ANNEX "A" STATEMENT OF WORK 23

ANNEX "B" BASIS OF PAYMENT 23

ANNEX "C" EVALUATION CRITERIA 24

PART 1 - GENERAL INFORMATION

1.1 Security Requirements

There is no security requirement associated with this bid solicitation

1.2 Statement of Work

The Work to be performed is detailed under Annex "A" of the resulting contract clauses.

1.3 Debriefings

Bidders may request a debriefing on the results of the bid solicitation process. Bidders should make the request to the Contracting Authority within 15 working days from receipt of the results of the bid solicitation process. The debriefing may be in writing or by telephone.

PART 2 - BIDDER INSTRUCTIONS

2.1 Standard Instructions, Clauses and Conditions

As this solicitation is issued by Fisheries and Oceans Canada (DFO), any reference to Public Works and Government Services Canada or PWGSC or its Minister contained in any term, condition or clause of this solicitation, including any individual SACC clauses incorporated by reference, will be interpreted as reference to DFO or its Minister.

All instructions, clauses and conditions identified in the bid solicitation by number, date and title are set out in the [Standard Acquisition Clauses and Conditions Manual](https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual>) issued by Public Works and Government Services Canada.

Bidders who submit a bid agree to be bound by the instructions, clauses and conditions of the bid solicitation and accept the clauses and conditions of the resulting contract.

The **2003** (2002-03-29) Standard Instructions - Goods or Services - Competitive Requirements, are incorporated by reference into and form part of the bid solicitation.

2.2 Submission of Bids

Bids must be submitted by the date, time and place indicated on page 1 of the bid solicitation.

Due to the nature of the bid solicitation, bids transmitted by facsimile to DFO will not be accepted.

2.3 Enquiries - Bid Solicitation

All enquiries must be submitted in writing to the Contracting Authority no later than 7 calendar days before the bid closing date. Enquiries received after that time may not be answered.

Bidders should reference as accurately as possible the numbered item of the bid solicitation to which the enquiry relates. Care should be taken by bidders to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the question(s) or may request that the Bidder do so, so that the proprietary nature of the question(s) is eliminated, and the enquiry can be answered to all bidders. Enquiries not submitted in a form that can be distributed to all bidders may not be answered by Canada.

2.4 Applicable Laws

Any resulting contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

Bidders may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their bid, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the Bidders.

2.5 Basis for Canada's Ownership of Intellectual Property

The Sea Lamprey Control Program, Fisheries and Oceans Canada has determined that any intellectual property rights arising from the performance of the Work under the resulting contract will belong to Canada, for the following reasons, as set out in the [Policy on Title to Intellectual Property Arising Under](#)

Crown Procurement Contracts: the Bidder declares in writing that they are not interested in owning the Intellectual Property Rights in Foreground Information;

2.6 Bid Challenge and Recourse Mechanisms

- (a) Several mechanisms are available to potential suppliers to challenge aspects of the procurement process up to and including contract award.
- (b) Canada encourages suppliers to first bring their concerns to the attention of the Contracting Authority. Canada's [Buy and Sell](#) website, under the heading "[Bid Challenge and Recourse Mechanisms](#)" contains information on potential complaint bodies such as:
 - Office of the Procurement Ombudsman (OPO)
 - Canadian International Trade Tribunal (CITT)
- (c) Suppliers should note that there are **strict deadlines** for filing complaints, and the time periods vary depending on the complaint body in question. Suppliers should therefore act quickly when they want to challenge any aspect of the procurement process.

PART 3 - BID PREPARATION INSTRUCTIONS

3.1 Bid Preparation Instructions

Canada requests that the Bidder submit **all** its **email** bid in separately saved sections as follows and **prior to the bid closing date, time and location**:

Section I: Technical Bid (one soft copy in PDF format)

Section II: Financial Bid (one soft copy in PDF format)

Section III: Certifications (one soft copy in PDF format)

Important Note:

The maximum size per email (including attachments) is limited to 10MB. If the limit is exceeded, your email might not be received by DFO. It is suggested that you compress the email size to ensure delivery. Bidders are responsible to send their proposal and to allow enough time for DFO to receive the proposal by the closing period indicated in the RFP. Emails with links to bid documents will not be accepted.

For bids transmitted by email, DFO will not be responsible for any failure attributable to the transmission or receipt of the email bid. DFO will send a confirmation email to the Bidders when the submission is received.

Section III: Certifications

Bidders must submit the certifications and additional information required under Part 5.

PART 4 - EVALUATION PROCEDURES AND BASIS OF SELECTION

4.1 Evaluation Procedures

- (a) Bids will be assessed in accordance with the entire requirement of the bid solicitation including the technical and financial evaluation criteria.
- (b) An evaluation team composed of representatives of Canada will evaluate the bids.

4.1.1 Technical Evaluation

4.1.1.1 Mandatory Technical Criteria

Refer to Annex "C".

4.1.1.2 Point Rated Technical Criteria

Refer to Annex "C".

4.1.3 Financial Evaluation

SACC *Manual* Clause [A0220T](#) (2014-06-26), Evaluation of Price-Bid.

4.2 Basis of Selection

4.2.1 Highest Combined Rating of Technical Merit and Price - A0027T (2022-12-01)

1. To be declared responsive, a bid must:

- a. comply with all the requirements of the bid solicitation; and
- b. meet all mandatory criteria; and
- c. obtain the required minimum of **60 points** overall for the technical evaluation criteria which are subject to point rating. The rating is performed on a scale of **100 points**

2. Bids not meeting (a) or (b) or (c) will be declared non-responsive.

3. The selection will be based on the highest responsive combined rating of technical merit and price. The ratio will be 70 % for the technical merit and 30 % for the price.

4. To establish the technical merit score, the overall technical score for each responsive bid will be determined as follows: total number of points obtained divided by the maximum number of points available multiplied by the ratio of 70 %.

5. To establish the pricing score, each responsive bid will be prorated against the lowest evaluated price and the ratio of 30 %.

6. For each responsive bid, the technical merit score and the pricing score will be added to determine its combined rating.

7. Neither the responsive bid obtaining the highest technical score nor the one with the lowest evaluated price will necessarily be accepted. The responsive bid with the highest combined rating of technical merit and price will be recommended for award of a contract.

The table below illustrates an example where all three bids are responsive and the selection of the contractor is determined by a 70/30 ratio of technical merit and price, respectively. The total available points equal 135 and the lowest evaluated price is \$45,000 (45).

Basis of Selection - Highest Combined Rating Technical Merit (70%) and Price (30%)				
		Bidder 1	Bidder 2	Bidder 3
Overall Technical Score		115/135	89/135	92/135
Bid Evaluated Price		\$55,000.00	\$50,000.00	\$45,000.00
Calculations	Technical Merit Score	$115/135 \times 70 = 59.63$	$89/135 \times 70 = 46.15$	$92/135 \times 70 = 47.70$
	Pricing Score	$45/55 \times 30 = 24.55$	$45/50 \times 30 = 27.00$	$45/45 \times 30 = 30.00$
Combined Rating		84.18	73.15	77.70
Overall Rating		1st	3rd	2nd

As part of Canada's policy directing federal departments and agencies to take the necessary steps to acquire products and services that have a lower impact on the environment than those traditionally acquired, Contractors should:

a) Paper consumption:

- Provide and transmit draft reports, final reports in electronic format. Should printed material be required, double sided printing in black and white format is the default unless otherwise specified by the Project Authority.
- Printed material is requested on minimum recycled content of 30% and/or certified as originating from a sustainably managed forest.
- Recycle unneeded printed documents (in accordance with Security requirements).

b) Travel requirements:

- The Contractor is encouraged to use video and/or teleconferencing where possible to cut down unnecessary travel.
- Use of Properties with Environmental Ratings: Contractors to the Government of Canada may access the PWGSC Accommodation directory, which includes Eco-Rated properties. When searching for accommodation, Contractors can go to the following link and search for properties with Environmental Ratings, identified by Green Keys or Green Leafs that will honour the pricing for Contractors.
- Use public transportation or another method of green transportation as much as possible.

STATEMENT OF WORK

BRIDGELAND CREEK SEA LAMPREY TRAPPING CONTRACT

1.0 BACKGROUND:

Department of Fisheries and Oceans (DFO) has played a vital role in the sea lamprey control program since 1955. It is a binational program that is coordinated by the Great Lakes Fishery Commission (GLFC) and serves to protect the fisheries of the Great Lakes, which have an estimated economic benefit of \$7 billion annually. Control is achieved primarily by extensive treatment of streams to eliminate larval sea lampreys. To measure how effective the control program is each year, DFO estimates the populations of adult sea lamprey in each lake on an annual basis. This is done by using traps to estimate populations in streams and then extrapolating to the entire lake. Bridgeland Creek is one of the index streams for Lake Huron.

2.0 OBJECTIVE:

Operate the trap on Bridgeland Creek, conducting a mark-recapture study with the sea lamprey captured, and collect and supply raw data to be used to generate a population estimate in this stream.

3.0 PROJECT WORK:

Project work will be completed between March 15 and August 1, 2023. Project work for optional years would have similar dates for 2024-2026.

For each year, the first day of trap servicing will be dependent on weather, and will be determined by DFO after March 15. Once the start date has been determined, the trap will be serviced 5 days per week for a minimum of 10 consecutive weeks. Work may be required beyond this 10 week period dependent on weather and trap catches, up to a maximum of 4 weeks. These week-long extensions will be determined by DFO at the end of the first 10 weeks and at the end of each subsequent week-long extension.

4.0 REQUIREMENTS AND DELIVERABLES:

4.1 The language of correspondence must be English.

4.2 A vehicle capable of transporting lamprey in water (up to 225 kg) must be supplied.

4.3 The services that are required five days per week are:

4.3.1 Ensure traps and barrier are operating as intended. This involves;

- a) assisting DFO with the initial cleaning and set-up of the barrier and traps,
- b) general maintenance of the traps and barrier including removal of debris accumulating on the flow through barrier screens, and in and around the traps,
- c) contacting DFO personnel when not operating as intended, or vandalism has occurred, and
- d) recording the operational status of the traps each day.

4.3.2 Remove, identify and count fishes and invertebrates captured in both traps. This involves;

- a) removing all animals captured,
- b) identifying and counting the number and species of fish,

- c) releasing native species upstream of the barrier,
- d) disposing of surplus sea lampreys (up to 750 per day), and
- e) recording all information accurately.

4.3.3 Conduct a mark-recapture study to estimate the population in the river. This involves;

- a) marking a portion of the sea lampreys with the appropriate fin clip (provided by DFO),
- b) maintaining good health of marked lampreys, transporting and releasing them at a designated site downstream,
- c) identifying and disposing of fin-clipped sea lampreys recaptured in traps, and
- d) recording all information accurately.

4.3.4 Collect biological data from sea lampreys. This involves;

- a) measuring length and weight of recaptured lamprey (up to max of 25 per day),
- b) dissecting measured specimens to determine sex and maturity,
- c) recording all information accurately.

4.3.5 Collect environmental data. This involves;

- a) measuring water and air temperature,
- b) measuring water levels using staff gauges on site,
- c) measuring turbidity, and
- d) recording all information accurately

4.3.6 Complete a daily report each time the trap is visited. This involves:

- a. recording the date, time, operator name and all information collected in numbers 1 to 5 above,
- b. upon completion of each week, mail the set of hard copy daily reports for that week to DFO, and
- c. retain field notes to prevent data loss.

4.3.7 On a weekly basis call or e-mail DFO to report:

- a. the daily number of sea lamprey that were captured and recaptured from each individual trap over the previous week, and
- b. mechanical or structural issues with the barrier or trap.

*Please note that alternative work may be required in addition to the requirements above. This work could include the transport of trapping equipment from off-site, to the trapping location or vice-versa, and the setup of traps. In the event alternative tasks are required, the work will be carried out in lieu of trapping days. Such arrangements will be worked out between the Contractor and the Senior Biologist at SLCC and agreed upon prior to the tasks taking place.

DEPARTMENTAL RESPONSIBILITIES

DFO will provide a) specialized equipment to complete the on-site work, b) on-site storage for equipment, c) blank data forms to be completed by the Contractor, d) the Task Hazard Analysis for this site to make the Contractor aware of hazards, and e) the Adult Assessment Trapping Protocol that is used at all trap sites to assist the Contractor with data collection requirements.

CONTRACTOR RESPONSIBILITIES

The Contractor is responsible for costs related to disposal of sea lampreys, insurance requirements, transportation to and from the sites, telephone calls to DFO, postage and photocopying.

RESOURCES AND LEVEL OF EFFORT

Although the trap site meets safety requirements for one person to be on site, two people are recommended for operating traps, not only for safety, but to provide help with physical lifting and moving of traps, as well as sorting, identifying, counting fishes, and marking and releasing sea lampreys.

A mark-recapture type population estimate must be conducted, which involves handling, tagging and releasing tagged lampreys in healthy condition.
