

AMENDMENT 006

CSPS-RFP-22JP-0296/A

To all Bidders:

The purpose of this amendment is to amend the answer provided in amendment 3, revised answer to question 5 as well as to give effect to the following question and answer 19. Please see below:

Questions and Answers

Question # 5:

The Scope describes the service as accessed through a phone line, or other previously agreed upon mediums. Our Platform is cloud-based, with video and audio, accessed through any device connected to the internet, including a Smart Phone (App). There is no installation or hardware required.

Can you reply if a system based on Internet connectivity is in consideration before we decide to proceed further, or are you mainly looking for a Phone based solution?

Original answer (Amendment 2)Answer # 5:

Yes, a cloud-based solution can be taken in consideration in the context of this RFP.

Please delete the above answer and replace with the following.

No, a cloud-based solution cannot be taken into consideration as the purchase of this platform would be considered a good and therefore changes the scope of this RFP which is to obtain services of a contractor to provide remote simultaneous interpretation.

Please delete the above answer and replace with the following.

After further consultation with other Government of Canada departments and internal discussions, a cloud-based solution can be taken into consideration as long as the Bidder is in agreement with the resulting contract clauses as identified in section 6 of this RFP and that they can meet all Mandatory Requirements as stated in section 4 of the RFP.

Question and Answer 19

Question # 19:

We are wondering if you have an idea of how long the events will be?

Answer # 19:

The length of the events varies. Our discussion-type events are usually 90 minutes, but we also host larger half-day and full-day events.
