Signature	Date

This amendment is raised to address the following:

- Respond to Q&A's.

QUESTIONS AND ANSWERS

Question 1: The Mandatory Technical Specifications indicate that Mobile Destruction Units Mobile shredding equipment approved for paper destruction per High Volume / Commercial Destruction: Confidential (HVCD-C). Particle size must be 300 mm² or less. The corresponding disintegrator screen size is 13 mm. The specifications as listed by the RCMP for shred specs (<https://www.rcmp-grc.gc.ca/physec-secmat/pubs/gcpsg-gsmgc-001-eng.htm#a6-1>) indicates under Appendix A that for Protected B and Confidential shredding by HVCD has the disintegrator screen size of 13mm - but the particle size listed is 19mm x 25mm which is 475mm² or less. These are three items that are all different. (Protected B / Confidential with 300mm² / Confidential with 475mm²) - can you please clarify which standard is to be met.

Answer 1: The disintegrator screen size needs to be 13mm or less.

Question 2: For the selected vendor, what is the process for authorizing staff to perform the services and what level of security do they require?

Answer 2: The required clearance is Facility Access II (FA2) with escort.

When the RCMP requires **Facility Access Level II**; the Contractor will submit the following to the RCMP through the RCMP online security portal:

1. TBS Security Screening Application and Consent Form
2. Copy of Government Issued Photo Identification (Driver's License Front and Back)

The RCMP:

1. Will conduct personnel security screening checks above the Policy on Government Security requirements.
2. Is responsible for escort requirements on it facilities or sites.

Please refer to the Security Requirements Check List and Security Guide in Annex C of the RFP.
