# 1 Scope

This document identifies the requirements for each data item required by DND and provides an explanation of the forms used to define those requirements.

The main body of the document provides explanations of both the Contract Data Requirements List (CDRL) and Data Item Description (DID) forms and provides general submission instructions.

## 1.1 Introduction

Each data item is specified in two parts: an entry in the CDRL and in the DID.

The specific requirements detailed in each CDRL item, and its associated DID, are contractual requirements.

Because the CDRLs and DIDs have been prepared using standard forms, some blocks on the form are not applicable to this contract or not included.

Additional data requirements pertinent to a specific task may be called up in the task and the requirements for that data will be stated in the task SOW, including CDRL and DID information.

## 2 General Submission Requirements

### 2.1 Precedence

The requirements in Blocks 7 through 16 of the CDRL line items take precedence over any such requirements that may be specified in the associated DIDs.

### 2.2 Inspection and Data Acceptance

Receipt of data does not constitute acceptance.

### 2.3 Submission Schedule

- a. Unless otherwise specified, all numbers of days expressed herein are calendar days; and
- b. Date of submission means date of receipt of covering letter at PSPC and/or DND.

### 2.4 Abbreviations

The following is a list of acronyms that may be found in the CDRL:

ANNLY	Once every year
ASGEN	As generated
ASREQ	As required
BI-MO	Once every two months
EOC	End of Contract
EOM	End of Month
EPAR	End-Product Acceptance Review
FAU	First Article Unit
MTHLY	Monthly
n DAC	Number of days after contract start
n MAC	Number of months after contract start
OTIME	One time only
R/ASR	Revised as required
SEMIA	Once every six months

### 2.5 Format

Where a data item specifies that the contractor's own format is acceptable, Canada reserves the right to review and approve the format. Once the Contractor's format has been approved, the Contractor must not change the format without Canada's approval. Format in this context applies to the format of the contents, rather than the file structure or media.

### 3 General Format Requirements

- a. The general formatting and content instructions apply to all data items and are not repeated in the DIDs provided for specific CDRL items.
- b. Cover Page. In Contractor's format, but it must be consistent with every other CDRL Item delivered under the contract and contain the following data elements:
  - 1) Document identification number;
  - 2) Title of document;
  - 3) Version/revision number (see CDRL Block 12B and DID Block 2B);
  - 4) Date of Issue (see CDRL Block 12A 1st or Block 13 subsequent submission);
  - 5) Identification of Addressee;
  - 6) Identification of the contractor responsible for the delivery of the data item;
  - 7) Contract number; and
  - 8) CDRL Item number.

The cover page must contain Intellectual Property markings, which must be in accordance with the Contract's Terms and Conditions.

- c. Page Header. Applies to every page in the data item, except the Cover Page, and must contain the following data elements:
  - 1) document identification number;
  - 2) page number;
  - 3) volume number (if more than one volume in the data item); and
  - 4) Security classification.

- d. Page Footer. Applies to every page in the data item, except the Cover Page, and must contain the following data elements:
  - 1) horizontal line delineating the boundary between the main body of the page and the footer;
  - 2) the caveat “USE OR DISCLOSURE OF THIS DATA IS SUBJECT TO THE RESTRICTION OF THE TITLE PAGE OF THIS DOCUMENT”;
  - 3) document name;
  - 4) security classification;
  - 5) Task/Core program identification;
  - 6) Version/Revision number; and
  - 7) Date of issue.
- e. Authorization and Approval Page. In Contractor’s format, consistent with every other data item delivered under the contract and must contain the following data elements:
  - 1) an entry for each authorizing contractor signature including, name, project position (responsibility title), signature, and date signed; and
  - 2) as a minimum the following personnel must sign on behalf of the Contractor: manager responsible for creation and maintenance of the document, quality assurance manager, project manager. Other Contractor personnel may also sign off on the document at the discretion of the contractor.
- f. Table of Contents. In Contractor’s format, consistent with every other data item delivered under the contract and must contain the following data elements for each section and subsection in the document:
  - 1) section/subsection number;
  - 2) section/subsection title; and
  - 3) page number.
- g. List of Figures. In Contractor’s format, consistent with every other data item delivered under the contract and must contain the following data elements for each figure in the document:
  - 1) figure number;
  - 2) figure title; and
  - 3) page number.
- h. List of Tables. In Contractor’s format, consistent with every other data item delivered under the contract and must contain the following data elements for each table in the document:
  - 1) table number;
  - 2) table title; and
  - 3) page number.

- i. Body.
  - 1) Each section and paragraph must be numbered using a standard convention (e.g., legal) for all data items to be delivered under the contract;
  - 2) Pages must be sequentially numbered;
  - 3) Use of full colour when such use aids clarity and understanding of the information being presented, is desirable;
  - 4) All attachments must be identified and referenced in the text and the table of contents;
  - 5) Classified data must be separated and cross-referenced to the applicable portion of the main CDRL item; and
  - 6) In the event that a required section or subsection has been modified, a statement to that effect must be added directly following the heading of each such section or subsection.
- j. Media. Unless otherwise specified by a specific CDRL or DID, all data items must be delivered electronically. Documents must be printable, on standard 8 1/2 by 11 inch paper, suitable for reproduction. As necessary, tables, graphs, figures etc. may be formatted for printing on larger (e.g., 11 by 17 inch) paper. If larger pages are required to clearly present the required material, they must be clearly identified with header and footer information consistent with their parent document and may use separate and applicable document formats (e.g., for large charts, diagrams, spreadsheets, etc.) provided the electronic delivery package clearly groups all related parts of any given document together and their place within the parent document remains clear. Documents must be delivered in a format free of Digital Rights Management systems and with full edit, search, select and clipboard functionality enabled. Documents must not contain embedded passwords.
- k. Date Format. Where dates form a component of electronic metadata or filenames, they must be in ISO 8601 format (e.g., year/month/day).

## 4 CDRL Items

The following section provides a description of each of the fields of the CDRL.

The Land C4ISR sustainment CDRL items have been prepared in accordance with the DND standard for the preparation of CDRL items. The specific CDRL item for each data item identifies the requirements for the data item. Each CDRL item contains the following information:

- a. Identification of the CDRL item and reference to the SOW;
- b. Responsible office in DND;
- c. Distribution and addressees for acceptance of data by DND;
- d. Review Cycle for submission(s);
- e. Identification of addressees and number of copies; and
- f. DND preparation and acceptance block.

### 4.1 CDRL FORMAT

A description of each block of the CDRL as it is used on this contract is as follows:

- a. SYSTEM/ITEM

This block contains the system name – Land C4ISR sustainment.

- b. CONTRACT / RFP No.

To Be Determined after Contract Award.

- c. SOW IDENTIFIER

Not applicable as there is only one SOW.

- d. DATA CATEGORY

This block defines the category of the data for which the CDRL item has been prepared. The following categories can be used: Management Data (100 series), Systems Engineering (200 series), Integrated Logistics Support (300 series), and Configuration Management and Quality Management (400 series).

- e. CONTRACTOR

Identifies the Contractor responsible for the delivery of the CDRL. **To be determined.**

## f. Block 1

ITEM NUMBER - A six-digit number uniquely identifying the Data Item.

## g. Block 2

TITLE OR DESCRIPTION OF DATA - The title of the Data Item.

## h. Block 3

SUBTITLE - A subtitle may be used if the title requires further identification.

## i. Block 4

DATA ITEM NUMBER - The number used to identify the associated Data Item Description(s).

## j. Block 5

CONTRACT REFERENCE - The specific paragraph number of the Contract Demand, Statement of Work, Request for Proposal, Specification, or other applicable document, which will assist in identifying the effort associated with the data item.

## k. Block 6

TECHNICAL OFFICE - The technical office of primary interest. This is the technical authority responsible for ensuring the adequacy of the data.

## l. Block 7

INSPECTION AND ACCEPTANCE METHOD - This block indicates the requirement for inspection and acceptance of the data. Contains the appropriate code, if applicable:

<u>Code</u>	<u>Inspection</u>	<u>Acceptance</u>
SS	Source	Source
DD	Destination	Destination
SD	Source	Destination
DS	Destination	Source

## m. Block 8

APPROVAL CODE - Data requiring approval are identified by placing an "A" in this field. When a preliminary draft is required, Block 16 must show length of time for Canada approval or disapproval and when the final document is to be delivered. Block 16 will also indicate the extent of the approval requirements, i.e., approval of technical content and format. If advanced approval is not required, this block states N/A.

Approval or Acceptance by Canada of deliverables subject to this document represents that the Contractual requirement for the particular deliverable has been fully satisfied. Approval of any deliverable defined in the DID does not relieve the Contractor of its responsibility to meet all of the other requirements of the Contract.

## n. Block 9

INPUT FROM INTEGRATING ASSOCIATE CONTRACTOR – If data is the integrated results of specific inputs from associated contractors, an “X” is placed in this block. In all other cases, this block is blank.

## o. Block 10

FREQUENCY - This block indicates the frequency of delivery of the data, using the appropriate frequency code from the following:

ANPLY	Annually
ASGEN	As generated
ASREQ	As required
BI-MO	Each 2 months
BI-WE	Each 2 weeks
DAILY	Daily
DFDEL	Deferred delivery
DFREQ	Deferred requisitioning
MNTHY	Monthly
ONE/R	One time with revisions
OTIME	One time
QRTLY	Quarterly
R/ASR	Revision as required
SEMIA	Every six months
WKLY	Weekly

## p. Block 11

‘AS OF’ DATE - If the data are submitted only once on a date that may be specified, this block contains the “as of” date in ISO 8601 format (e.g., 2017-06-14). If submission is associated with a specific event or milestone, this constraint is stated. If there is insufficient space in Block 11, this block states “See Block 16” and Block 16 will state “11. [Followed by description of the driving event]” (e.g., “11. 15 days before SDR”). If an “as of” date, or specified delivery constraint is not applicable, this block is left blank.

## q. Block 12

DATE OF FIRST SUBMISSION - If the initial submission date may be specified, entered as follows: year/month/day (e.g., “2007/06/14”). If submission is associated with a specific event or milestone, this constraint is stated using one of the following:

ATBID	At bid time
ASGEN	As generated
ASREQ	As required
DACA/MACA	Days/Months after Contract Award (Note that in this contract, in the context of tasked work, Contract Award means the date when the contractor has been tasked to provide the data item.)
DFDEL	Deferred delivery
DFREQ	Deferred requisitioning
EOC	End of contract
EOM	End of Month
EOQ	End of quarter

n DPCC	number of Days Prior to Course Commencement
n DACC	number of Days After Course Completion

If there is insufficient space in Block 12 to enter the full text, this block will state “See Block 16” and Block 16 will state “12. [followed by the constraint]” (e.g., “12. 60 days after test”).

r. Block 13

DATE OF SUBSEQUENT SUBMISSION/EVENT - If data are submitted more than once, the date(s) of subsequent submission(s) are stated. If submission is constrained by a specific event or milestone, this constraint is stated (e.g., “15 days after EOQ”).

Abbreviation after the identification of a re-submission will have the following meaning:

- Pg: only change page(s) need be re-submitted along with a sign-off sheet.
- Add: only addendum supplement need be re-submitted along with a sign-off sheet.
- Rv: complete re-submission must be required.

s. Block 14

DISTRIBUTION AND ADDRESSEES - Indicates the addressees and the respective number of copies (hard copies and soft copies separately), for both the initial submission (Sub-Block “Initial”), and for the final submission (Sub-Block “Final”), for which the data item is required. Initial submission requirements are only identified if a Review Cycle is detailed in Block 16.

If reproducible copies are required, Block 16 is used to explain. If the data are not actually to be delivered to the government or associate contractors, this is explained in Block 16.

t. Block 15

TOTAL - The total number of regular/reproducible copies required by Block 14 is entered here.

u. Block 16

REMARKS - This block is used to provide additional or clarifying information for Block 1 through 15. This block is also used to tailor the documents listed in Block 4. Tailoring may be accomplished by stating the deletions (e.g., “delete paragraph 10.4”) or by stating which requirements apply (e.g., “only paragraphs 10.4 and 10.5 apply”), whichever is the more efficient. Block 16 may also be used to specify “Contractor format is acceptable”, or to indicate the desired medium for delivery of data.

v. Blocks 17 – 20

These blocks are not applicable.

## 4.2 List of CDRL Items

The following list identifies the CDRL Items to be provided in the sustainment contract by its CDRL item number (Block 1), its Title (Block 2), and its DID number (Block 4):

CDRL Number	DID Number	Title
100.001	100.001	Project Management Plan (PMP)
100.002	100.002	Monthly Progress Report (MPR)
100.003	100.003	Meeting Agenda
100.004	100.004	Meeting Minutes
100.005	100.005	Canada Owned Assets Management Report
100.006	100.006	Indigenous Participation Plan
200.001	200.001	Systems Engineering Management Plan (SEMP)
200.002	200.002	Obsolescence Report
300.001	300.001	Integrated Logistics Support Plan (ILSP)
400.001	400.001	Configuration Management and Data Management (CM-DM) Plan
400.002	400.002	Quality Management Plan (QMP)

## 5 DIDs

### 5.1 DID Format

The DID associated with the CDRL item details the content and the format to be included in the submission of the data.

A description of each block of information follows:

a. Block 1 - Title

This is the title of the DID and usually corresponds to the associated CDRL item title, except where a DID is referenced by more than one CDRL item.

b. Block 2 - Identification Number

This is the number assigned by the Office of Primary Interest (OPI) to the DID and identifies the area of activity to which the DID is applied. These areas include Management Data (100 series), Systems Engineering (200 series), Integrated Logistics Support (300 series), and Configuration Management – Document Management and Quality Management (QM) (400 series).

c. Block 3 - Description

This provides general information on how the data detailed in the DID is to be used.

d. Block 4 - Approval Date

This is the date that the OPI has approved the content of the DID in ISO 8601 format (year/month/day).

e. Block 5 - Office of Primary Interest

This identifies the DND responsibility center for review, acceptance and approval of the DID.

f. Block 6 – GIDEP Applicable

The GIDEP Applicable block will contain an X when copies of the data are required to be submitted by the contractor to the Government/Industry Data Exchange Program. Otherwise, it will be blank.

g. Block 7 - Application / Interrelationship

This block identifies the scope of the DID and where the DID requirement is defined (i.e.) the applicable portion of the Contract.

h. Block 8 - Originator

This identifies the originator of the DID on behalf of the OPI in Block 5.

i. Block 9 - Applicable Forms

This identifies a published form or template to be used in the completion of the DID if applicable.

j. Block 10 - Preparation Instructions

This provides the preparation details for the format and for the content in the completion of the DID. This item forms the contractual requirement for the Contractor.

## 5.2 List of DIDs

The list of DIDs sorted by DID number is shown in section 4.2. The actual DIDs are attached at section 7 of this volume.

16. REMARKS  Block 12. The initial proposed PMP must be submitted with the Bidder's proposal at the bid submission stage.  The Contractor's format and content is subject to approval by Canada. The Contractor must implement Canada's proposed changes within twenty-one (21) working days after receipt.  Block 13. Canada may provide comments or request changes on the PMP format and content after the contract award. The Contractor must update the PMP within 14 working days after receipt of comments and re-submit to the TA for approval.  The PMP may require updates throughout the contract period. Further updates (to reflect changes to the project) must be reviewed at a PRM or any other meeting as specified by Canada; such proposed updates must be provided to Canada at least 14 days before the PRM or any other meeting as specified by Canada where they will be reviewed. Canada may at its sole discretion accept, reject or direct changes to the PMP.						INITIAL Soft Copy	FINAL Soft Copy

## 7 Data Item Descriptions

DATA ITEM DESCRIPTION		
1. TITLE Project Management Plan (PMP)	2A. IDENTIFICATION NUMBER 100.001	2B. VERSION / REVISION /
3. DESCRIPTION The PMP describes how the contractor will structure the organization, and implement and employ the integrated project management practices, processes, procedures and tools required to successfully manage the Land C4ISR Sustainment Contract and meet its contractual obligations.		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST DLCSPM	6. GIDEP APPLICABLE
7. APPLICATION / INTERRELATIONSHIP 10.1 The PMP is the highest-level plan for the project. All other plans are subordinate to the PMP. 10.2 The PMP has interrelationships with the DLCSPM-System Engineering Process (SEP) 2021 standard and System Engineering Management Plan (SEMP) provided by the contractor.		
8. ORIGINATOR	9. APPLICABLE FORMS	
10. PREPARATION INSTRUCTIONS  10.1 General The plan must be an all-encompassing plan for the project. Where further detail for a section of the PMP is covered by a subordinate plan, the PMP will present an overview in the PMP section of the material specified in these preparation instructions and reference the subordinate plan.  10.2 Content The plan must include the following information, but not limited to: a. Introduction. Introduces the plan including scope, purpose, and maintenance of the plan. b. Applicable Documents. Identifies all documents applicable to this plan including, as a minimum, other CDRL items, MIL-STDs, CFTO's, etc., including identifier, title, version number and date of issue. c. Approach. Presents an overview of the project management organization, methodology and processes that integrate project planning, directing, monitoring and reporting. As a minimum, this plan must contain the following: <ul style="list-style-type: none"> <li>(1) Organization breakdown structure and interfaces;</li> <li>(2) Establishment and maintenance of project management monitoring and control;</li> <li>(3) Establishment and maintenance of task management control;</li> <li>(4) Establishment and maintenance of risk management control;</li> <li>(5) Establishment and maintenance of a quality management system;</li> <li>(6) Establishment and maintenance of Canada owned resource (including controlled goods) management control;</li> <li>(7) Establishment of a resource and facilities activation plan;</li> <li>(8) Establishment and maintenance of security management control;</li> <li>(9) Establishment and maintenance of engineering management control;</li> <li>(10) Establishment and maintenance of configuration management control;</li> <li>(11) Establishment and maintenance of data management control; and</li> <li>(12) Establishment and maintenance of quality management control.</li> </ul> 10.3 Organizational Breakdown Structure (OBS) and Interfaces The PMP must provide a hierarchical diagram of the Contractor Land C4ISR Sustainment program		

organization to the cost account level. As a minimum the OBS must be decomposed to the Land C4ISR Sustainment core work and task managers.

For each position, the PMP must identify the name and the function of the incumbent and proposed personnel. In addition, it must provide a description of the responsibilities, authorities and reporting lines of the Contractor's Core Work Personnel (CWP) as well as any additional team members, resources, and sub-contractors to deliver Additional Work Requirements.

The PMP must describe the Contractor's approach, processes and procedures to interface with Canada and the Contractor's Subcontractors. At a minimum, topics must include:

a. Interactions with Canada:

- (1) Types of interactions,
- (2) Reports,
- (3) Meetings,
- (4) Concerns and comments,
- (5) Orientations and instructions,
- (6) Official correspondence,
- (7) Exchange techniques,
- (8) Unimpeded access to all related work, personnel and data to Canada,
- (9) Bridging and support to Canada.

b. Interactions with Sub-Contractors:

- (1) Project Management,
- (2) Monitoring and control of performance, costs and schedule,
- (3) Quality Management,
- (4) Contracts,
- (5) Problem reporting and resolution,
- (6) Risk management.

#### 10.4 Scope Management, for both core work and additional work requirements

This includes:

- (1) Planning scope management,
- (2) Collect requirements,
- (3) Scope refinement,
- (4) Work Breakdown Structure,
- (5) Scope Validation,
- (6) Scope Control,
- (7) Product/Sub-System/System Breakdown Structure,
- (8) Reports Management.

#### 10.5 Project Management Monitoring & Control

##### 10.5.1 General

This subsection refers to the description of the organization, management and procedures of the Contractor's Management Control System (MCS) that the contractor has, or will have, in place to manage the Contract, in accordance with this DID.

The Contractor must describe how their Management Control System (MCS) is used to coordinate and integrate project data and information that relates to the planned performance of the work, the actual performance and any variances. The Contractor must explain how it spans issues of schedule, cost and performance and defines the vehicle, which will allow Canada visibility into approved Land C4ISR Sustainment information.

The MCS description must incorporate the following:

- a. A narrative description of the management policies, processes and procedures used for project

planning and control including organization, planning and budgeting, scheduling, cost accumulation, human resource management, baseline control, status of progress, variance analysis and reporting; and

- b. A narrative description describing how the progress report data is developed, analyzed, updated, and approved for release including any associated selection criteria.

#### 10.5.2 Subcontractor Flow-Down.

The Contractor must describe its plans for flow down of MCS reporting requirements to subcontractors, including the process for analyzing and incorporating subcontractor problem and risk management data.

#### 10.5.3 Project Management Problem Reporting and Resolution.

The Contractor must describe the tools, processes and procedures proposed to identify, record, analyze and resolve problems both internal and external to the Contractor's project office. The proposed level of access to be provided to Canada, including entry of new problems or resolution to existing problems, must be addressed.

The interface and interaction with the risk management processes, as defined hereunder must be described.

#### 10.5.4 Directing, Monitoring, Controlling and Reporting.

The Contractor must propose an approach for external and internal reviews. As a minimum, the following topics must be addressed:

- a. Progress review meetings; and
- b. Core Work activities and management.

### 10.6 Risk Management Control

This subsection must: define the procedures and methods to be used in identifying, analyzing and evaluating extraordinary risk, describe the processes to be used in the early prediction of potential problem areas, and describe the procedures and assigned responsibilities for risk mitigation and problem resolution.

Risks may be controllable or uncontrollable within the project work; however, it is essential that all extraordinary risks, whether controllable or uncontrollable, be identified and tracked. Controllable risks must be managed. Contingency Plans must be made for dealing with uncontrollable risk.

### 10.7 Quality Management

This subsection is the high-level Quality Management Plan and must explain how the quality aspects of programs, products and services are managed in the Contractor's organization and must include the following:

- a. A definition of the organizational quality management policies and procedures;
- b. A definition of the organizational quality goals and objectives;
- c. A definition of the accountability and authority for quality management;
- d. Identification of how the status of customer satisfaction is monitored; and
- e. Identification of the action taken when quality goals are not achieved.

### 10.8 Human Resources Management in support of **both**, core work and additional work requirements

This includes:

- (1) Recruitment and selection,
- (2) Performance management,
- (3) Learning and development,

- (4) Succession planning,
- (5) Compensation and benefits,
- (6) Onboarding, availability and mobilization of Core Work personnel after contract award,
- (7) Onboarding, availability and mobilization of AWR personnel after issuance of a task.

#### 10.9 Government Furnished Assets Management

This subsection must identify the procedures and methods employed by the Contractor to accept, track and manage internally and through their subcontractors, Government property made available to the Contractor by Canada for performing the Land C4ISR Sustainment Contract. The Contractor must refer to Appendix A3 – Logistics SOW for developing its procedures.

The description must explain how the Controlled Goods will be managed and must include the following:

- a. Identification of how the Contractor will ensure that all staff, including that of any Subcontractor, is qualified to carry out the work in compliance with all applicable international and federal controlled goods laws and regulations;
- b. Identification of how the Contractor will ensure that all Work, including the Work of any Subcontractor, is performed in compliance with all applicable international, and federal controlled goods laws and regulations; and
- c. Describe how the Contractor acquires and maintains software licenses of Land C4ISR system elements to support the engineering processes.

#### 10.10 Security Management

This subsection must define the procedures and methods employed by the Contractor to manage the security aspects of the contract including:

- a. Gaining necessary security clearance for new employees; and
- b. Electronic security of data, computers and networked resources.

#### 10.11 Overview of Subordinate Plans

This section must provide an overview of the plans identified hereunder. The overview must highlight the major aspects of the plans and explain their interrelationships and dependencies with each other and this Project Management Plan.

Subordinate Plans include:

- a. System Engineering Management Plan;
- b. Configuration and Data Management Plan;
- c. ILS Plan; and
- d. Quality Management Plan.

#### 10.12 Performance Management

The Contractor must describe the Performance Measures and the associated Measurement and Analysis process that will be used in the conduct of the Work of the SOW.

#### 10.13 Project transition and close-out

This includes:

- a. Verify acceptance of final deliverables,
- b. Transfer of all deliverables (complete and incomplete), including source code, development and test environments, documentation, training materials, etc.,
- c. Return of GFA,

- d. Financial assessment and completion,
- e. Conduct lessons learned and provide to Canada,
- f. Staff Transition Plan,
- g. Infrastructure Decommissioning Plan,
- h. Security Closeout Plan & Report,
- i. R&O Closeout Plan,
- j. Audit Closeout Plan,
- k. ITB Closeout Report.

The PMP must also describe the Contractor's approach to the continuous improvement of project management throughout the life of the Contract.

DATA ITEM DESCRIPTION		
1. TITLE Quarterly Progress Report (QPR)	2A. IDENTIFICATION NUMBER 100.002	2B. VERSION / REVISION /
3. DESCRIPTION The purpose of the report is to: <ul style="list-style-type: none"> <li>a. Monitor overall Land C4ISR Sustainment Services Contract performance;</li> <li>b. Provide the customer (Contract Authority (CA), Procurement Authority (PA), and Technical Authority (TA) with the information necessary to evaluate the progress of the activities; and</li> <li>c. Communicate to the customer any contract concerns and risks identified by the Contractor that might affect either meeting the contract requirements or the performance and system integrity of the Land C4ISR Capability.</li> </ul>		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST DLCSPM	6. GIDEP APPLICABLE
7. APPLICATION / INTERRELATIONSHIP		
8. ORIGINATOR	9. APPLICABLE FORMS	
10. PREPARATION INSTRUCTIONS  10.1 Content Progress Reports must include the following information: An executive summary that describes significant elements of the report. Progress Status. An update of progress status for management services, engineering services and tasks. Project Management Status, includes but not limited to: <ul style="list-style-type: none"> <li>a. Planned expenditure report,</li> <li>b. Contractor's Performance report, and</li> <li>c. Risk status report.</li> </ul>		

DATA ITEM DESCRIPTION		
1. TITLE Meeting Agenda	2A. IDENTIFICATION NUMBER 100.003	2B. VERSION / REVISION /
3. DESCRIPTION Meeting Agendas set forth the venue and identify the discussion items to be covered at meetings.		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST DLCSPM	6. GIDEP APPLICABLE
7. APPLICATION / INTERRELATIONSHIP This DID integrates with the DID - Meeting Minutes.		
8. ORIGINATOR	9. APPLICABLE FORMS N/A	
10. PREPARATION INSTRUCTIONS  10.1 Content The agenda must address the following: <ul style="list-style-type: none"> <li>a. The scope, purpose and objectives of the meeting;</li> <li>b. Time, date and location;</li> <li>c. Suggested attendees (Contractor, Canada and others);</li> <li>d. Need for any Canada documentation to be presented at the meeting; and</li> <li>e. Security classification of the meeting.</li> </ul> 10.2 The following must be the standard agenda items with appropriate details relevant to the specific meeting: <ul style="list-style-type: none"> <li>a. Agenda review;</li> <li>b. Review report items;</li> <li>c. Review meeting action item status;</li> <li>d. Other agenda items;</li> <li>e. New subjects introduced by members of the meeting; and</li> <li>f. Action item generation.</li> </ul> 10.3 Special requirements. This section must detail the requirement for visit clearances, security arrangements, facilities, and any other pertinent information.		

DATA ITEM DESCRIPTION		
1. TITLE Meeting Minutes	2A. IDENTIFICATION NUMBER 100.004	2B. VERSION / REVISION /
3. DESCRIPTION Meeting Minutes consist of the detailed records of proceedings, discussions, decisions and action items from a meeting.		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST	6. GIDEP APPLICABLE
7. APPLICATION / INTERRELATIONSHIP This DID integrates with DID 100.003 - Meeting Agenda.		
8. ORIGINATOR	9. APPLICABLE FORMS N/A	
10. PREPARATION INSTRUCTIONS  <p>10.1 Content</p> <p>The minutes of meetings must be presented in the following sections:</p> <ul style="list-style-type: none"> <li>a. General - including meeting identification number, purpose, date, time and location;</li> <li>b. Attendees, including their title and responsibility;</li> <li>c. Discussion Items - Including a summary record of proceedings, discussions, decisions, information addressees, action addressees and action completion date, for each item. All agenda items must be covered;</li> <li>d. Next Venue (if applicable); and</li> <li>e. Signatures of the Contractor Authority and DND Technical Authority (TA) or their delegates as may be appropriate for the specific meeting.</li> </ul>		

DATA ITEM DESCRIPTION		
1. TITLE Canada Owned Assets Utilization & Status Report	2A. IDENTIFICATION NUMBER 100.005	2B. VERSION / REVISION /
3. DESCRIPTION The Canada Owned Resource Utilization Status Report provides the status of Government Furnished Assets (GFA) that are provided by Canada to the Contractor, for performing the Contract.		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST DLCSPM	6. GIDEP APPLICABLE
7. APPLICATION / INTERRELATIONSHIP		
8. ORIGINATOR	9. APPLICABLE FORMS N/A	
10. PREPARATION INSTRUCTIONS  <p>10.1 Content</p> <p>The report must provide an inventory of Government Furnished Assets (GFA) issued to the Contractor and to Subcontractors.</p> <p>The report must include, as a minimum, the following information for each item in the Contractor's (and Subcontractor's) possession:</p> <ul style="list-style-type: none"> <li>a. Item name – e.g. Land C4ISR Checkout Cell Laptop;</li> <li>b. Item Description – e.g. Toshiba Tecra S3 Laptop (Model PTS30C-MT501E) w/power transformer;</li> <li>c. Serial / Registration / License Key or Media Number;</li> <li>d. Contractor/Subcontractor assigned Asset Number;</li> <li>e. NATO Stock Number (NSN) or Permanent System Control Number (PSCN) (where applicable);</li> <li>f. Original Equipment Manufacturer's Part Number;</li> <li>g. Location (Present location of item);</li> <li>h. Cost (if purchased by the Contractor/Subcontractor on DNDs behalf); and</li> <li>i. Use/Comments.</li> </ul>		

DATA ITEM DESCRIPTION		
1. TITLE Indigenous Participation Plan	2. IDENTIFICATION NUMBER 100.006	
3. DESCRIPTION The Indigenous Participation Plan (IPP) will demonstrate how and to which extent the Contractor will support the government's target to source Goods and/or Services from Canadian indigenous firms as part of the Work to be delivered to Canada under the contract.		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST DLP	6. GIDEP APPLICABLE
8. APPLICATION / INTERRELATIONSHIP		
8. ORIGINATOR	9. APPLICABLE FORMS	
11. PREPARATION INSTRUCTIONS  <b>11.1 Format</b>  The Contractor's own format is acceptable.  <b>11.2 Content</b>  The IPP must address, but is not limited to, the following information:  a. <b>Approach.</b> Presents an overview of the plan to support Indigenous Business, including but not limited to;  <ul style="list-style-type: none"> <li>i) Human resources strategy on retaining Indigenous peoples for the performance of the Work;</li> <li>ii) Subcontracting strategy on participation of Indigenous business in the performance of the Work;</li> <li>iii) Past and current activities undertaken to support Indigenous Businesses as well as proposed future plans or additional activities which will create long-term, sustainable economic benefits for Indigenous groups or Indigenous Businesses; and</li> <li>iv) Estimated cost projected for participation of Indigenous Businesses under this contract.</li> </ul> b. <b>Report.</b> The Contractor must provide details on activities conducted as part of the Indigenous Procurement Plan, including but not limited to:  <ul style="list-style-type: none"> <li>i) List and value of subcontracts awarded during the contract period supporting the Work, with references to applicable claims;</li> <li>ii) Number of employment or sourcing of Indigenous resources used to perform the Work;</li> <li>iii) Deviations from the plan or unforeseen circumstances, which may have had an impact on achieving projected goals; and</li> <li>iv) For each proposed Indigenous businesses for subcontracting, a copy of the Procurement Strategy for Indigenous Business (PSIB) certification must be included.</li> </ul>		

DATA ITEM DESCRIPTION		
1. TITLE Systems Engineering Management Plan (SEMP)	2A. IDENTIFICATION NUMBER 200.001	2B. VERSION / REVISION /
3. DESCRIPTION The Systems Engineering Management Plan (SEMP) describes the Contractor's plans and processes for scheduling, planning, organizing, directing, conducting, controlling and coordinating all engineering efforts under the contract and sets forth the Contractor's engineering plan.		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST DLCPSM	6. GIDEP APPLICABLE
7. APPLICATION / INTERRELATIONSHIP The SEMP is a subordinate plan of the Contractor's PMP and Canada's SEP, and is interrelated with the Contractor's QMP.		
8. ORIGINATOR	9. APPLICABLE FORMS	
10. PREPARATION INSTRUCTIONS  10.1 Content The SEMP must be in response to Canada's System Engineering Process (SEP). It must define how the Contractor will align the Contractor's engineering processes to Canada's Engineering Processes defined in Canada's SEP. The SEMP must contain sufficient detail to allow DND to assess the Contractor's ability to carry out and manage the engineering work required under the contract. The SEMP must contain as a minimum the following information aligned with the major headings of Canada's SEP: <ul style="list-style-type: none"> <li>a. Introduction,</li> <li>b. Organization,</li> <li>c. Engineering Process Overview,</li> <li>d. Governance and Management,</li> <li>e. Roles and Responsibilities,</li> <li>f. Engineering Process,</li> <li>g. Integration Process,</li> <li>h. Verification and Validation Process,</li> <li>i. Detailed description of how the sustainment Contractor will interact with other sustainment Functional Groupings and stakeholders as outlined in Canada's SEP.</li> </ul> The SEMP must also describe the Contractor's approach to the continuous improvement of System Engineering Management throughout the life of the Contract.		

DATA ITEM DESCRIPTION		
1. TITLE Obsolescence Management Report	2A. IDENTIFICATION NUMBER 200.002	2B. VERSION / REVISION /
3. DESCRIPTION The Obsolescence Report identifies for current and intended Land C4ISR elements, obsolescence related issues.		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST DLCSPM Technical Authority	6. GIDEP APPLICABLE
7. APPLICATION / INTERRELATIONSHIP		
8. ORIGINATOR	9. APPLICABLE FORMS N/A	
10. PREPARATION INSTRUCTIONS  <p><b>10.1 Content</b></p> <p>The Obsolescence Management Report must identify the obsolescence issue for current and intended Land C4ISR elements.</p> <p>The report must identify options to respond to the issue. Each option must present a complete analysis of the implications of proceeding with that option. Options can include lifetime purchases. The analysis must include (as applicable):</p> <ul style="list-style-type: none"> <li>a. An assessment of the current technology capabilities and their suitability;</li> <li>b. Proposed obsolescence related technology insertion strategies, which comply with the Land C4ISR Concept of Operations and minimize total life cycle costs;</li> <li>c. Identification, for each item and the system as a whole, optimal sparing and replacement predictions;</li> <li>d. A description of the processes that the Contractor will use to identify/forecast, track, mitigate and correct the impact of obsolescence on the Land C4ISR elements;</li> <li>e. The proposed processes that will be followed for the replacement of obsolete and deprecated components, and components reaching their end of life;</li> <li>f. Identification of new personnel skill sets required;</li> <li>g. Identification of new process and maintenance requirements; and</li> <li>h. All associated costs.</li> </ul> <p>The cost included with each option must include all costs including Engineering, Configuration Management, Procurement, Training, Technical Publications, Logistical Support and any other items identified in the analysis.</p>		

DATA ITEM DESCRIPTION		
1. TITLE Integrated Logistics Support Plan (ILSP)	2A. IDENTIFICATION NUMBER 300.001	2B. VERSION / REVISION /
3. DESCRIPTION This plan describes the Contractor's program for providing integrated logistics support services.		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST DLCSPM ILS	6. GIDEP APPLICABLE
7. APPLICATION / INTERRELATIONSHIP 7.1 The ILSP Plan supports the PMP. 7.2 The quality of the process and outcomes resulting from performing the activities described in the ILSP are assured by the process described in the QMP. 7.3 ILS activities in many cases provide the initial input into engineering investigations.		
8. ORIGINATOR	9. APPLICABLE FORMS N/A	
10. PREPARATION INSTRUCTIONS 10.1 General The ILSP must describe how the Contractor will conduct the Life-Cycle Materiel Management Support Services identified in the SOW. As a minimum, the ILSP must cover the following: <ul style="list-style-type: none"> <li>a. Repair and Overhaul Services;</li> <li>b. Obsolescence Management Support Services;</li> <li>c. Sparing Services including Parts Provisioning, Packaging, Handling, Storage and Transportation;</li> <li>d. Training Support;</li> <li>e. ILS Documentation;</li> <li>f. Maintenance support; and</li> <li>g. Problem Resolution Support.</li> </ul> The ILSP must also describe the Contractor's approach to the continuous improvement of ILS throughout the life of the Contract.		

DATA ITEM DESCRIPTION		
1. TITLE Configuration Management and Data Management (CM-DM) Plan	2A. IDENTIFICATION NUMBER 400.001	2B. VERSION / REVISION /
3. DESCRIPTION  3.1 This plan describes the Contractor's CM-DM program. 3.2 The CM-DM Plan describes how the Contractor will perform the CM-DM work specified in the SOW.		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST DLCSPM Technical Authority	6. GIDEP APPLICABLE
7. APPLICATION / INTERRELATIONSHIP  7.1 The CM-DM Plan supports the PMP and SEMP. It is supported by the QMP. 7.2 The quality of the process and outcomes resulting from performing the activities described in the CM-DM Plan, are assured by the process described in the QMP, and it must address the Security Requirement Check List and the Supply Chain Integrity requirements of the contract.		
8. ORIGINATOR	9. APPLICABLE FORMS N/A	
10. PREPARATION INSTRUCTIONS  10.1 General  The CM-DM Plan must comply with the CM plan requirements of ANSI/EIA 649.  The Contractor must consider the guidance of ISO 15846 for software configuration management in the preparation of the plan.  The CM-DM Plan must conform to the information items content requirements as follows: <ul style="list-style-type: none"> <li>a. Configuration Management Plan IAW ISO/IEC 15289.</li> <li>b. Documentation Plan IAW ISO/IEC 15289.</li> </ul> The CM-DM Plan must conform to planning requirements of ISO/IEC 12207.  The CM-DM Plan must conform with life cycle data and information items formats of ISO 15289 as specified in section 10 of this DID.  10.2 Specific content  The CM-DM Plan must define the policies and procedures to be used to configuration manage the functional and physical characteristics of Land C4ISR Capability Products, including interfaces and configuration identification documents, for the duration of Contract.  The plan also includes a description of the procedures for conveying CM requirements to Subcontractors.  10.3 Land C4ISR CM System of Record  The Land C4ISR System of Record is an information management system that contains CM data on the different Land C4ISR components.  CM data (new or pre-existing to this contract), must be transferred to the TA in a format compatible with the Land C4ISR System of Record or inputted by the Contractor directly into the Land C4ISR System of Record, on a monthly basis in a manner approved by the TA.  The CM-DM Plan must also describe the Contractor's approach to the continuous improvement of CM-DM throughout the life of the Contract.		

DATA ITEM DESCRIPTION		
1. TITLE Quality Management Plan (QMP)	2A. IDENTIFICATION NUMBER 400.002	2B. VERSION / REVISION /
3. DESCRIPTION  3.1 This plan describes the Contractor's Quality Management program. 3.2 The QMP describes how the Contractor will perform the quality management work specified in the SOW.		
4. APPROVAL DATE	5. OFFICE OF PRIMARY INTEREST DLCSPM Technical Authority	6. GIDEP APPLICABLE
7. APPLICATION / INTERRELATIONSHIP  7.1 The QMP is subordinate to PMP, and supports the SEMP, ILS and the CM-DM Plan. 7.2 The quality of the process and outcomes resulting from performing the activities described in the QMP, are assured by the process described in the QMP.		
8. ORIGINATOR	9. APPLICABLE FORMS N/A	
10. PREPARATION INSTRUCTIONS  10.1 General The QMP must conform to the generic content guidelines for plans of ISO/IEC 9001:2015 Ed 5. The process descriptions or referenced by the QMP must conform to the generic content guidelines for procedures of ISO/IEC 9001:2015 Ed 5.  10.2 Specific content The QMP must describe the organizational structure, the appropriate training of its personnel, roles and responsibilities assigned to perform product & process quality management for all Work.
