This Solicitation Amendment 006 is raised to answer bidders' questions as follows:

Q.10

Concerning Requirement M10

Would Canada/RCMP consider an average of 5 – 5 shot groups rather than a maximum group size for the accuracy testing?

A.10

Yes, Canada would accept the average of 5 – 5 shot groups rather than a maximum group size.

Q.11

Concerning Requirement M11

Would Canada/RCMP consider changing this to be the average between 3 shots fired into a 10% Ballistic Ordnance Gel Block at 300 yards to have an average of 20" or less?

A.11

No, Canada will not change this requirement. It will remain at 5 shots with a maximum of 20" penetration per shot.

Q.12

Criteria # M7- Can the RCMP specify which form of bullet they want for their specified 250-300 grain caliber bullet. I understand it is a .338 Lapua Magnum round they want, but can they be specific as to which actual bullet they want in their cartridge (i.e a boat tail 300 grain bullet FMJ or a hollow point or another type of bullet)

A.12

The RCMP is not specific on the projectile form provided that it meets the requirements outlined in the RFP.

Q.13

Criteria # M8 – At what distances will the Ohler 83 be measuring the velocities to determine average velocity of the projectiles?

A.13

As per the ANSI/SAAMI Z299.4-2015 protocols, the velocity measurement will be taken at 15'.

CCC No./N° CCC - FMS No./N° VME

Q.14

Criteria# M12 - Can they be more specific on what type of tip on the bullet they require – to meet their criteria for expansion?

A.14

The RCMP is not specific of the bullet tip that is used to meet the criteria of M12.

All other Terms and Conditions remain the same.
