

Electrical:

In regard to SOR #24 - A Victron MultiPlus 2000W inverter/charger or equivalent, with remote control panel in the cab, with shore power amperage dial must be installed

Q3) Are you looking to switch between shore power and a generator with the dial? If not, what are you requiring the dial for?

A3) Shore power amperage dials are standard with Victron multiplus inverters. Shore power dial allows the vehicle operator to limit the amperage going into the unit depending on the electrical source to prevent the breaker from blowing.

If another (equivalent) inverter is being sourced, please ensure the amperage dial is included.

All other terms and conditions remain unchanged
