Description of Work:

Title: Intelligent Supply Chain (ISC) additional feature development

The Contractor will utilize their subject matter expertise to evolve the Intelligent Supply Chain (ISC), through continued feature development, integration services, and operations. While working with stakeholders to ensure the product's success through review of risks, mitigation strategies and security requirements, the contractor will apply a best practice approach to business analysis, software development, creating and testing application wireframes and prototypes, secure data collection from multiple sources, data storage, analytics, web-based application design, and project management. This requirement will focus primarily on further automating the existing supply chain processes, to modernize government capability in the following functional areas:

- a. Order, and Inventory management
- b. Delivery management, and Track & trace
- c. User management
- d. Data Extract, Transform and Load (ETL)
- e. Reporting

While in development, the Contractor will be responsible for development, integration, release management, (including bug fixes and defects), and training to further develop the Intelligent Supply Chain (ISC) product. Finally, he contractor will be responsible for the transition of all these functions to the HC and PHAC organizations upon request so it may be maintained in-house. This includes subsequent source code, documentation and licences required to operate the solution.

Security Requirement: Common PS SRCL #34 applies

Minimum Corporate Security Required: N/A

Minimum Resource Security Required: Secret

Contract Authority

Name: Beverly Shawana
Phone Number: 613-371-3765
