

This solicitation amendment 002 is raised to:

1. Answer questions from the Industry.

1. Answer questions from the Industry;

Question 001 :

I have a question regarding the Drinking Water Quality Data Management system, specifically regarding the internet/browser based constraint. Do cloud-hosted, desktop apps with portal applications qualify? This would be an internet-based solution but would require an application (that isn't a web-browser) to be run.

Answer 001 :

No, cloud-hosted desktop apps with portal applications do not qualify for this request. This is because multiple stakeholders (internal and external to CBSA) regularly access water quality data, and may not have the security or IT requirements to install and use the app on a as-needed basis.

ALL OTHER TERMS AND CONDITIONS OF THE CONTRACT REMAIN THE SAME.
