Canadian Forces Land Electronic Warfare Modernization

Request for Information – Amendment 007

This amendment is raised to answer questions from potential suppliers.

Questions and Answers:

Q1. Does CFLEWM have a requirement for any deployable shelters for command posts, C4I type shelters, workshops, or similar? Or will all CFLEWM 'shelter' requirements be achieved through ACSV, LVM, or other programs like HQSS or JDHQSRM?

A1. Yes, CFLEWM has a requirement for EW capabilities to be deployable in shelters. CFLEWM will be partially dependant on other projects and existing capabilities to deliver those platforms. The exact number of the shelters will be defined once the scope is solidified with or without the UAV component. Other key points of note:

- ACSV is the target platform for armoured EW capabilities. We anticipate receiving 18 ACSVs to serve as the MEWT platform and 2 to serve as MRTs.
- deployable shelters (CPs, C4I, tentage) is a target platform for CP operations
- soft-skinned vehicles are the target platform for light EW capabilities and mobile repair teams
- man portable systems for light EW troops
- UAVs for airborne EW capabilities

CFLEWM also has the requirement to deliver into static classroom settings for simulation and training.

Q1. We would like to get an update on the program, has it achieved definition and what will be the next steps, should we expect a RFI and industry day coming up this year?

A1 CFLEWM is currently in Options Analysis and has pass the Defence Capability Board 2 (DCB2) gate, it is currently going through the Independent Review Panel for Defence Acquisition (IRPDA) step. It is anticipated that CFLEWM will enter definition phase in 2024.
