

AMENDMENT #001

The purpose of this amendment is to respond to questions raised by Industry.

INDUSTRY QUESTIONS AND ANSWERS

Question 1. I am wondering if the Department has replaced any other internal applications with a SaaS/PaaS? The reason I am asking is that I would like to better understand the growth opportunity and whether other departments may be seeking similar services as the Department of Justice is seeking right now down the road.

Answer 1. Internal JUS applications have not been replaced with SaaS/PaaS within JUS proper. Some applications developed at the GoC-level or mandated by Treasury Board have been adopted over the years by JUS and other departments, however custom internal JUS applications have remained as such over time. Net new applications (requirements) have been procured by JUS as SaaS products however those were to implement new functionality and fill gaps in solutions, not to replace existing custom applications.

**ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED
END OF AMENDMENT #001**
