

Question #1:

I had a few questions regarding this tender that was posted. From what I understood it's looking for 250 dual monitor clamp mounts, that are capable of holding a 24" monitor. What I don't understand is what you mean by deep surface?

**Correction: 24 inches does not refer to monitor size. 24 inches refers to the depth of the AAFC work surface to which the monitor arm will be fastened.**

Question #2:

Are you accepting alternative monitor arm solutions other than the Global 5MOADUARMCLPMTX XXXX?

**AAFC is requesting the following: Monitor arm to work with a 24" deep surface (dual arm, clamp mount) as per product code 5MOADUARMCLPMTXXXX of Category 5 of the workspaces Supply Arrangement.**

Question #3:

In regards to the RFB as noted above, can you please confirm if installation of these arms is to be included or is the requirement for delivery only?

**Installation is not requested, only delivery.**
