Description of Work:

The mandate of the Canadian Space Agency (CSA) is to promote the peaceful exploitation and development of space, to advance the knowledge of space through science and to ensure that Canadians benefit from science and space technologies both socially and economically. CSA's digital transformation and technology sector plays an important role in developing various applications in support of this mandate.

Since 2016, CSA's intranet site has been on the Drupal 7 platform. As this version is end of life, CSA has decided to migrate its intranet site to "SharePoint in Microsoft 365" technology (hereafter referred by SharePoint), since it already owns the platform and the user licenses. To carry out its project, CSA wishes to call upon the services of a firm which has expertise in the implementation of intranet sites under SharePoint, and which will be able to offer complete advisory and support service for the implementation of its new intranet.

The objective is to create a new intranet site on the department's SharePoint platform and migrate the content of the current intranet site (Drupal) to the new site before December 31st, 2023.

Security Requirement:	Protected B
Minimum Corporate Security Required:	Designated Organization Screening (DOS)
Minimum Resource Security Required:	Reliability

Bidders may submit a bid for one or all resource categories. The work is currently not being performed by a contracted resource. Documents may be submitted in either of Canada's official languages.

Contract Authority

Name:	Sophorn Sok
