The phenolic casework below is designed and manufactured to meet or exceed all SEFA regulations for use in laboratories. All CSi standard specification casework is manufactured with chemical resistant phenolic panels. All requested casework options are listed below.
Any additional options, quantities or specifications required are available at additional cost.

A **Product** by **Csi** Consisting of the following \$ 30,833.25

- 1 Lot 1" Chemical Resistant Phenolic Countertop with 4" Splash- Black
- 1 DBL #30 Sink Epoxy Sink - Black
- 1 PH-C3214-100L Phenolic Corner Cabinet - ADA Height
- 2 PH-B3236-200 Phenolic Cabinet w/ 2 Doors - ADA Height
- 1 PH-B3230-040 Phenolic Cabinet w/ 4 Drawers - ADA Height
- 1 PH-B3242040 Phenolic Cabinet w/ 4 Drawers - ADA Height
- 1 Lot Phenolic Construction Aprons, Fillers, & Cleats
- 1 PBG3036 Phenolic Drying Rack
- 1 L684 Mixing Faucet - Chrome Finish

B **Freight** Packaging, shipping, insurance from Factory, to "Ship To" location Included

C **Drawings** Drawings for customer approval and factory production Included

D **Installation** All freight packaging inspection, unloading & allocation, product inspection and installation \$ 10,598.50

Delivery Current production schedules show shipping in 16-20 weeks after receipt of all approvals

CAD Sub-Total \$ 41,431.75

GST / HST # 772744488 **CAD 13% \$ 5,386.13**

Payment made by Visa or MasterCard is subject to a 3% service fee

CAD TOTAL \$ 46,817.88

SALES CONTRACT TERMS & CONDITIONS

1 Acceptance:

This quotation and the terms and conditions included herein will form part of any subsequent agreement of purchase. Succeeding requests for changes are subject to additional charges and terms. Change requests to customer order by the customer after receipt of order by Canadian Scientific Lab Systems Inc. (CSi) must be in writing and will only be effective if confirmed in writing by CSi. CSi will not accept a contract containing penalties or liquidated or actual damages. Acceptance of this quotation/bid is based solely on the use of the Canadian Construction Association standard sub-contract form(s) L-1 or S-1. Alterations or changes to this sub-contract will not be accepted.

2 Delivery:

2.1 Unless otherwise noted on the CSi quotation, all quotes are based on CSi's manufacturer's current production schedule at the time of the quote.

2.2 The customer should provide CSi with their project's expected delivery date on their purchase order.

2.3 The customer agrees that there will be no back charges or other charges levied at CSi for late deliveries caused by the manufacturer or the shipping company transporting product to the customer. Furthermore, the customer agrees that there will be no back charges or other charges levied at CSi for incomplete, incorrectly machined, or damaged product requiring replacement caused by the manufacturer or the shipping company transporting product to the customer.

2.4 Customer requested delivery date changes. In the event that the customer requests a later delivery schedule after the product has been placed into production, storage charges at the manufacturer or CSi would apply. In addition to storage charges, the customer may also be responsible for paying for undelivered and stored product, regardless of the terms of the contract, i.e., DOD.

3 Product Specifications & Limitations:

CSi is not a manufacturer and neither offers claims nor warranties for product, outside of that which is provided by the manufacturer. All products are based on the manufacturer's specifications and limitations in effect at the time of order.

4 Shop Drawings:

Shop drawings are required by the factory to begin production. Shop drawings must contain a copy of the required specifications as well as all pertinent site verified dimensions, locations and sizes of all fixture holes, notches, profiles and cut-outs, and the make and model numbers of all customer supplied fixtures and sinks. CSi, based on the quoted price, can produce these drawings using the above information supplied by the customer. Customer requested site visits or for site verified dimensions are available at additional cost. Customer must approve all CSi produced shop drawings before being released into production.

5 Product Freight:

Unless otherwise noted on the CSi quotation, CSi offers freight pricing as a service only and is not guaranteed. CSi reserves the right to charge actual shipping charges at the time of delivery. Additional charges may apply for tailgate deliveries, deliveries requiring an appointment, extended delivery vehicle wait times, etc. Freight companies generally allow 1 hour for unloading. The customer requires a crew of at least 4 workers to unload a truck or a fork truck/pump truck with extended forks to affect a timely and efficient unloading.

6 Installations by CSi:

6.1 Unless otherwise noted on the CSi quotation, all quotations for CSi installations are quoted at the non-union rate. Customer must make it known to CSi at the time of quotation request, of

any labor agreements or restrictions, obligatory pre-installation safety meetings or requirements, or any other condition that would increase the cost/time of installation. Additional charges would apply to cover such costs if above conditions have not been indicated on the quote request.

- 6.2** Delivery vehicles must have access to the job site at the scheduled delivery time. Delivery route within the job site including work area must be free of all clutter and have a reasonably smooth floor without any trip hazards for unimpeded access to required elevations.
- 6.3** All elevations requiring the installation of counter tops shall be completely installed, true, level, and square. All wall cleats required to support counter tops must be supplied and installed by customer
- 6.4** Unless otherwise noted on the CSi quotation or pre-arranged with the customer, all quotations for installation labor are based on one trip to install all components without interruption or forced idle time. Where elevations are not complete, as scheduled by the customer, causing the installation of counter tops to be uncompleted during the expected installation time frame, thus requiring "out-of-town" idle time or a return visit, additional charges will apply to revisit the job site. In addition, CSi will not be responsible for any costs associated with the customer's expected completion date if the support structures/millwork is not ready as scheduled for countertop (and related items) installation.
- 6.5** Where changes to elevations have taken place on the job site after the product has been put into production or during/before installation commences, causing the installation of counter tops to be uncompleted due to the need for additional components, CSi will charge the customer (upon acceptance), the cost of required pieces plus any associated freight charges, and any labor charges to revisit the job site. In addition, CSi will not be responsible for any costs associated with the customer's expected completion date.
- 6.6** Protection of completed countertop installation against scratches, marks or other damage will be the responsibility of the customer unless specifically requested in the bid documents.

7 Installations by Customer:

- 7.1** For installations by customer supplied installers, it will be assumed that the customer supplied installers are competent in the installation of the CSi supplied products. CSi reserves the right to limit assistance to customer supplied installers. Dedicated or on-site assistance is available by CSi for an additional fee.
- 7.2** Installers are to assume the responsibility to finish any edges or drill any fixture holes that have been accidentally shipped unfinished or undrilled at the factory. Small chip repairs, mars or scratches that can be repaired on site are also the responsibility of the installers. Contact CSi for assistance.

8 Product Replacement Limitations:

To ensure rapid response to damaged, missing, incorrect machining or any other product concern, the following protocols should be observed. Note that CSi will not be responsible for the labor costs of replacing products or associated mechanicals or eventual disposal once the product has been installed or placed into location. Pieces shipped that do not meet the customer's requirement should be reported to CSi and should not be permanently installed.

- 8.1** Upon delivery, while the product is still within the delivery vehicle, the customer should examine all packaging for damage to skids, cardboard covering, broken bands, torn plastic wrap, and particularly fork truck damage to the ends of the skids. Sink boxes should be opened to ensure sinks are intact. Other boxes containing, for example, cement cans, sink parts, etc. should be opened to ensure completed delivery. Skids should not be double stacked in the delivery vehicle. Record all double stacking or damage on driver's delivery slip and photograph all damage locations. Report any damaged pieces to CSi so that we can send replacement pieces. DO NOT INSTALL any pieces that are damaged. CSi will not be responsible for any installation or mechanical costs associated with pieces installed that do not meet customer acceptance.
- 8.2** Break down all skids & packages and locate all products into their respective installation locations to confirm fit and conformance to the shop drawings. A copy of the production shop drawings is generally included with each shipment. Ensure that any customer supplied sinks, fixtures, etc. fit in the holes machined at the factory. Report any missing parts or deviations from the shop drawings immediately to CSi so that we can send replacement pieces. DO NOT INSTALL any pieces that have been produced wrong or appear to be wrong. CSi will not be responsible for any

------	------	-------------	-------------	------------	-------------

installation or mechanical costs associated with missing pieces or installed (temporarily or otherwise) pieces that do not meet customer acceptance.

8.3 Installation breakage or damage. If a piece is broken or otherwise damaged during installation, please contact CSi so that we can send replacement pieces as soon as possible. CSi will charge the customer (upon acceptance), the cost of replacement pieces plus any associated freight charges. CSi will not be responsible for any installation or mechanical costs associated with pieces installed that do not meet customer acceptance.

8.4 In the event that on site/postproduction changes are made requiring addition components, please contact CSi so that we can send required pieces as soon as possible. CSi will charge the

8.5 Failure to deliver on time. CSi will not be responsible for any costs associated with the time it takes to supply, deliver, unload, and install replacement pieces.

9 Product Machining:

Unless specifically stated on the CSi quotation, all quotations are based on all applicable countertop material including all machining of holes, cut-outs, notches, profiles, etc. indicated on the submitted drawings. In the event that the customer is unable to provide detailed locations, sizes, profiles, etc. for machining at the time of required product production, the production schedule will be extended, or the customer will be informed that missing machining details will not be done, and a credit will be issued based on the non-realized factory machining. Subsequently, any machining done on-site including installer labor, travel and tooling costs will therefore be the responsibility of the customer.

Travel costs, if applicable, are extra to the above machining costs.

NOTE: Unless specifically requested, all locating pin holes for faucet and fixture holes will not be drilled at the factory. Installers of these fixtures are responsible for the location/direction and drilling of these pin holes on site. Consult CSi for proper tools to drill these locating pin holes.

10 Customer Supplied Components:

Where a customer is supplying/installing customer supplied components into CSi supplied counter tops such as stainless-steel sinks, electrical pedestals, mechanical fixtures, etc., the customer is responsible to ensure that all machined holes requested of CSi are correct in size and location. CSi uses customer supplied manufacturer's part numbers and the manufacturer's data (including manufacturer's CAD drawings) to machine holes. For stainless steel sinks with ledges, the customer is required to specify the preferred template cutout (Method A or Method B). In the event that the fixture manufacturer has provided cut out sizes that do not match the required dimensions of the fixture or fixture attachments, CSi will not be responsible for the costs associated with replacement countertop material or countertop alterations to suit the installation of the customer supplied components.

10.1 CSi does not supply supports/bracing for undermount sinks unless stated in quote.

11 Product and/or Packaging Disposal (Supply Only):

The customer will assume all responsibility for the disposal of all unused product, shipping, and installation packaging, including wood skids, cardboard boxes, plastic, and paper wrapping, etc. at no cost to CSi.

12 Bonding:

Unless specifically stated on the CSi quotation, bonding or any form of performance security is not included in CSi quotes.

Payment terms are subject to credit approval. In the event of partial delivery and/or installation, a percentage of the completed delivery and/or installation would be invoiced with payment due according to the terms of sale. All goods dispatched to the client remain the property of CSi until payment has been received in full. In the event of failure to provide timely payment, CSi reserves the right to contact the job site owner and their contractor (if our invoice is directed to a sub-contractor of this contractor) to effect claim against the owner/operator of the product's location.

The customer agrees upon signing below that they have read, understood, and agreed to our Sales Contract Terms & Conditions.
