

In a sustainable perspective, the Marché du Film makes positive changes for its exhibitors year by year.

- Readjustment of electrical boxes power.
- Our carpet offer is recyclable and made in France.
- Cafeterias at the Palais: our caterer Pavillon Traiteur makes a long-term commitment to an eco-friendly approach, in particular by reducing their environmental footprint. Containers are biodegradable (food containers, cutlery, cups), and short circuits are privileged.
- Printing: our printing partner Exhibit is ISO 14001 certified and also takes on an eco-responsible approach (recycling, use of solvent free inks...).

In this perspective, the Marché du Film would like to remind its exhibitors:

SAVING ENERGY

- Please switch off the lights when closing each day: there are switches on the pavilions.
- Please turn off all electronic devices (screens, computers, printers...): even the “standby mode” of your electronic devices consumes a large amount of electricity.

WASTE MANAGEMENT

Think of putting your waste in the right disposal bins!

- Paper waste, clean plastic and cardboard: small blue bins (without bags) in each pavilion.
- Glass: see glass recycling points on the maps below for Riviera and Pantiero village.
- Other waste: small bins in each pavilion.
