

Question & Answer

Q1) (Company Name) is interested in pursuing the RFP for the cabinets. In the past when we've made cabinets, we would use drawings sent by you (The customer) to specify the dimensions and inner workings, this would also give us the ability to give you an accurate estimate for pricing. Without these drawings (Company Name) would use our engineering team to design and construct each cabinet to the requirements set in the RFP, this would greatly increase the cost and time of our services. If possible, please send drawings or sketches for each item listed.

A1) Natural Resources Canada (NRCAN) is looking for storage cabinets as per the detailed information contained in the RFP "Table 1 – Product table" as opposed to constructing these cabinets. As a result, there are no drawings or sketches to be shared. Please refer to the Table 1 – Product Table in Annex A for the description of products.
