Description of Work:

Solution Architecture for the CADIA project has identified three Product Platforms that require external resource leads. The project team will be leveraging existing capabilities inherent to CFIA infrastructure and not the re-building of functionality that already exists. Functionality will be leveraged in **ArcGIS**, Dynamics 365 (D-365), and Abode Experience Manager.

ArcGIS is a cloud-based mapping and analysis solution. It is used to make maps, analyze data, and to share and collaborate as well as get access to workflow-specific apps, maps and data, and tools for being mobile in the field.

External resources 2 will be required to lead a Development team with CFIA resources as Subject Matter Experts in the delivery of the functional requirements that have been mapped to the core capabilities identified under the ArcGIS Platform.

- Bidders must submit a bid for all resource categories
- The work is currently not being performed by a contracted resource

Security Requirement: Common PS SRCL #09 applies
