The purpose of Amendment 003 is to answer questions received and make changes to the solicitation documents.

## 1. Questions and Answers

The following questions were asked and the answers are included herein:

Question		Response
6	Is it acceptable to combine the time requirements from SOW 2.3.1 and 2.3.2? For example, would a system that can be set up <u>and</u> derive position and bearing to the first howitzer in less than a total of 7 minutes or less (or 13 minutes or less in extreme cold or NBC MOPP 4) be acceptable?	Yes, combined timing for these two requirements would be acceptable to Canada.
7	Given that SOW 2.6.1.d) requires the proposed system to meet all performance characteristics detailed in the SOW down to - 32°C, would a system that is fully functional and certified to MIL-STD-810G under climates A2 through A3 and C1 be acceptable?	Yes, this is a mistake in para 2.6.1 a). The paragraph should read as follows "The GLPS / T-16 replacement must function under climates A2 through A3 and C1 as described by STANAG 4370 / AECTP-100 / 200 / 230."

## 2. Changes to the Solicitation Documents

At Annex "A", Appendix 1, 2.6.1 a):

**DELETE:** 2.6.1 a) in its entirety

**INSERT:**

2.6.1 a) The GLPS / T-16 replacement must function under climates A2 through A3 and C1 as described by STANAG 4370 / AECTP-100 / 200 / 230.
