## **TENDER ADDENDUM**

### **HOG'S BACK SWING BRIDGE MAINTENANCE SERVICES CONTRACT**

**Tender # MA064**

**March 20, 2023**

#### **ADDENDUM No. 4**

---

The following shall be read in conjunction with and shall form an integral part of the Tender / Proposal and Contract Documents:

- Q1. We propose to add a line item to the proposal for a permanent installation for the remote monitoring of the site.
- Included in this submittal amount would be all costs associated with all the known on site work needed for this, programming, hardware, software, and training to the client for this system.
  - Excluded in the amount, would be the costs in bringing the internet connection to the site, and any provider costs related to this. We propose to look after this work with any mark ups as stated in the tender/contract under the section related to “work by subcontractors”. The service would get registered to the client and all monthly subscription fees would be covered by them.

The end user would also have remote access, and receive training for this at the original installation, as well as yearly per the tender document’s yearly requirements.

Please confirm if this can/will be added as a formal line item in the tender form, required by all groups submitting pricing.

- A1. Adding the remote monitoring should not form part of the bid and may be dealt with as a change order when requirements are more defined. A temporary remote system had been installed last year via a third party. The system transfer or sharing are not addressed yet.

All other terms and conditions remain the same.
